

**ROTHSCHILD
WINERY**

WHITEPAPER

ABOUT

Welcome to the **Rothschild Winery.**

We are the same Team behind Ruby Mine, one of the most successful Beans forks with a peak of close to 2 Million TVL.

We have learned a lot from the obstacles in Ruby Mine and other similar protocols and are happy to introduce the ultimately improved **Rothschild Winery.**

COMMUNITY

Rothschild Winery is 100%
community-driven.

Rothschild Winery will have a
2% wallet for Ruby Miners
who have not recovered at
least 40% of their initial
deposit.

The community will have
control over the 2%
hardcoded wallet via polls.

RETURN

Up to **8% daily** return.

We integrated a function to increase or decrease daily returns.

Important note: As in every miner protocol, we do not have control over the in-built inflation algorithm. The 8% will only apply as long as the contract balance is growing.

FEEES

**Total of 5% Fees on deposit
and withdrawal.**

1% Dev

1% Dev

1% Marketing

2% Ruby OG's

REFERRAL

5% Referral rewards on deposit.

We integrated a function to increase or decrease the referral rewards.

We removed the referral on compound feature from previous miners, which led to massive contract draining.

Referral rewards go straight to your wallet.

IMPROVEMENTS & SUSTAINABILITY

**Rothschild Winery Team will
inject & burn funds pre-
launch to avoid contract
draining by YouTubers/bots
and early investors.**

**99% Tax for early
withdrawals (goes back into
contract)**

**Removed the referral on
compound feature**

IMPROVEMENTS & SUSTAINABILITY

48 hours compound timer

**7 times mandatory
compound**

**This means that you
compound every 2 days
(instead of 1 day) and take
profits on day 15.**

Sell of wine is not mandatory.
