Branding

AND DESIGN

Rebranding IDEAS AND SOLUTIONS

We created illustrations representing fragments of urban landscapes in isometric projection illustration are full of details, characters, life scenes, funny or mysterious situation related to **PASTA**

What's important, each illustration is filled with diverse cultural references - references to famous movies, tv shows, paintings, historical events and modern memes. According to reviews of the first buyers some of them «stick over the illustration for half an hour», in search of familiar details. Thus, using this package the brand enters into a dialogue with the consumer in his language and in an unobtrusive manner makes it clear that it has common values with the audience - openness to the world and taste in the broadest sense of the word

The background of the image is a dark, monochromatic photograph of crumpled, marbled paper. The paper has intricate, swirling patterns in shades of grey and black, creating a textured, organic feel. The lighting is soft, highlighting the folds and creases of the paper.
