Coffee Drop
WhitePaper

Coffee Drop is a community project, which aims to create a website, where creators can receive tips in cryptocurrencies. Each person will be able to create their own page, where they will be able to post useful links related to them. Also, there will be a panel where creators choose in which cryptocurrencies they want to receive donations. Each transfer will be automatically sent to their address.

Crypto Tree that's how we called our website builder. Every creator who collaborates with us will be able to create and use the site for free.
