

## Humanitarian Projects (for printing)

October 12, 2016

This is a listing of all the Humanitarian Projects (HP) which have been posted on the Dinar Chronicles website (I tried to capture all of them, but there are more coming in...I will try to keep updating it). It was my thought that, if anyone was like me, they might want to print out various HP posts, or even all of them. So, I have just transferred all of the HP posts, into a Word document.

Each post, has its own page, now. So, you can easily print out whichever posts you desire. You can also save the whole document (or cut and paste just the projects you want), then open it in Word, and edit it, in whatever way you want. This document is completely open source.

Personally, I am going to print out all of them...one can never have too many ideas on how to assist others! I hope it helps! Blessings to All! May we all go forth and spread the Love! Jan.

**Humanitarian Project Ideas for October 11, 2016**

***Entry Submitted Anonymously at 1:42 PM EDT on October 11, 2016***

I want to renovate and repair small rural churches at no cost to the churches.

***Entry Submitted Anonymously at 1:49 PM EDT on October 11, 2016***

an oprhanage or home for children add bldgs on expand an dbuy them enough of their supplies for several years

***Entry Submitted Anonymously at 2:08 PM EDT on October 11, 2016***

One of my ideas is to provide the funds, which is in the billions, to complete a section of interstate highway that has been planned for a long time. It goes through my community and state and would certainly help bring a lot of business here along with jobs!

A Chosen One

***Entry Submitted Anonymously at 2:30 PM EDT on October 11, 2016***

This is more like it, sending out positive thoughts.

I want to fix and update ac/heating systems. Replace old washers and dryers with new ones. Pay utility bills off  
Increase distribution and add new items at the food banks

The list goes on.

***Entry Submitted Anonymously at 2:32 PM EDT on October 11, 2016***

And thank you again for your presence in our life!

One of my projects is to distribute to all the children of the world, a cookie which is a complete meal so that no children ever go hungry again. It will be called LIFE !

***Entry Submitted Anonymously at 2:47 PM EDT on October 11, 2016***

Some of the projects on my list of projects are:

1. Enable people to grow their own healthy organic food by funding construction and setup of greenhouses together with the equipment for hydroponic or aquaponic systems;
2. Build big greenhouses for large scale production of organic vegetables and fruits;
3. Repair, update, remodel homes for people that cannot otherwise afford to do so;
4. get rid of lots of old vacant dilapidated homes - refurbish or replace;
5. Pay good wages to people to assist elderly, handicapped, or otherwise incapacitated persons with cleaning, cooking, running errands, paying bills, mowing, yard cleanup, etc

I have read about hemp-crete being used for building. It is clean, breathable, no lime, and saves our trees.

***Entry Submitted Anonymously at 2:48 PM EDT on October 11, 2016***

My project would locate single parent families who are homeless are living in substandard dwellings. I would provide or refurbish homes they currently live in to above standard dwellings for the families free of charge I would also pay for training or education to the parents so they will be able to support their families in the future.

***Entry Submitted Anonymously at 2:48 PM EDT on October 11, 2016***

My ideas for Humanitarian Projects are:

In Rhode Island, we have the worst roads and bridges in the nation. I think we are ranked 50 out of the 50 states. We are facing having all of our bridges (i.e. overpasses) tolled in order to generate money for fixing our roads and bridges. The government says they will only toll the "big trucks" because "they cause the damage". However, we all know that as soon as the revenue drops from these taxes (I mean, tolls) or a judge rules it unconstitutional, they will toll cars as well, including small business vehicles. I plan to just pay for fixing all the roads and bridges in the state.

I also want to pay for all septic systems to be brought up to code. We have a lot of wetlands in Rhode Island and we don't want septic systems to cause further damage to our waters.

I LOVE the ideas of Free Cars, Free public transportation, and eat out FREE at restaurants. I'll add to that FREE Farmer's Market day. Your idea made me realize that I could organize this gift with the providers to help all people, instead of trying to find the individuals who need the money. Going to do that in RI as well.

Pay deductibles for all "middle class" people who don't qualify for free Obamacare but who have a difficult time paying premiums and who usually have a high deductible.

Another person posted about setting up a Family Office to help individuals. My thought here is to help those who come to our church's non-food pantry and try to help them with any expenses they have for the month that would be causing them to come that day. It might be rent, medical bills, veterinary care, food, etc. I'll see if they would like any financial assistance to help get their lives back on track. If that works, then I can expand the program to reach all those who go to food pantries, homeless shelters, etc.

Another thought is to fund the public pension funds in RI. There are thousands of state teachers and other employees who have been mandated to contribute to their pension, but recently have been screwed by our state government, who had to reduce the amount they will get and how soon they get it because the accounts are unfunded.

Outside of RI, I was thinking of helping to retrieve and recycle the floating island of plastic garbage in the Pacific Ocean. I have no idea how a single person would even start something like that. I assume the angels will guide those I need to meet into my life, just as they have been doing all along.

-Also One Who Believes

***Entry Submitted Anonymously at 3:09 PM EDT on October 11, 2016***

Band together (strength in numbers!), buy the Monsanto-Bayer Corp. (generous hostile takeover if needed...) and close divisions -- ELIMINATING GMO's, RoundUp/glysophate, and aspartame/Splenda, etc. from the planet. Forever.

1. set up a fund to pay folks for their time witnessing/attending any and all government-related meetings
2. free educations for prison guards and prisoners, via a computer room hooked up to various schools and universities, free yoga and meditation as well, of course
3. subsidize vegetarian-only menus in all institutions
4. pay food trucks to pass it out for free in poverty-stricken areas, and/or retrofit themselves to distribute from food banks
5. guarantee a yearly income for all organic and bio-farmers, based on acreage
6. set up exchange centers for repurposing items destined for the wastebasket, place next to community landfills and transfer stations
7. help to promote copper-clad farming and home garden tools

***Entry Submitted Anonymously at 3:12 PM EDT on October 11, 2016***

PROJECT - CREATE AN INTERNATIONAL MEDIA BLITZ TO SAVE THE KOREAN DOGS AND CATS FROM THE HORROR OF THE DOG/CAT MEAT INDUSTRY. SUPPORT OUR DEAR SISTER KIM BY SENDING SIGNIFICANT DONATIONS TO CREATE MORE SHELTERS/SANCTUARYS AND LOVING HUMANS TO HELP THESE INNOCENT CREATURES TO FEEL SAFE, LOVED AND TO TRUST HUMANS.

*Entry Submitted by Tasha Pup at 3:23 PM EDT on October 11, 2016*

First, may I say that I am loving reading all these wonderful ideas for HPs (Humanitarian Projects)!! It is awesome to finally see "us", the "wanna be humanitarians", come out of our closets, and speak up! I realize that I have been hesitant to do so, on any of these Dinar websites, probably having to do with my own lack of self-esteem.

But I am here now, as are all of us, who are patiently waiting for our "blessing", so we can then act on, all of these wonderful ideas! You know, when I get frustrated with the waiting, I go to my "Abundance List"...and keep thinking of new ways to help others, and add to the List. I have since created an "Addendum", because of all the ideas which keep being suggested, or I think of myself.

