## Plot

Minecraft allows you to create your own story through every decision in an environment that is a place where everything, from the ground up to the sun, is shaped as a cube. It is worth noting that Minecraft: Story Mode was an interactive series created from its universe in 2018. In this story, you will start the journey of Jesse and his companions Olivia, Petra, Axel, and Ruben on their quest to find The Order of the Stone, an elite group of heroes who will help them save their world. The film allows you to make real-time decisions, shape the story and make decisions similar to the books.

## Gameplay

Every world is unique. First, you will create a rich world created by the game's procedural algorithm. You'll be able to use maps to show the places you've been to and what you have yet to explore. You will also have access to an inventory of objects. Blocks They are the primary elements of the game. They can be constructed from various materials and possess distinct properties. Some will be translucent while others emit light. Others will not be able to stand on their own. These are used to build and create everything in grids that have to be observed when putting them. They can all be collected and harvested for different purposes.

Explore Build, discover and make progress: As described below There are a variety of ways to go about it and the objectives will change from one to the other. Depending on your preference, you will have to explore the area and interact with different objects. You will also need to gather materials to construct and secure your home. Day and night cycles: Minecraft manages day and night cycles. Each day lasts for 20 minutes. You could be attacked at night in certain game modes. Therefore, it is important to build shelters during the day. Protect and take care of yourself: In addition to protecting yourself from hostile creatures, you will have to feed your character and avoid falling, drowning or getting stuck in one of the world's blocks. Tlauncher There are many ways to personalize your experience.

## Sound and graphics

Minecraft's graphics style is very unique. The entire game is made of cubes inside a 3D world. Although it might look similar to retro games the style is more contemporary and elegant. You can choose your graphics settings based upon the performance of your graphics card such as Fast, detailed, or Fantastic. You can also tweak the whole game aesthetics using mods such as OptiFine. Last but not least, Minecraft has a beautiful OST with responsive audio feedback.

## Game modes and game duration

Minecraft is an open-world sandbox that you can switch from the first to the third-person perspective camera. You can play the game solo or in a group with either a local or remote connection. It's a fantastic game that you can play for hours. Different game modes are also available:

**Survival Mode** It is the primary mode. Players will need to create a safe area to guard themselves from creatures lurking at night. **Creative Mode:** This mode is best for new players since you won't be harmed and can roam around the map without restriction in terms of resources. You can also explore the map's mechanics without any issues. This is basically the god mode. **Adventure Mode** is the most popular mode. In Adventure mode you will be able to access maps of other players, you will not be able build or destroy, however you will be able to interact with different objects. **Extreme Mode** Extreme Mode is the most difficult version of Survival Mode. Here you only have one life and the creatures are more violent and can do more harm. You'll lose everything you own if die. This mode is intended for experienced players.

In addition to the Java Edition (the original) We also offer Minecraft Dungeons, Minecraft: Education Edition and Minecraft Earth. Not to add the many mods that have been created by the community.

## What does the review say?

Minecraft is one of the most played and acclaimed titles of the last decade. It has been rated by Metacritic which is a review website that aggregates reviews, at 93/100.

"Minecraft is less of an actual game, but rather a huge toy box where everyone can make their own experiences. Minecraft is one of the most important creations in video games, and its influence will lead to new and exciting ways of perceiving digital worlds and their potential."(GameOver.gr)

## Age rating

Minecraft is classified as PEGI 7. If an enemy is defeated, it will be broken into cubes before completely disappearing. There isn't any explicit violence nor foul language. The only thing that may be disturbing for children is that some of the characters they'll encounter may be a bit scary (spiders and zombies, monsters, etc. ).
