

To understand the extent of Covid 19, this guide was created. Just like in the movie the matrix there is the world that you see, and underneath that veil of lies is the truth. The truth is hard to swallow and the information contained here is not for the faint of heart. Therefore, as our heavenly father allows freedom of choice, in his likeness and image you have the freedom to stop reading, right now, and continue on with your life. You will get your news from media sources and expert opinions and that is perfectly fine. Most people are hopelessly dependent upon the current system and in the face of the truth will resort to defense mechanisms like denial. If you choose to lift the veil, I warn you that there is nothing that can remove this information from your brain. Once you are "awake" you cannot go back to sleep. Still want to know the truth?

Don't say we didn't warn you.

The origins of Coronavirus – Predictive Programming

Predictive programming is a subtle form of psychological conditioning. Basically when a person is exposed to repeat stimuli, the shock factor is taken out of the equation. For example, if you open a bag of Doritos, the first chip is bursting with flavor, the second and third chip taste great, the fourth and fifth chip taste good, and by the time you got to the 6th chip – what was “amazing” is now normal. If used cunningly and manipulatively this can be done in the opposite way. If you have a person and you feed them shit, the first time will be a horrible experience, but the 6th time – based on conditioning – will be easier to tolerate than the first time.

Predictive programming follows this principle, by repeatedly showing the general population some “idea”, it isn’t as shocking when it actually happens. The ruling authorities, the governments, the shadow governments, the special interests, media outlets, advertisers, hollywood producers, and record labels all collectively start pushing certain narratives until it becomes normal. They do this by predictive programming. They show you images and elaborate stories so by the time it actually happens in real life it is not a shock to you. It becomes easy to accept this as reality.

The sinister part of this is that on the surface it looks like a coincidence, but the harsh reality is that for decades before major worldwide events happen, predictive programming took place.

For example: 9/11 is a major worldwide event. Here is an example of predictive programming:

PREDICTIONS PRIOR TO 9/11 PART 1

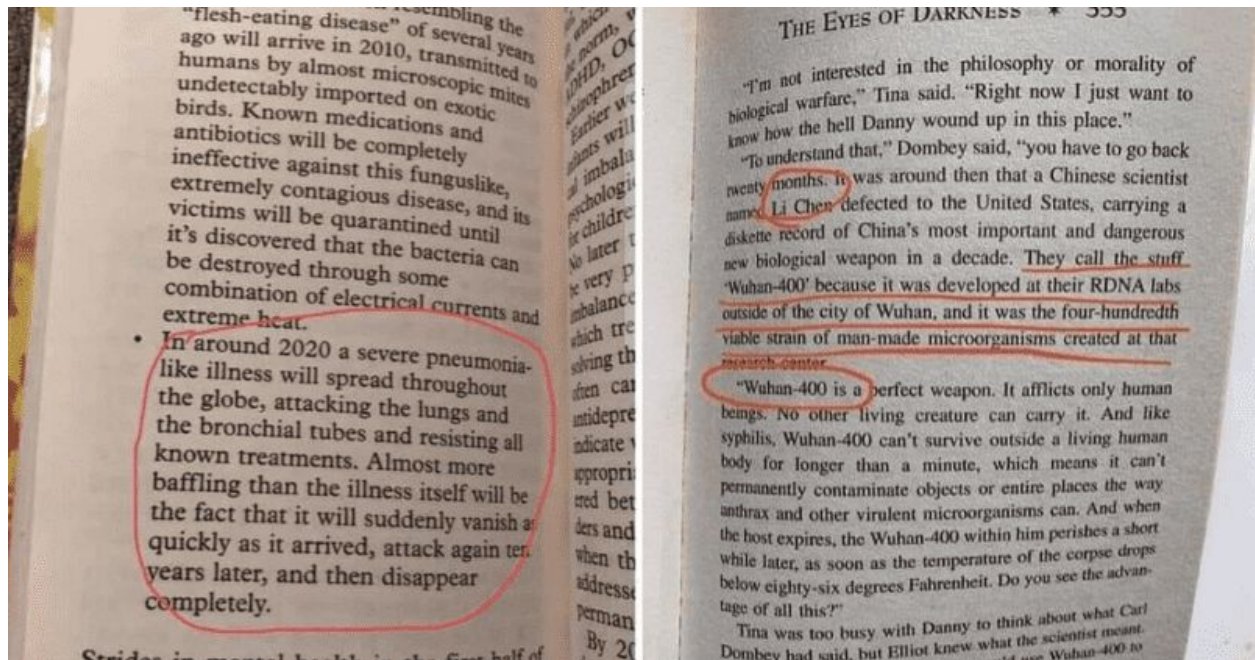

All of the images were released BEFORE 9/11, sometimes 20 years before. And there are thousands of examples, you can just search up predictive programming 9/11 or any other worldwide event. It's not just a coincidence that cartoons showed the twin towers being blown up.

Predictive programming in regard to Coronavirus

1. Author Dean Koontz wrote a book called "The Eyes of Darkness" here is a passage from that book. Link:

<https://www.amazon.com/Eyes-Darkness-Thriller-Dean-Koontz/dp/0425224864>

2. Netflix Series My Secret Terrius Episode 10 - Released 2018 had a story about a "Mutant Coronavirus" Link:

<https://www.independent.co.uk/arts-entertainment/tv/news/my-secret-terrius-netflix-coronavirus-prediction-south-korea-a9429021.html>

3. Netflix Series from 2015 “Containment” is a series about a lab made virus that escaped which forced the CDC to quarantine a city. The series shows that the CDC blatantly lied about the origins of the virus and manipulated the police force and politicians to go along with a false narrative. In this series it exposed the idea of “gain of function” studies done by the government. Series also shows societal collapse because of viral outbreaks.

Link:

<https://www.fastcompany.com/90465248/containment-on-netflix-the-2016-series-about-a-deadly-virus-in-the-u-s-is-as-chilling-as-ever>

4. The movie “The Purge: Election Year” is not about a deadly virus, but it is about a massive number of people dying during an election year. 2020 is an Election year and it is the year of Coronavirus. Also on the front Cover of the Movie Art - there is a man wearing a gas mask - coincidence? Probably not. Also the statue of liberty which is probably a nod to new york being the worst epicenter of the virus on earth.

5. An online game from the 90s titled “Pandemic” - The game was a game about how to spread a virus as fast as possible from “patient 0” in country of choice.

6. Event 201 was a simulation run by John Hopkin’s university in conjunction with the bill and melinda gates foundation about a pandemic that killed 56million people. This was run in November 2019 literally months before the coronavirus Pandemic. Unironically - the virus was a coronavirus that originated in bats which caused a severe acute respiratory syndrome. The stock market also crashed during this simulation. It can be watched here: <https://www.youtube.com/watch?v=AoLw-Q8X174>

7. Madonna released a new album called “Madonna X”. There is a lot to unpack here so pay attention. The Typewriter on the album is a “Corona” typewriter and every sentence starts with “A” and in a row it forms “AAAAAAAAA”, Coronavirus scientific name is SARS-COV2. The genome for SARS-COV ends in 33 A’s - PAY ATTENTION TO THE NUMBER 33!!! More on this later.

Genome can be found here:

<https://www.ncbi.nlm.nih.gov/nuccore/MN908947>

Summary of Genome can be found here:

<https://bioinformatics.stackexchange.com/questions/11227/why-does-the-wuhan-corona-virus-genome-end-in-aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa>

Madonna Album can be found here:

<https://www.mad-eyes.net/music/madame-x/>

- 8 . Madonna again - This time a live performance she did with Quavo singing her song off the album Madonna X called “Future”

Video can be watched here at this exact time stamp: 4:50

https://youtu.be/VG3WkiL0d_U?t=290 - Madonna is wearing a crown. Crown in spanish is Corona. The people around the “Corona” are wearing gas masks and they have flowers on their heads signifying spring time.

https://youtu.be/VG3WkiL0d_U?t=361 - at this time 6:00 Madonna sings while pointing at the audience - "not everyone is coming to the future". I'll put it bluntly - "not everyone is coming to the future" means not everyone is going to survive.