I also want to do a shout out, and say "kudos!" to those who have posted either positive thoughts, and/or HP ideas...(I apologize if I left anyone out...it is not intentional)....to One Who Believes, CV, Ag Man, Soaring Dove, Buckshot Willy, EthericBlue, CapnGriff, Eponymous, Suite11eleven, several "Anonymous" posters, and our very own Veritas and Yosef!!

So...my ideas are these...

1) As others have said, I feel if we can first address the "needs" of local residents (the town where I live, as an example), then hopefully, they will feel liberated enough, to begin doing what they are passionate about, living out their life path! So first, I want to pay off all the mortgages (and rents) for the whole town. Where I live there are 15,000 people...so I figure it would be about \$3.7 Billion, to do so, but well worth it, in my opinion. I am hoping that, when it happens, the residents will feel like they got a huge "raise", and then will be energized to do more compassionate, fun and innovative things, with their "raise". My ultimate hope is that, after addressing the needs (paying the mortgage is just one idea...many others will be begun, also), then we, as a community, can really become our "true selves", and create and imagine, like never before! And, then the community will have more energy to care for each other, and get involved in our new governmental system, from the grass roots perspective. Hopefully, this new way of doing and caring, will then expand outward, into other towns, cities, and states.

2) Another local idea...is to put ads out to "call all dreamers!" Anyone who has ever had a passionate idea, that they have been unable to fulfill, we will fund it, for them (as long as it is good for all).

3) Someone else mentioned converting to hemp...well, I live in an agricultural, farm, ranch land, area...and I would love to help fund any farmer or rancher who is willing to

convert to growing hemp...because, as the other person said, it has a multitude of uses! In fact, it was grown and used a long time ago, then the Cabal made hemp "illegal", because it was cutting into their oil money.

4) As someone else also mentioned...building and creating holistic healing centers...with the latest technologies...including light, color, and sound, healing technologies!

5) As I was working on myself to "act as if" I were Abundant, I realized there were certain areas where the biggest stressors fell away...such as being able to buy all organic food, and all the supplements for my better health. So, I want to create an agency who will fund all people who have been unable to meet their "needs". I am thinking medical bills, prescriptions, food, housing, clothing...any dire, "just to get me over this hump" situations. I think this is the biggest stressor, in my opinion.

6) Convert the local water supply to "structured" water. That is a biggie, in my opinion.

7) Last, is to buy up the debt, of all residents...credit card, I already mentioned mortgages...any kind of debt...another big stressor!

Well, thank you all for listening. I know some of these duplicate some other's ideas, but I thought they might be worth repeating. Love to all of you...I am very excited to begin this new and wonderful journey! Maybe we will meet each other along the way! Blessings, All...Tasha Pup.

***Entry Submitted Anonymously at 3:53 PM EDT on October 11, 2016***

With gratitude! I plan to assist veterans with healthy eating and brain rehabilitation using light and frequency technologies and a radical thing called "vegetables". ;-) I want to fund the purchase of conventional farmland to be converted to grazing land to sequester carbon and offset climate change; train people (veterans too) to be organic farmers and place them in jobs with abundant resources to grow healthy food for all of humanity; fund the purchase of "rust belt" factories to create urban aquafarms using solar and healthy water; free energy, solar, water systems; fund the incentives and educational transition for medical doctors to adopt functional medicine and create functional integrative clinics in all medical centers; fund lab testing for all who need testing; teach basic nutrition and cooking in neighborhoods; support community gardening; provide healthy (unprocessed) meals for all, so humanity can feel the love and nourishment we were designed to experience! So be it!

***Entry Submitted Anonymously at 4:16 PM EDT on October 11, 2016***

I adore the idea of sharing our HP plans! The reality of being a full time Philanthropist AND sharing this wealth in the correct manner is a very serious subject. To whom much is given, much is required.

In my opinion, Nesara and Gesara will be implemented and the monies will be dispersed as fast as possible, but how much time will that take? I urge you all to implement a "911 Humanitarian Program" to ease the immediate suffering of those that lack the essentials such as food, housing and clothing. I currently reside in Las Vegas, Nevada where the homeless population is 10,000. What if a team of Zim holders chose cities and hired a team of professionals to purchase the necessary amount of empty dwellings for sale and move the homeless off the streets? Clean out every family owned furniture , home and grocery store in the city to stock these homes! This can be done in every major city! GLOBALLY! WE GOT THIS!

Simultaneously, other teams can implement the new technology to clean the air, water and soil.

This idea just covers the basics, The "911 HP!"

I am honored to be given this task. Let's GO NOW!!

Vivre le Reve

***Entry Submitted by Leenish at 4:38 PM EDT on October 11, 2016***

For as long as I can remember, since I was a small child, I have wanted to help our animal friends. I've been wanting to start a rescue farm for those in need, and provide free veterinary services for people who can't afford proper care for their beloved pets. The last few years, I've thought that if I ever had the money, I would also build apartments on my farm to house any homeless folks willing to help me with the daily needs of the farm.

Now that I know about (and am in possession of) ZIM notes, the plan has expanded greatly! I would not only start my own farm(s), but I would be able to financially assist already established rescue farms all over the world! I would love to see all kill shelters shut down, and all beings in any type of shelter have homes where they are as loved and free as they deserve to be.

I feel that by doing this, I could provide homes and jobs for many homeless/low income people, as well as serving our animal friends that so often get left behind. A lifelong dream about to come to fruition? I think maybe so!

Many thanks to God/Creator for giving me this opportunity. My heart is overflowing with joy and anticipation! Namaste everyone!!

In love and light,

Leenish

Job Creation/Education:

1) One of my projects is to build a foundation for Single Mothers that don't have a high school Diploma! In the building will be a Full time Daycare for Toddlers for the Mothers that are enrolled in the class!

2) Open a daycare center with affordable prices with field Trips and regular agendas to prepare them for their future !

***Entry Submitted Anonymously at 4:39 PM EDT on October 11, 2016***

- 1} Make a generous donation to my church to help with missionary work both here and abroad.
- 2} feed the children, my hart breaks when I see starving children.
- 3} make a donation to the wounded warrior project.
- 4} UNICEF, United Nations Children's Fund.
- 5} Doctors without Borders.
- 6} World Wildlife Fund
- 7} National Wildlife Federation
- 8} Mission Blue – protect health and productivity of the ocean
- 9} Water.org Safe Water and sanitation solutions – freedom from women and children hauling water
- 10} Aid the farmers and ranchers; provide more efficient practices and more humane treatment.
- 11} Business that provides basic survival packages, self efficiency literature and programs, stores for items to become self sufficient
- 12} Getting America off the power grid – solar to unplug and freedom from dependency
- 13} I also would like to provide jobs for ex-military and Felons.

