<http://www.TheImperiumofDiamondsGovernment.populiser.com>

I wish pleasant December holidays for your Order and members of your superior group, welcome your enthusiasm for social activities.

I would like to ask you to stop any support for the European Terrorist Organization, at any level of government, service and order.

Several members of your order have been seen in contact and contradictory cooperation with a terrorist organization in Europe, creating only the worse risks and threats of warfare without limit, as well as the historical depreciation of your company, which is therefore termed as a terrorist organization not owning the right to legal status and recognition international level.

European terrorist states are cooperating on terrorism in the face of crimes that mean a drastic outpouring of World War II crimes, and it is never possible to support and legalize such crimes. Everyone has to be punished and for that purpose an international law is created, declared by the global democracy of all the states of the world.

European crimes mean genocide against more than 370,000,000 innocent people, government-sponsored world terrorism, mercenary and state recognition of this crime, damaging the integrity of all foreign states, and drastic robbery about the value of civilization development, and the gross violation of the Geneva Conventions.

I am asking European policy, on question of International rule, but European policy is never one time interested for our meeting, or opportunity for contract signed and agree, and European policies only abuse hypnosis for full disinformation in legal orders in global validities.

The European Terrorist Organization in no way respects the Geneva Conventions nor does it allow the execution of their contractual commitments between the other parties. The European Terrorist Organization directly enforces legal positions that are intended for wars at the level of health barriers all blockations or allow the opposition to be mistreated by their use of higher-order healthcare professionals for their mutilation, the same as warfare principles without civilized order and only for massively killing, and therefore because of your contact with the European states you are fundamentally losing all confidence in the international position.

The performance of the European legal development strategies, as well as the forced actions of a terrorist violation of the legal right, pose a threat to the dimensions of war in the form of standardization of the use of nuclear weapons, toxic chemistry and biochemistry as well as drugs, viruses and bacteria. exploitation of technologies for the destruction of civilizations through tornadoes, tsunamis, earthquakes, other factors similar to natural phenomena.

European terrorist states have already been genuinely confirmed and inherently publicly threatened by the worst wars in the history of mankind, full of inhumanity and fully against all civilized principles, and it is indeed real that if European terrorist states only indicate their interest in the crime step again leading to war, other opposition groups have full rights to use weapons of mass destruction to wipe out these terrorist states.

Even today, terrorist states are developing only in this direction, and confirms the fact that the European states refuse to respect the Geneva Agreements which mandate States to ensure a joint solution to peace principles if this is possible. I have proposed many steps towards peaceful reconciliation, but the European Terrorist Party has refused the right to bargain in any way, and

there was still an active crime of inhumanity leading to civilization and barbaric wars based on extermination. The shock and risk of wars with weapons of mass destruction, as well as the real facts leading to the eradication of European civilization, are the real facts that European terrorist states have chosen for their own decision and purpose, only the party of the European Terrorist Organization has made this process the first and last solution.

According to the United Nations International Law, and under the Geneva Agreements, anyone who is a member of the European Terrorist Organization is destined for direct extermination, instantaneous killing directly on the street, whether armed or unarmed, with the right to denounce or without any questions, man is only his immediate killing and therefore this world can exist and be developed peacefully and by growth.

Supporting this crime and dealing with European countries is a truly serious crime at the international level and can really cause bad consequences for the future of your order.

I urge you to immediately ban all your contacts with terrorist organizations and thus to support at the international level the same development, which also means informing other orders around the world, their duty of responsibility and their rights as well.

Likewise, by the second question, I still offer you the possibility of your federation in the interest of federating my representation, and thus supporting the steps towards unification of mankind.

I offer you new territories for you and the right to develop a new civilization under your administration in the federation, a step that gives you fundamental international legality.

Your transformation of the medical and medical order to the level of the government body is indeed a disguised progress that is very friendly to the federation's horizons, founded for the purpose of supporting the states and unifying the claims, as well as enabling the peace and friendship among nations to be built.

If you are interested in a federalization step, make a spin and join, set your direction for an official relationship to the federation, and support our unification, we will create steps to develop a common policy center at the level of unification of all the world's microstates and resistance movements, a force of over 100,000,000 members of the army, and the ability to build up to 1,500,000,000 of the power of the population.

The largest nation of the world, now with its own territory, as well as significant opportunities for civilization development that outstrip all dimensions of the history of the human race.

You do not believe me, or you already know me; in any case, we can organize our conference and talk about the facts of legal policy issues and the possibilities of our cooperation together to achieve the goal of federalization and achieve the function of our unity at the real level of the government of the country.

Of course, it is a certainty that your current relations with the European states force me to position when I have to pre-apply for special verification steps to confirm your own security without connection to the terrorist organization and that is the right way to actively activate the first step that enables us to diplomatically unite and communicate on legal issues.

Until your movement is confirmed as legitimate, it is not possible to establish

a contact or to extend the coordination steps at the level of joint legal obligations.

If your interest in federalization is really determined, or if only you want to start developing your order in the territory of my country, I will always be in a targeted position to support you and provide you with opportunities for significant development.

If your status will be legitimate, allowing you the opportunity to take action in my area, which also means the development of industrial centers of pharmaceutical and health technology production that will provide you with an unrestricted economy and greater significance on the international humanitarian level, but I am responsibly able to provide you with many other resources to develop many forms of humanitarian missions.

If there are not enough members in your country, there is always the right to request an international congress.

In any case, I wish all the best to everyone who supports the peace and punishment of those who stand as traitors of humanity and together widen the purpose which is indeed the loss of the future of all nations.

Join The King !

King Gottwald Peter, ID's
