Methandrostenolone is also being referred to Methandienone in a lot of countries and this is a very popular product and very widely used. This substance is most well known by its brand name called Dianabol. Methandrostenolone is a derivative of testosterone, which modified so that the hormone's androgenic (masculinizing) properties are being reduced and its anabolic (tissues building ...

I'm working on lots of exciting things at the moment and Cameron starts his final year of uni soon so it was nice to go out and celebrate a little! ☐