These people seem to have the hardest time to find jobs, the way I would want to do this is through agriculture, building a dairy farm would be a good first start, I see this as a good first pilot project, these jobs require several different types of professions from grounds keepings to carpentry to plumbing, manual labor and all of these jobs would be a beginning place, Braums is a good example, it's possible that housing would have to be provided but it would get people off the streets and put a roof over their head, give them a reason to get up in the morning and teach them a trade that might help the find employment elsewhere or stay with the company, of course every felon would have to be vetted through the probation and for the military people the VA and these jobs would

not be limited just to those groups if started in smaller communities and towns where people may have to drive 20 to 30 miles one way to work or job opportunities are very limited. This would also help the rural areas and maybe get people started back farming and ranching again, I know every time I go back down where I used to live farms are very few and good pasture land and fields are grown up and not maintained, this could be a good jump start to get these areas back to farming and ranching if there is a market where they could get a fair price for their goods, also I have no interest in becoming a land baron let them farm and ranch their own land or possible lease because the stock is like everything else they have to eat. Somewhere down the road start a processing plant, I would want to be able to train the people to utilize every part of the animal where there be minimal waste, I see where these could grow into a job that would offer a 401K, health insurance. This would relieve some of the financial burdens on the County, State and Federal governments by taking people off the streets and making them taxpaying citizens, also this project could grow to each county and state across the US that would provide good holistic food products at and the smaller family farm may start playing a bigger part of the economy by starting a local Farmers Market where people could sell or trade the produce and products they had grown or made themselves.

15} Fund and build affordable housing and provide medical help for seniors citizens, veterans, and low income families.

***Entry Submitted Anonymously at 5:00 PM EDT on October 11, 2016***

I am a firm advocate of the elderly. Especially those who have been left alone without resources for their own care and livelihood.

Older women who have not learned to fend for themselves suffer the most. I would make sure they were financially taken care of. Have their bills paid, homes paid for and secure, healthy food and vitamin supplies provided for the rest of their lives.

Depression and futility is a major DIS—EASE that occurs when one has no hope for a better, healthier life. I have a person in mind and plan to start with my own family.

2. Veterans suffer from post traumatic syndrome. I plan to set up a fund that would assist them financially and also with psychological treatments, FREE of CHARGE. so they can re-enter the mainstream of life instead of taking their own lives!

3. As for the wildlife and the animal population, I would fund organizations that use their money to help take care of and place animals that have been abused and abandoned. Having my own animals, I know how costly it is to take good care of them. They give us so much unconditional love and attention. Rather than see them destroyed, I would fund no-kill facilities and provide excellent wages to those caring for them. Healthy food and clean facilities are imperative...& require funding. I will provide the funding necessary, starting with local shelters and wildlife habitats.

4. There are so many humans suffering from Cancer, autoimmune diseases, Lyme and tick borne maladies, all caused by the greed of Big Business and Lobbyists who do not care about humanity except for their own gains. There are Holistic approaches to cure the incurable yet most can not afford the High Cost of these remedies. There is no reason why should limit cures only to the Wealthy. All people should be able to live healthy, productive lives. I know a friend who had to declare bankruptcy to pay for treatments and is still suffering from residual effects of Lyme.

This is not to be tolerated. When I have the means, I will help fund more affordable or even FREE treatments.

Even trying to keep myself healthy is very costly and I struggle financially to keep up. I am so grateful for the upcoming Blessings for us all to help ourselves and each other.

More to come!

In Love and Gratitude! A Faithful Servant

***Entry Submitted by Shannon at 5:32 PM EDT on October 11, 2016***

Animals – land, air, and water. The other species with whom we share this planet, over which humans have assumed domination, control, exploitation and horrendous abuse – torture, imprisonment, neglect, and murder, of them. My intention is to network with other organizations and individuals to remedy the current situation, so these species can now live in freedom and thrive on this planet. That will involve rescues, medical treatment, therapy, caretakers, transportation (very carefully) to new homes created as sanctuaries.

Thank you!

Shannon

High schools with FFA Clubs ( Future Farmers of America ) can find farms in need of extra help , then the students can learn firsthand , earn money paid by the trust , and increase the farmers product at the same time.

***Entry Submitted Anonymously at 5:48 PM EDT on October 11, 2016***

The problem has always been corrupt legislation. Once we do away with all the lies, the truth will set us free! Fossil Fuel pollutes Hemp regenerates! Hemp Plastic decomposes in months not centuries! Enzymes created in the roots of Marijuana heals and nourishes soils. Cannabidiol pre-exists within the the immune systems of Humans and heals the body of many of the manufactured diseases that exist in the world today. I could go on and on, but the bottom line is we must get the old line of Cronyism out of our State and Federal governing bodies.

finally some people wanting to organize. if we don't I am sure we will be stepping on each others toes. I'm sure most of us want to put an end to homelessness in the republic, if we aren't organized we will surely waste a lot of money. my thoughts are to buy and rebuild old rundown houses putting people to work, but that doesn't solve the immediate problem they need shelter now. so I was trying to figure out what to do and what I think might be the answer is to buy motels, hotels with restaurants to keep them warm and fed while being transitioned into their new home. and yes we can just buy new homes to and that is good keeping in mind that they will also need a car [possible EV conversion], furniture, clothing and money in the bank to get going again. personally I cant bare the thought of children sleeping on the streets. all consideration must given to this crisis first. so, a few thoughts, does anyone feel like jumping on the band wagon?

yes great start everyone. the key word here is going to be organization. about downing is going to hear feed and shelter the homeless a million times. which is good, good hearts, but if we could get organized we could have this done in a sweep a week after we are hydrated. and move on to the next beautiful project. some thoughts: we cant buy Monsanto, Baer, Dupont, Phipper, or any of these cabal organizations it would be putting the money in their hands. holistic hospitals is a great idea maybe with housing and security for the doctors, perhaps one in every state. maybe we should get our ideas down and everybody take a state [2 or 3 for California] same for texas perhaps by per [capita.be](http://capita.be) careful giving to charities we all know the canton foundation and the red cross stole the money from the Haitian people, it might be wise to go straight to the charity don't do it through a third party.

***Entry Submitted Anonymously at 6:33 PM EDT on October 11, 2016***

---Since new homes for the homeless will likely take several months to complete, I was thinking of shipping large amounts of supplies to homeless shelters that can go around and distribute (such as care packages of basic hygiene items, transit tickets, grocery store gift cards, running shoes, large backpack, bicycles, and mini bicycle campers for portable shelter until the newly built housing is ready for them. However, the organizing and importing aspects of this would require a large team of experienced people.

---I started my own business last year for the first time ever, and I can't believe how quickly I spent my business loan of \$70,000. So I can relate to how expensive and difficult new businesses are to get off the ground. Therefore, I'm thinking that it would be a great advantage for all small business owners to be able to receive a free \$100,000 business grant. Free and not to be paid back. For everyone worldwide who either has a current business or a great future business idea.

---Since deforestation has been negatively affecting our entire planet and atmosphere in so many ways, it would be great to hire millions of tree planters for every town, city, and nation, and pay them twice the previous rate (since it's very difficult work). This could provide millions of jobs for several years and help to rehabilitate the earth as well.

---Free housing complexes, or condos for those that are sixty years old or older. These units would not be owned or rented. But lent out to whoever needs them. They could be built like villages complete with theaters, shopping, banking, etc. This could be worldwide.