For whatever reason its not only Madonna that is pushing this AAAAAAAA thing either.

A painting by Jean Michel Basquiat - can be seen here:

https://www.auctionzip.com/auction-lot/JEAN-MICHEL-BASQUIAT-AAAAAA_90640F6BEE/

The painting is a reference to Wilson from the Tom Hanks movie Castaway, but the AAAAAAA being the end of the SARS-COV genome is interesting. Its also interesting that Jay Z, Ellen Degeneres, and Lady Gaga all have been pushing the Wilson and AAAAAA thing in the recent years.

Basquiat

9. Dr. Creep an underground rapper from 2013 predicted Coronavirus: Listen from 1:01 mark. Coincidence? Nah

<https://www.youtube.com/watch?v=5P77bUdE4p4&feature=youtu.be&t=62>

10. Space Jam a movie from 1996 shut down the NBA with people in hazmat suits. What the guy said is literally word for word what was said when the NBA commissioner shut down the NBA in 2020 in response to the coronavirus. Notice the guys in hazmat suits in the back drop.

https://www.youtube.com/watch?v=VJFu_YOF9WU

11. Simpsons predicts coronavirus - watch the clip - they talk about “releasing a deadly virus to the public” They initially blamed it on cats in the clip and then the virus was spread by asian factory workers through mail. Coronavirus was originally blamed on BATS and spread by an asian country. No coincidence.. <https://www.youtube.com/watch?v=v53GmsupwY>

12. Kobe Bryant’s death was not only predicted but possibly was the catalyst signal. A show by the name of Legends of CHamberlain which aired on comedy central. In a certain episode titled “End of Days” which aired on 11/16/2016 Kobe bryant was seen dying in a helicopter accident. Which is literally how he died in real life last year. Whats even weirder is the air date has two 6’s in 11/16/2016 - but if you add up the rest of the numbers $1+1+1+2+1+0 = 6$ making 666.

Clip of him dying can be seen here: <https://youtu.be/snoM6bmPaUE?t=7>

News article of his death:

<https://www.vvng.com/tmz-kobe-bryant-and-others-killed-in-calabasas-helicopter-crash/>

But how exactly does this play into coronavirus? Well Coronavirus is SARS-COV2, but the non scientific name - the name it was given is called Covid-19.

Well if you translate Covid to Hebrew and back to English on google translate it translated to Kobe.

English	↔	Hebrew
covid	×	קובי

Hebrew	↔	English
×	קובי	Kobe

13. I Pet Goat II is a weird symbolic youtube clip that has predicted a ton of stuff over the years. The video itself is over 7 years old. The video was made by Heliofant studios
Video is here: <https://www.youtube.com/watch?v=65xLByzT1I0>

Heliofant studios logo - the O in the middle is the Corona of the sun. Again a play on "corona"

Lets analyze the video.

The beginning you can see a concentration camp with “snow” on the ground. In fact in concentration camps they burned bodies in the crematories and the snow was actually ashes of human flesh. During coronavirus pandemic there have been so many people dead that we had to burn bodies. So the symbolism of a concentration camp with the flakes of burned bodies is no coincidence.

Clip - <https://youtu.be/65xLByzT1I0?t=9>

Associated news story:

<https://www.reuters.com/article/us-health-coronavirus-usa-bodies/new-york-city-crematories-work-overtime-as-coronavirus-brings-backlog-of-bodies-idUSKBN21K27D>

In this clip you can see the crescent moon behind osama bin laden. A marker for ominous activity. In fact before the coronavirus pandemic, a photographer in a muslim nation took a picture of the horizon that had the same red horned moon.

