Malaysian Examinations Council
Band 5

EXPERIENCE

Acme Tech Company
Software Developer Intern   September 2017 – December 2017

- Learned independently the .NET framework and Google Maps Platform to develop a web application for location marking and geofencing for their E-Haulage Management System.

- Researched on how Power BI can be used to meet a client's business intelligence needs.

RECENT PROJECTS

Online Exam Management System

- Web application made to assist teachers in the examination process.
- Contains features like exam question generation from coursework materials, automated exam paper generation and secure exam sessions.
- Designed with modularity and maintainability in mind.
- Made with Node.js, Express.js, Victor Hugo, MongoDB, HTML, CSS and JavaScript.

Lucky Cat

- JavaScript implementation of the random number generator described in the journal article "True random number generator based on mouse movement and chaotic hash function" by Zhou et al.
- Made using HTML, CSS, JavaScript and features custom hand-drawn SVG art.

Stargazer

- 2D space adventure game for Android created to explore the rendering pipeline and high performance graphics on the Android platform.
- Made with Java and OpenGL ES 2.0

Klondike Solitaire Card Game

- Fun project done to help junior understand C++ concepts.
- Cross platform card game with interactive graphical user interface and audio.
- Made with C++ and the QT application framework.