---Employment agencies that send free help to senior citizens. This could be part time casual work for high school students and college students. Whether the senior citizens need deliveries, or rides, or massage therapy, or help with fixing items, cooking dinner, computer lessons, private language lessons, or even simply an hour of companionship.

---Regular crowd funding. We could all take turns funding everyone on Kickstarter, Indiegogo, and Gofundme.

***Entry Submitted by Karolann Hoeltzle at 6:39 PM EDT on October 11, 2016***

I have several ideas, this is the latest...Hire workers who will answer calls as "Homefront Clean-Up" service technicians. Hire property opportunity investigators, and an office manager to do the intake and dispatch documentation. There are many ways to help people clean up unwanted and unsightly home front debris, but who do not have the ability or resources to get it done. "Homefront Clean-Up" will be able to come to the rescue. The opportunity investigators will be able to travel, identify potential avenues for service, introduce the services that the community based company will provide free of charge. it can become a win win situation for the client and the community. There will be several technician teams trained to provide courteous and rewarding services for any size clean-up. Dumpster services will be contracted from local trash haulers. "Homefront Clean-Up" will have it's own trucks and rent or own its' own equipment. The clean-up opportunities are too numerous to mention in our PA northwestern location. I would like to see this business become well known and grow into other communities where additional jobs will be made available, and additional communities begin to become brighter. ### **Early 80's**

I was a victim of the farm crisis in the 80's, in the state of Mo. My wants , with the help of all banks, all city halls, all the court houses n the help of all agriculture resources, to locate all the families that had lost there farms, due to the farm crisis, to give each head of the original surviving family's between 500,000 to 1 million with a thought out plan, for them to help all the immediate family members, of which their parents or grand parents were taken their life n hard work, away from them because of high interest rates ( 18-20 per cent) . I know a personal friend in Henry County , Mo. that took his life, because of losing his pig operation on the farm, felt destroyed, betrayed by banks and/ or GOVERNMENT. I would appreciate any n all advice, to accomplish this, (My wants), to help million of families, recognize the fact that there parents n grand parents, were hard working, not foregotten important people that gave their wants, to their children n grand children.

The Mothers n Grand mothers worked their gardens, canning food, for their families, to live though the winter, They are the original organic farmers. Unless you have been brought up on a family farm, this probably does not mean anything to you, just remember, the nx time you go grocery shopping, some where, some body, had to grow the products you are enjoying now, at dinner time. Thanks

I want to donate to The Humanitarian Project They work with third world countries bringing health and nutrition. They also are working on a cure for cancer and reseeded our crops with real fruit and vegetables(back to non gmo seeds)

I also want to set up a farm for run away teens and children to have a safe loving place to come to when their families do not take care of them.

***Entry Submitted Anonymously at 7:46 PM EDT on October 11, 2016***

#1 is to go hospitals and doctors offices that do their own surgical outpatient surgeries and set up a plan so that people who are not insured can get quality care and rehab for emergencies

No matter who they are

I just had a recent experience where I had a very serious accident and found I was not insured because it was now considered an outpatient surgery  
Hospital wanted 8,000 dollars before they would do the surgery  
I was fortunate enough that I qualified for the charity that was available

But I never want anyone to have to be concerned about how they are going to get the quality care with top specialists that they need

#2 A positive living environment which includes but not exclusive to: Housing, education, babysitting, support along with other needs for single parents trying to get ahead. Also programs to include helping those who have lost hope that they could ever have a quality life.

#3. Heroin addiction is rampant here in the US. Yet finding a quality healing center that actually addresses the addiction problem and. Cures it is non existent here in America because every one of them have been forced out of the US.

I I plan to bring them back and until that happens pay to have the patients sent to the best place I know of where they are treated like a true patient and cured. And also not just cured but taught how to live a healthy productive life.

Once cured and ready to leave the facility, then they are offered education or training to lead a productive life.

***Entry Submitted Anonymously at 7:56 PM EDT on October 11, 2016***

I live through Katrina, but it took our city years to get close to being the same. I want to assist people who have no flood insurance to rebuild their homes. The government never gives you enough to get it right. Also control the cash to contractors. Many were robbed of their funds by bad contractors who took the money and never did the repairs. This will be in Louisiana with the recent floods in areas that never flooded before and in the Carolina area where the rivers are overflowing from the hurricane.

Operation Smiles - I will donate to these wonder medical people who go world wide in fixing children with clap lips who are made fun of because their parents cannot afford operations for their children.

Habitat for Humanity - rebuilds homes all over the country for low income people. The labor is free but they need funds for the materials.

St Jude Children's Cancer Hospital - donate because they do not charge anything for their services including the parents who stay with their children while are treated.

Get a list of home owners who are in foreclosure and will loose their homes. I will pay their mortgages in full so they can keep their homes.

Work with the utility companies who are ready to shut the lights off because people cannot afford their bills.

Donate to food banks like Catholic Charities and Second Harvest for free food for the community.

It is hard to wait and be patient to get started. I have lived through hard times in my younger life and want to help people as much as I can. Go RV!!!

I want to build and set up free dental center for pediatric to senior citizens, to receive free dental care. The clinic will have it's own lab and make dental crowns, bridges, dentures, caps, etc. Dental implants are a priority consideration because better than dentures, but have holistic dentist to do the implants so that no nerve or body organ is affected by implants being installed to create organ symptoms later on.

Also donate to Schreiner's hospital where they treat children absolutely free. I was a nurse and often suggested to parents with very sick children to check this hospital out. each time the results were wonderful and the parents received free housing and meals.

We have a 4 year old grandson with Autism. Do to the lack of money and poor coverage from Medicad he has received almost no help. We , with our Zim, are going to provide physical, speech, and occupational therapy for under privileged autistic children that is so critical in their early years. We also want to provide service dogs to these children. This is our main goal. Other projects include supporting a poor orphanage in Nicaragua. Also, setting up help for foster children that are kicked out of the system at 18. We would provide living expenses while we pay for vocational school.

***Entry Submitted Anonymously at 8:48 PM EDT on October 11, 2016***

1. I want to give first responders a raise.
2. I want to be a private investor to other humanitarian projects especially the ones in third world countries.
3. Help veterans the best i can financially.
4. The best one is bless my parents financially because i know they will help other people that i don't know.

***Entry Submitted Anonymously at 8:58 PM EDT on October 11, 2016***

We are also in the final stages of development of hydroponic and aquaponics food growing, which is the growing of fruit, vegetables, and fish in completely controlled environment. However, we will be using only green energy, most likely solar and geothermal power, and we will be recycling and filtering our water supply so that the program will only use about 10% of the water that normal plants use. We have existing negotiated contracts, as well as interest from other parts of the world. These facilities can be built anywhere there is a water supply, regardless of the quality of the water, or the availability of power grids. Our project encompasses the three things that are truly humanitarian, food, green energy, and job creation! If anyone has interest in further info, we would enjoy the conversation!