<https://youtu.be/65xLByzT1I0?t=138>

Associated news story:

<http://unsorted.co/sinister-sunrise-captured-by-photographer-elias-chasiotis-during-an-eclipse-in-qatar/>

In the next clip the market collapse was predicted. In the eyes of the person, you can see the words “Markets plunged” then “War coverage next” and actually if you look you can see the indexes S&P 500 and Nasdaq down and specific numbers. Not a coincidence.

<https://youtu.be/65xLByzT1l0?t=181>

<https://theconversation.com/this-coronavirus-share-market-crash-is-unlike-those-that-have-gone-before-it-133691>

In this clip you can see a man drowning in mucous secretions - just like coronavirus

<https://youtu.be/65xLByzT1I0?t=213>

In this clip you can see tiananmen square - which is symbolic for china. A Person standing in front of a row of tanks

<https://youtu.be/65xLByzT1I0?t=219>

At this time you see a dead guy who wears a ring touching the shoulder of the girl with the tiger shirt. Few things here - a guy who was known for wearing an extremely gaudy ring was just killed - Qassem Soleimani so that is the symbolism there. The tiger looks like Chinese new year - year of the tiger, only problem is its not the year of the tiger its the year of Rat. But nevertheless 2020 is a year where EVERYONE is talking about tigers. So yea it is year of the tiger - year of Netflix Tiger King.

<https://youtu.be/65xLByzT1I0?t=223>

<https://nypost.com/2020/01/03/qassem-soleimani-airstrike-ring-from-corpse-identified-irans-top-general/>

<https://www.usatoday.com/story/opinion/2020/04/12/tiger-king-transends-coronavirus-isolation-builds-community-column/5133790002/>

Right after that, you see fireworks in the background, but the fireworks don't behave like normal fireworks, they maintain a certain shape and they don't disappear. They look like the microscopic structure of coronavirus. Also the girl turns around and has a biohazard symbol on her cheek. So we have China, Coronavirus structure, death, and a biohazard symbol. The tiger symbolism and the craze for tiger king during the pandemic, and the shiny ring on the hand of the dead guy preceding the virus.

<https://youtu.be/65xLByzT1I0?t=225>

Notice the biohazard symbol on her right cheek - corona virus is a biological weapon.

14. There was a big focus on the 2020 Tokyo olympics. Look at their logo, then look at a cross section of coronavirus.

15. The economist is a magazine who's cover's oddly predict the future. But we know that is just predictive programming, lets see the programming for coronavirus.

The 2016 cover -

- lower right hand corner has a guy reading a book titled "The future, a novel" This Covid 19 is called "Novel" Coronavirus 2019.
- Also there is an olympics logo with a small grey coronavirus cell structure posing as a ball. Again - there is no ball that looks like coronavirus and there is no sport at the olympics that uses a ball similar to that. Not coincidence. As you already know the 2020 olympics logo is the cross section of coronavirus. Somehow 4 years ago, the economist predicted that the year of the olympics there would be a "novel" coronavirus
- Now we have the sun yet again, where as you know from earlier the "corona" of the sun is just symbolism for the word corona.
- So we have "Novel", "Corona", a ball that looks like a virus structure, and the olympics logo to signify the year.

The
Economist

The World in 2016

16 Economist 2015 cover

There are a couple of things here, some are in regard to other events but some are related to coronavirus. The first is the tortoise (bottom center) and the number 11.3 (bottom right). In Europe they put the day first then the month, in America we put month first then date, but the Economist is a european publication, so 11.3 actually refers to March 11th, on March 11th Trump addressed the nation from the oval office and declared coronavirus a national pandemic and shut down all travel from european nations. Very weird how a 2015 cover could be so spot on with the significance of a date.

Trump Speech: <https://www.youtube.com/watch?v=EnHo-eYJWg4>

Other historical dates 3/11: <http://www.thepeoplehistory.com/march11th.html>

March 11th is ALSO the date of the first reported case of the last pandemic that killed a ton of people - the 1918 influenza pandemic.

Now what about the tortoise? - The tortoise refers to the washington seahawks stadium - Century link field. - Which is shaped like a tortoise.

