

# Minecraft Server Hosting

I had a very good experience with Ian D. He helped me get the stuff I needed working on my server and was very good with communication. Thanks!

Excellent response time every time. Any issues we've had they've been resolved within a few minutes. No matter if you have simple questions about your game, or more complex questions about the server, they will be answered promptly. Server runs smoothly

This server offers the best support out of all the servers that I have used. Excellent support, very prompt and accurate. The servers are very easy to access and work well. It is well worth a try if your goal is to find a small or medium-sized server.

HostHavoc is my favorite server host. Another forum Their support is superb. They are kind and reply back quickly. I have never had a problem with their servers - except for something I did wrong and they were more than happy to help!