***Entry Submitted by KPL Foundation Trust at 8:58 PM EDT on October 11, 2016***

I want to contact St Jude hospital in Memphis and tell them I want to fund the hospital cost of operations every year. Then I want to ask them for a list of patients that need help in housing and I will build them a house to live in free of charge. Then I have a foundation plan to build houses and find struggling young families and put them in those houses. They will have to pay a payment to an account in which they will work with money advisers to invest and be shown how to save for their family future. There are so many young kids that get out of school start having children and can't and or have never been taught how to save. This program will help them with that. After 5 to 10 years living there making that payment they will be able to put the down payment on a brand new home that I will build for them and the great thing is when I get done building the home of their dream it is paid for. God is good all the time. They will not know that last part will happen. That is what they get for working hard and saving for 5 to 10 years.

Housing for single parent households.  
New furnishings.  
Automobile + insurance  
Medical & dental insurance  
Education for parent.  
Trust fund put in place for children for education.  
Childcare for after school with qualified tutors.  
All food & utilities paid as long as parent in school.  
Bank account.

Repair or replace housing for elderly.  
Sitters, house cleaners. Drivers for appointments, shopping.  
Bank account.

This to start in my neighborhoods, then Counties, then my states. Plural because we live in 2 states.

Our Church supports mission projects in New Mexico for Navajo Indians.  
Housing. Church's. Medical facilities, Also schools.

Supply funds for existing projects for schools & churches & medical facilities in Honduras.  
Bank account.

Roads & Bridges need repairing or replacing in counties.

Historical Buildings need refurbishment in county.

Cancer treatment centers so patients won't have to travel so far. Free treatments.  
Family facilities near by. Free also.

Pay all County debts.

This is only a start.  
I am ready to begin.

## **Humanitarian Project Ideas for October 12, 2016**

***Entry Submitted by GJB at 12:10 AM EDT on October 12, 2016***

Just have to say what a massive buzz i am getting from everyone on here, positive, love and working together.

Thats what this is all about.

Here are a few project ideas i would like to share, and would love to work with you all to achieve all of our projects globally.

## **Eliminate Poverty and Homelessness (Global)**

1. Build 2m new social properties in each country (owned by trust, low rent or free) Modular and prefab homes can be built in weeks.

\* Cub ( [Cubhousingsolutions.com](http://Cubhousingsolutions.com))

\* Eco Space ( [Ecospacestudios.com](http://Ecospacestudios.com))

\* Affresol ( [Affresol.com](http://Affresol.com))

\* Eco Hab ( [Ecohab.co.uk](http://Ecohab.co.uk))

2. Purchase and renovate old properties.

3. Fund and work with humanity Charities (programs & their projects)

4. Install Solar Power to all social house and those under 70K earning (joint)

5. Fund food banks and build or takeover big food stores selling healthy foods at cost price.

6. Invest in new/small business, entrepreneurs, failing companies, inventors.

7. Build and fund schools

## **Healthcare & social support**

1. Fund and work with charities that provide support children/people with disabilities, fit equipment and adaptations to their homes.

2. Build new facilities that support new specialized equipment for rare illnesses.

3. Employ more consultants and doctors.

4. Fund transportation for those that require treatment in other countries.

5. More funding for amputees.

6. Compensate families caring for their family members that are elderly and disabled.

7. Fund building work to their homes to accommodate families with disabilities and elderly.

8. Supply more mobility mini buses (free charge)

## **Renewable energies**

Invest heavily in free energies for all

Hydro-Power, tilde and wave power, Advanced Solar power,

Love, light and peace

GJB

- 1) Set up permaculture projects on land that has been destroyed by bad management starting in the US then branching out around the world along with a school for training home to run them in the most efficient ways.
- 2) Set up schools for children in a way that allows them to think and problem solve. From Pre-School thru 12, and Trade Schools or a collage degree if it is what the child is looking for.
- 3) Get the homes of the elderly and in firmed brought up to present day building code standards and environmentally updated with solar and wind if applicable.

All will be done in a way that will allow the ones involved in these projects to have housing and a living wage.

***Entry Submitted by Keith at 2:57 AM EDT on October 12, 2016***

1 Build new schools that actually allow the teachers to teach kids to be functional members of society and ensure they have the opportunity to choose college prep or vocational training or both while in secondary school, like wood shop, metal shop, vo-ag, auto mechanics and such.

2 Also help several churches build new facilities and provide opportunities for their members to serve their community, region, state, country, and world by supporting them in their efforts.

3. Build a new modern hospital with level 1 trauma center in Gulu Uganda along with clinics in northern Uganda to serve these people.

4. Bring mechanized farming to northern Uganda and build schools and teach the people of Uganda to be self reliant and great providers this is a group of people if they are over ten and lived in northern Uganda as a child probably spent much of their lives in IDP camps for protection against rebel Joseph Kony.

These are just a few of the projects my wife and I would like to do.

Keith

**Entry Submitted Anonymously at 5:39 AM EDT on October 12, 2016**

Im zim holder too, but I don't think majority of holders own right banknote. In my opinion is this one the right one which replaced 100trill.note.

[http://m.ebay.com/sch/i.html?\\_nkw=zimbabwe+500+2009&isNewKw=1&isRefine=true&mfs=GOCLK&acimp=0&sqp=zimbabwe+500+2009&\\_sop=16](http://m.ebay.com/sch/i.html?_nkw=zimbabwe+500+2009&isNewKw=1&isRefine=true&mfs=GOCLK&acimp=0&sqp=zimbabwe+500+2009&_sop=16)

Whats your thought in this?

Also I don't know your thoughts in coming CIPS (beast system) Which will be here just few years, 144k sealed (zim holders which gave up their currencies to mild suffering during beast system when people will be thrown out of their digit.bank accounts-no right to buy and sell-so my help with my notes will be to help stay alive for this innocent people which didn't agree with Cips or was thrown out of this economic system )right before tribulation.

So we know who the 144k are but to what reason God gave them this money?

Also I think that satan which control banking system also CIPS too must allow us to exchange and do not harm us with our intention what will we do with that money.

So my humanitarian intention are to keep people which will be thrown out and will be without dig.accounts to gave them all things necessary for them.

**Entry Submitted by NA at 6:38 AM EDT on October 12, 2016**

Good morning,

I am grateful for all these loving, beautiful and constructive projects. This feeds my own vision.

My projects here are:

1. Build animal shelters that welcome all animal and where the healing services are natural ones (Reiki, acupuncture, flower essences, ...). Help the people to help animals providing one phone number in order to go and take the animal back to the shelter. Employ the volunteers to build a big network and beautiful shelters.
2. Participate on the cleaning of the oceans thanks to the ocean cleanup project ([www.oceancleanup.com](http://www.oceancleanup.com)).
3. Participate on the reforestation of the forests
4. Help finding a house to each homeless person, refugee brother/sister and to provide ecological food and clothes at a free price. Helping each one with a regular support in re-connecting with their own passion.
5. Help feeding and educating and protecting children.
6. Help the farmers that want to adapt ecological processes to the agriculture (training, finances, ..)
7. Promote an universal income
8. Invest on clean energies
9. Participate on the Light workers congress (cf [www.goldenageofgaia.com](http://www.goldenageofgaia.com)) in order to inspire my work with others projects/results/investigations (as in Dinars Community)
10. Promote a school for refugees in order to facilitate their integration (this is already in place in Germany: <http://www.aeworldwide.de/en/> and [https://www.ei-ie.org/en/news/news\\_details/3942](https://www.ei-ie.org/en/news/news_details/3942))
11. Promote a school for children that promote links to their heart, brain, nature. Auto-responsibility and creativity and joy (<http://www.cmontserrat.org/> & <https://www.heartmath.org/programs/child-mental-health/>)

I was thinking about a huge international application where we could summarize our HP according to the purpose and geographic area, with some contact link to go and take information/participation... I don't know ...

