NO dont do that it s attracted to water

would say instead get all the old dead wood and news paper --card board and burn it turn it into a fine powder and spread it all over the land and into the water ---the charcoal will also attract and neutralize spray water on the charcoal to make it more adsorbent and then afterwards use probiotics---they have stuff you pour down a drain to open a drain add that to a container of water and spray over the charcoal --preferably an amylase powder since it breaks down carbon or mix a peroxide and vinegar slur on its own and spray over the areas this then will break down the carbons as well this should make there shit inert--- as for the indoor ionizers will be a good idea just clean the metals or filters frequently---

Share this with you re network

you can make oxygen through elctrolysis but instead of sealing the tube you leave the oxygen tube open to release the air in the house or outside

if you can get the community to do this will assist

will show 2 vids

Generators From Grocery
Store Items (HHO Fuel
Cells ...**

release the air if you can store the hydrogen its flammable so you may be able to use it for other things like welding or adding it to the fuel line to a car to increase performance

baking soda will be the cheapest so use it

here s another way to make the plates as well

Tony

Sorry to be picking your brain so late. Will ionization/O3 of the air help and should the house be humid or dry. Wondering if I should boil water.

Thank you so much for everything!

Kim

make sure you alkalize the animals water as for you re self

the private well may bit be enough can you distill or RO you re water would be another preventative---if you see the vegetation look burned then keep you and you re family indoors

the Hydrochloric acid will burn everything---buy or get bags 25 kilo of mag or baking soda or calcium carbonate to spread on you farm---this fucking pisses me off they did this there the amish are going to get fucked the animals and the fish--same----if you got 5 gallon jugs dissolve some magnesium and liquify the mineral and leave in the jug and fill with water and add a gallon to the main trough of drinking water for the livestock--pigs goats sheep poultry turkeys ducks geese or what ever

use copper and zinc chloride as well as Sulphur (MSM and quercitrin and add bromelain with it---use throughout the day several times a day

drink green tea and thyme teas

have any alcohol if so make a biofilm buster out of by adding thyme and bay leaf or thyme and eucalyptus or thyme ad peppermint---have plenty of black coffee as well add peppermint to it if having a hard time breathing

get cq 10 need you re hear to have support due to the stress you re going to tax it just to get oxygen in the system 60 mg --no shit in it ---straight and plain and take with saturated fat and use hawthorn lea and flower for heart
