

# Marc tacchi what is e-mail?

Marc Tacchi Electronic mail, also known as e-mail, is a network service that allows you to send and receive messages with multiple recipients or recipients, located anywhere in the world.

Marc Tacchi To use this service you need any of the email programs offered by the network. In an email message, in addition to written text, you can include files such as documents, images, music, video files, etc.

The ease of use, speed and the low cost of the transmission of information have made that most of the institutions and individuals have the electronic mail as their main means of communication.

In this way, it was possible to move from the first place of communication media to traditional correspondence, the telephone and the fax.

Marc tacchi As mentioned previously, it is a series of electronic messages that can be sent and received practically instantaneously through the various web mechanisms (call it an email account directly), either for work, educational, commercial or simply uses. personal.

It is not difficult to talk about what an email is, but it is necessary to make special mention of its origins and, obviously, its evolution, thus remembering that, in the past, messages were sent through postal mail. At this point, you have to get a clear idea that email represents evolution.