Love for each one

NA

***Entry Submitted by Also One Who Believes at 9:22 AM EDT on October 12, 2016***

I would like to see if we can help those who manufacture clothing under deplorable conditions in India, Sri Lanka, Indonesia, and everywhere else. Maybe build new factories? Maybe come up with better machines so they don't have to work so hard? Maybe move some of the manufacturing back to the US so they don't have to work so hard? I am not sure what action would be best, but we can ask them!

Another idea is to finance the small company that invented a little clothes washing machine that does not need electricity. They are initially intending to make sure people in Peru have access to them, but would soon expand to a global market. <http://newatlas.com/giradora-pedail-power-washer/23548/>

***Entry Submitted by Kathy Barkley at 9:51 AM EDT on October 12, 2016***

I would like to have my own Alternative/Holistic Clinic so patients can choose their modality of treatment and healing available to them. I would also like to include the latest technologies for healing such as, Bio Electro Magnetic Energy, Sonar, Plasma Technology. I would also include methods for detoxification and products that support health and wellness and good plant based nutrition, I would name my clinic after my late husband as he was a Stage 3 Colon Cancer survivor using alternative and holistic measures and he remained cancer free at the time of his death. I would like to be able to present new healing technologies to existing clinics and hospitals.

Thank you for giving me the opportunity to express my ideas.

Sincerely,  
Kathy Barkley

Hello , I live in upper scale development in the country . however I am very fortunate for what my wife and I worked for.

However here it goes.

#1 we live near rural mobile home parks and they are some of the oldest mobile homes I have seen. Our plan is to get with either the property owners and replace each mobile home in the park. With that being said I myself being a veteran of desert storm.. I have a want and need to provide new vehicles to the veterans of need.

#2nd also setup a transit service to pick up veterans for their doctor appointments wherever they are. I would get that setup with VA and local veteran offices.

The vehicles they will be riding in will not be the junk vans we see here in columbus some are ok but we will go military themed and setup for client specific. This I would probably start this in our county. And see how it goes.

#3 Go through our small town and give it a facelift and speak with the town municipal for what they need and see how we can improve the infrastructure of the town. Possibly give Wi-Fi cameras etc for the parks and recreation areas for the kids. So us parents can communicate with their devices.

#4 develop campgrounds franchise that are moving along with today's technologies..

And offer free camping to kids of inner city's and work with programs that don't have the chance or means to go camping. Everything will be provided.

#5 our county fire departments could use new equipment . and buildings or more buildings.

Better 911 systems .

Thank you maybe someone else can also use these ideas .. Hooyah!!!!

Hello All,

We truly are blessed, regardless of our outer circumstances, and as such have the power to facilitate mankind's awakening.

I love the ideas expressed here...and the openheartedness and desire to be of service.

Our intention is to create The Centre for Awakening in Canada, a centre dedicated to providing guidance for those who have chosen to awaken.

The Centre, grounded in ACIM principals, is going to be available to All and offer various programs, teachings, guidance and support for those who wish to wake up. Additionally, the centre will support various other Humanitarian projects, particularly national programs that aim to eradicate homelessness, the lack of basic necessities and access to a different level of education that is heart centered.

The Centre is a gathering place with a singular focus on doing Inner Work leading to the experience of ongoing inner Peace.

May we all BE the Change we wish to create in the World.

Sandra xo

- 1, Relaying and resurfacing of dilapidated roads in our locality after planning out the sewerage lines for all resident house holds,
- 2, Community gardens and children parks in our locality
- 3, Creation of meditation centre of modest size to accomodate 300 People at any given time in the shape of pyramids.
- 4, Purchase and allocate farm lands of 3 Acre size to ex defense pensioners to grow food and distribute the farm produce to the humanity.
- 5, Creation of night shelters for the daily wage earners who migrate to cities towns on search of livelihood.
- 6, Creation of lodges for visitors in the city.
- 7, Provisioning of cycles to commuters and encourage people to commute on cycle in every 5km area of responsibility. Thereby dissuade people from motorcars for short distances and help in ease in pollution levels.

***Entry Submitted by Barbara Nantogmah at 1:29 PM EDT on October 12, 2016***

I would love to be involved in developing elementary schools in the northern region of Ghana based on more child centered ideas like Montessori, like schools described in the articles Taught by Finland or like education described in the book The Call to Brilliance by Resa Seinfeld Brown. I would love to develop schools that are child centered and not exam result centered. How I enjoy watching children explore their environment and enjoy the sand hut. They are free, excited and self directed.

What exciting times to be living in.

Barbara Nantogmah

Children are my mission in life and as I help children, their family will benefit.

Here's one

Because of the vaccines new law

My granddaughter can't go to school and her parents can't afford to stay home to educate her and grandparents can't either

So what happen, they now decided to vaccine her at 4 1/2 years of age so she can go to school

This is happening a lot and I plan to fund these families income or pay for private teacher so they don't have to be force in poisoning their children and also will fund education on other option like homeopathic vaccines instead,until this law no longer exist

Will fund school that promote children's gifts and educate in a way that promote shelf confidence and treat every child in their own individuality not like robots being trained to work to fund the cabals plan for mind program to keep them down.

Will start close to home and expand out as far as money permits

***Entry Submitted by JValor at 2:53 PM EDT on October 12, 2016***

Projects are coming out of the woodwork right now, which is wonderful. My focus is 10% charitable donations/assistance to humans, 10% investment in impact technologies which benefit ourselves, animals and our planet, and 80% is focused on horses - large animals who are expensive to take care of and who become easy victims to a sluggish economy. All of these activities, and the many more which will present themselves, will create lots of jobs and opportunities for people to have a purpose.

Under Charitable Donations/Assistance for Humans:

- Annual donations to nonprofits working with veterans. We connected with one organization treating PTSD, and through their referrals, the list of others doing similar work and needing fundings is growing by the day
- Annual donations to nonprofit funding hubs (issue grants to nonprofits) in the region, then expand
- Annual donation to Food for Families (Raley's) and other similar organizations
- National literacy program - paying the companies who teach reading to give the classes for free to needy kids
- Annual Donations to kids with catastrophic illnesses and their families - lifetime commitment
- United Cerebral Palsy for children, teens and adults with disabilities. Autism in our area.
- Support research on using telepathy with autistic kids/adults to improve quality of life for everyone involved
- Support innovative educational programs where children can actually explore and learn in meaningful ways
- Gifts and/or ongoing support to people in distress or who cannot help themselves, such as seniors who cannot work, including providing homes and home maintenance services for them

Under Investing in Impact Technologies for improving our world:

- Invest \$2mm in breast cancer cure which obsoletes mastectomies and dying from breast cancer - biotech startup
- Invest \$5mm in startup manufacturing business producing product that reverses lameness in horses - worldwide
- Invest in sustainable, clean farming and agricultural practices and land cleanup
- Invest in clean water and ocean cleanup
- Invest in clean energy, all types will be of interest
- Invest in new energy medicines - color, sound, energy frequency, etc.
- Invest in joint ventures with like-minded people to manage larger-scale and/or international projects

Under Supporting our Horses:

- Support medical research and new-age energy research for horses (nearly nonexistent now)
- Establish ranch land locations all over the country suitable for horse keeping and/or build out to house horses
- Support existing horse rescues nationally with a professional track record or rescue startups with references
- Provide health care, farriery, nutrition, blankets, etc. for horses of families who love their animals but cannot afford the entire cost of their upkeep (keep horses with their families instead of becoming rescues)
- Provide educational programs for horse management and equipment, such as modern composting technologies
- Support programs which understand the connection between horse and human, such as heart-math
- Support activities for horses and kids, horses and veterans, horses and any group of humans who need healing
- Once the models for horsekeeping locations are working well here, investigate expanding outside the country

As mentioned before, the opportunities for helping and contributing to a better world are just lining up, now that we are close to the RV. It is going to be an amazing experience to be one of the "boots on the ground" directing Divine Abundance wherever it is needed.

***Entry Submitted by Luke at 3:04 PM EDT on October 12, 2016***

Depending on the currencies and amount of dollars you might have available, consider the following:

1. Consider setting up a FOUNDATION that can benefit your fraternal and maternal family members for years or decades to come. For example, depending on your age, start with parents, aunts & uncles, first cousins and each of their children, and their children's children, etc. You can choose an amount to fund on an annual basis....from \$20K or \$50K...or an amount to be determined. The amount would be such that it would "enhance" one's life, not necessarily leave them to be "idle" the remainder of their lives. Emphasize the "gift" aspect, and to be good custodians of the money to not only improve their lives, but also to improve their communities, charities, and focus on projects and goodwill in their cities and towns.
2. Consider the "network" of worthy individuals you might know, or come to know. Call it an "AMBASSADOR of Goodwill" program that might spread across the country, etc. As a "representative/agent of a substantial "TRUST" your job is to identify people who would be dedicated to identifying such people to be active in their communities to "distribute" some of this "trust wealth" to impact their communities. After identifying specific amounts that could be made available each year...say \$10 Million or more...be specific as to what they can do with the money...allowing the individual or couple a % (2%, or so, or some limit on compensation to them)...and have them committed to deploying these monies....and possibly identifying even larger defined projects that one in their communities might make application for specific projects, charities, real estate needs, creation of employment, etc.

Funding for fishing villages, coastal areas in the indigenous places to promote the preservation of natural resources.

***Entry Submitted by Rina at 4:42 PM EDT on October 12, 2016***

Hello m'dear.

First off....great idea giving folks a place to share their dreams of helping.

I 'accidently' ran across a video that now takes up all my planning thoughts. It is just over a minute long.

Oscar Mendez Building Homes for Homeless

This vid led to others, of course, and I found that there is a manufacturer nearby that also makes plastic lumber. Who knew ?! Ideally the "leggo" type that snaps together would be perfect in so many areas, as the home could also be taken apart should one wish to add to, or to move to a different location.

If the Zim amounts are even close to predicted, it would be easy enough to set up factories in various cities....offering jobs....and starter homes....for those willing to work for them.

Am very excited but impatient to get going on some of these projects.

Thanks again for sharing.

Rina

***Entry Submitted Anonymously at 4:53 PM EDT on October 12, 2016***

Hello, A major necessity in the modern world is getting back to basics and planting within reach, a non-GMO variety of home-- grown vegetables and fruits.

The plan is to provide URBAN areas in major cities with a well thought out kit with instructions seeds and tool to make it happen as I said within reach and to share with the needy.

To bring the needed greenery back to the city which will contribute to cleaner air as well as feed wholesome food and create pride in your own accomplishments. So much wasted lawn space that will be put to good use..

Another plan is to build free run enclosed areas for dogs and make available to anyone to bring happiness to their confined loved pets. The joy to a dog that has spent a life inside an apartment will increase positive energy for the pet as well as seeing their owners smile. All facilities will have shelter with nature surrounding as well as pet care information and free necessities for the needy. Park like seating for owners to socialize with like-minded others.

***Entry Submitted by Tom at 7:59 PM EDT on October 12, 2016***

I am a remodeler and love what I do. I look forward to the time when I can do work for those in need, rather than those who can afford what I do.

I am associated with a group of other currency holders that are considering projects to provide housing for those left homeless as a result of US policies, such as Haiti, for starters. We welcome others who share such a desire.

As I read thru some of the other postings, one thing that catches my attention is the notion of installing solar for these fortunate. While I think such an idea is admirable, I am also more than well aware that solar is old technology and should be on its way out. This understanding raises another idea which I and others have, which is supporting those working to bring some of the new technologies forward and start installing them, rather than antiquated solar tech.

I am willing to hear from others with similar ideas and suggestions, but I do not wish to have my contact information posted, as it leaves an open door for spammers to send their unwanted junk. If you are aware of another means of putting people in contact with me, please let me know about it.

Kind regards,  
Tom

## **AFFORDIBLE HOUSING**

My team and I will be manufacturing and as well as building homes for everyone that needs a home or has had the usual problems with buying and owning a home NETZERO homes with be 90% bill free . Our intentions are very little down , very low interest rates ( if any) allowing the individual to have money to live and put money back into the community as well as not be a slave to there house or mortgage . The average home will be in the 1,600 hundred sq ft home with attached garage and nothing short of startreck

Living and communities thriving with giant gardens on the neighborhood property as to involve the neighborhood in growing and tending to there own organic food fresh everyday . Like minded folks working together and thriving together . The project has already been approved through Humanus Group and planning on new year to breaking ground .

The real reason I want to do it ? Is to watch the endless amount of families smile and laugh again and watch all the pain disappear in a moments time ... .

#nevergiveuponyourdreams

A few projects that can be followed upon rather i intend working if given a chance:

1. A pool of e cars for people to commute to their offices, Schools, colleges, ,,,,,,
2. Involving military veterans for managing dairy products. Milk and distribution to societies.
3. Involving military veterans in managing and maintaining the homes for the elders, pensioners
4. Enabling cluster of villages adjoining the cities to bring their farm produce , Vegetables, handicrafts etc in weekly haats(markets) Directly without any middle level handlers.
5. Provisioning and enabling the townfolks with a conservancy manpower and include the residents themselves for Swach Abhiyaan ( Cleanliness drive) Thereby generating employment,
6. provisioning of employment for swach force to clear the railway tracks of the muck and filth surrounding these place
7. Provisioning of the alternate dwelling units for the population that encroached upon the 60 Mtrs no construction zones by the side of railway tracks .

***Entry Submitted Anonymously at 2:27 AM EDT on October 14, 2016***

These are the Humanitarian Project Ideas I have with the Zim Redemption. My focus is more on the animals as I think so many redeemers will have solutions for the people. I really love animals and want to be a steward/force for them. However, I want to also help people who are suffering because of natural or man made disasters. Long term humanitarian people plans, I leave to all of you as I will have my hands full with the animals. By the way I am dreaming big and globally because of the high Zim rates that I expect will materialize any day now. :)

For People:

### **Haiti, Dominican Republic**

- Send Food, Medicine, Clothing and temporary shelter. I don't want to go through a foundation or agency for this as they have been burned before. I am talking about actually finding cargo planes and cargo ships to do this working with the US Republic and Haitian government. I want to give the food and supplies out directly to the people from the docks and harbors if possible.

- Help them build permanent shelters using ICF home building (Insulated Concrete Forms) which is a way to build earthquake and hurricane resistant shelters with reinforced concrete and it can be built fast. Work with ICF manufacturers to actually send the materials, equipment and skilled ICF builders. Have these builders teach willing citizens to learn how to build these homes so it can go faster and give them a new marketable skill. Manufacturers include: Buildblock.com, ApexBlock, etc.

### **Venezuela**

- Send food, medicine, clothing to the people of Venezuela. Because their economy crashed they are suffering.

### **Flint Michigan**

- Upgrade the plumbing (that was a good idea, whoever posted this before).

### **Fukushima Daiichi Nuclear Power Plant**

- Fix this, working with governments. This radiation leak has to be stopped.

### **North Dakota Pipeline**

- Help fund the Native Americans fight the North Dakota Pipeline. Help to come up with a solution that doesn't risk the water supply, preferably an alternative source of energy, but in the short term what can be done?

### **For Animals: This is my main focus for long term plans**

- Fund no-kill animal shelters - expand them for over flow from SPCA & County animal shelters so they (SPCA, county

shelters) no longer euthanize animals unnecessarily.

- Create low cost/no cost vet clinics - work with existing animal shelters for this if possible.

- Consider a sliding scale pet insurance with 100% coverage.

- Offer landlords compensation/incentive packages if they will allow animals in rentals.

- Invest in lab grown meat research, production and distribution. Mosa Meat (hamburger), SuperMeat - Chicken, Amit Gefen Gefen, bioengineer and professor at TelAviv University chicken breast, PerfectDay dairy products by brewing milk, Hampton Foods egg product (invested in by Bill Gates so a little concerned about that).

- Save existing newborn calves of dairy cows and buy the dairy cows when they retire to be reunited with their calves in a sanctuary or global sanctuaries for this purpose.

- Save unwanted chicks in the large scale processing of chicken meat and eggs, provide them with a place to live out their natural lives.

- I still need to research veal and pigs and how to save them, stop suffering, and come up with alternatives. Adding that to the list.

- Work with and fund animal psychics and people who can communicate with animals to better communicate with the animals and learn what they want and need.

- Work with Cesar Milan, the dog whisperer, to train people and help save the aggressive animals from being euthanized whenever possible.

- Help the seals who are dying on the West Coast and stop all clubbing of baby seals for fur.

- Find or create alternatives to stop the fur and animal parts (ivory, gorilla hands, etc.) trade.

- Save the 45,000 wild mustangs from the BLM, send them to existing Wild Mustang sanctuaries and fund them for upkeep and care of these horses and also to expand land holdings as needed.

- Donate and support all legitimate ethical animal non-profits.

- Work with larger ethical animal groups to promote and market animal rights legislation.

- Invest in and/or provide sanctuaries for wolf protection. No more killing wolves.

- Invest in a machine technology called the "Ocean Array", that removes plastic from the oceans.
- Clean up the Great Pacific Garbage Patch in the Pacific Ocean.
- Donate to environmental clean-up companies.
- Donate/support fixing of Fukushima radiation leak.
- Donate and help expand native animal rescue organizations.
- Donate to existing global animal sanctuaries (Virunga National Park, Dian Fossey Karisoke Research Center, The Lion Whisperer, <https://www.youtube.com/user/LionWhispererTV>, and other international animal sanctuaries.)
- Create new global sanctuaries one or more on every continent. Staff them with animal lovers from all walks of life who want to provide love and care to the animals, including veterinarians and provide a community for these employees near the sanctuaries. Have housing, superb pay and benefits, flexible hours, day care, medical clinic, school, and flexibility to transfer to other international sanctuaries when desired. I think the African one might be the favorite.
- Start veterinarian school/schools, offer graduates work at any new sanctuaries or shelters.
- Offer help and aid to local governments in the event of natural disasters to help with animal rescue (Animal Red Cross)
- Open a hotline for reports of neglected, abused, abandoned animals that need saving.
- Work with local, regional or national governments to save animals reported on hotline.
- Invest in biodegradable options for plastic, packaging.
- Invest in alternatives for fishing nets that are biodegradable.
- Stop illegal sonar in the oceans.
- Promote the assigning of economic value to animals so the value of animals has to be factored into the cost of development projects and resource extraction projects. For example if you will cut down this patch of rain forest then

the relocation and the destruction of these animals natural habitat will have a cost to you that you must factor into your costs to do this.

-Donate to anything else related to the ethical treatment of animals that I have not thought of yet.

I believe animals have inalienable rights too that must and should be honored and defended.

### **Other Ideas I am toying with**

-If there are any restrictions or censorship on free speech or truthful information create a whole new internet or a whole new cable system that defends our ability to receive the truth.

-Create a new television channel/channels for YouTubers that provides a free alternative to YouTube because of censorship.

-Donate to all my YouTube favorites so they can keep up the good work.

-Put up YouTube videos, success and feel good stories of all the happy healthy animals.

I know, I dream big and in detail. I almost feel sorry for my Family Office. Haha :). Hope this helps all of you with ideas. Peace and divine love to you and yours. The divinity in me honors the divinity in you. Here is to a better world.

## A Wind-Powered Device that Can Pull Water from the Air

11:03:00 PM [News](#)

### **This Wind-Powered Device Pulls 11 Gallons Of Drinkable Water From The Air Each Day**

By [Amanda Froelich](#)

Whereas many individuals in developed nations often worry over catching their favorite television show, a constant stress for [approximately 2.3 million people](#) on the planet has to do with obtaining clean, drinking water. Fortunately, a solution to the latter conundrum has been presented, and it's one that might ease generations of worry in locations where purified water is hard to come by.

The Water Seer collection device relies on simple condensation to collect drinkable water from the atmosphere and can provide up to 11 gallons of clean aqua each day without one external power source. Best of all, it can potentially run forever and does not create greenhouse gas emissions which contribute to climate change.

These people have a very good idea for free energy that I assume will need funding. But there is also Scalar Energy and electro-Gravitics, just to name a few, that have the potential to contribute to the development of everything from free energy to food replicator technologies and more....

Entry Submitted Anonymously at 7:21 PM EDT on October 13, 2016 Thank you, looked at Mercy Corp's mission statement and other info from their web page. Like the fact that 87% goes to the work needed, also like that they listen to the people don't just go in and do it with disregard to what is wanted.