What does century link field have to do with coronavirus? Well the outbreak epicenter in USA was initially in Washington state. also Century link field was converted to a field hospital for pandemics.

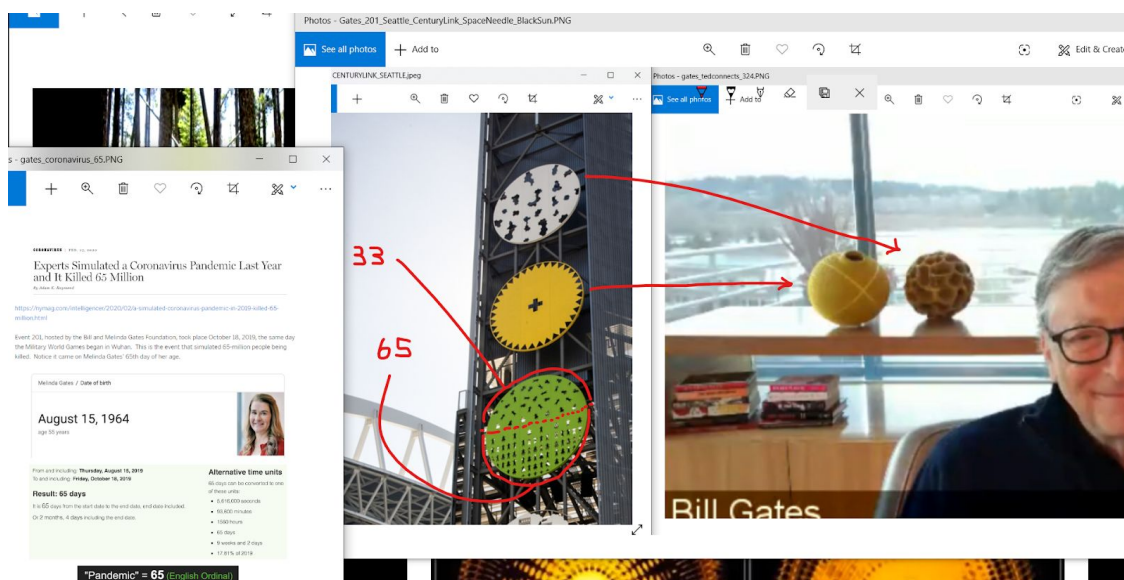

<https://www.kiro7.com/news/local/centurylink-field-being-scouted-possible-field-hospital/34LHO G5V2FCBLOJMP4GIYHXKJE/>

<https://www.nejm.org/doi/full/10.1056/NEJMoa2001191>

Also what is more interesting is the artwork tower in front of century link field.

You can google "Century link field" to do your own research if you dont believe me.

The top is a petri dish, the second is a corona with a medical cross in the center. The green circle shows dead bodies scattered and the living are confined in blocks, the bottom are chimneys with smoke again referring to the crematoriums. The number of people in the green circle is not a coincidence either - 33 dead bodies, and 65 people confined. 33 is the highest degree in freemasonry, and 65 refers back to the event 201 simulation that stated 65 million people would die.

They love that number 65 - see pic below.

CORONAVIRUS | FEB. 27, 2020

Experts Simulated a Coronavirus Pandemic Last Year and It Killed 65 Million

By Adam K. Rogerson

<https://nymag.com/intelligencer/2020/02/a-simulated-coronavirus-pandemic-in-2019-killed-65-million.html>

Event 201, hosted by the Bill and Melinda Gates Foundation, took place October 18, 2019, the same day the Military World Games began in Wuhan. This is the event that simulated 65-million people being killed. Notice it came on Melinda Gates' 65th day of her age.

Melinda Gates / Date of birth

August 15, 1964

age 55 years

From and including: **Thursday, August 15, 2019**

To and including: **Friday, October 18, 2019**

Result: 65 days

It is 65 days from the start date to the end date, end date included.

Or 2 months, 4 days including the end date.

Alternative time units

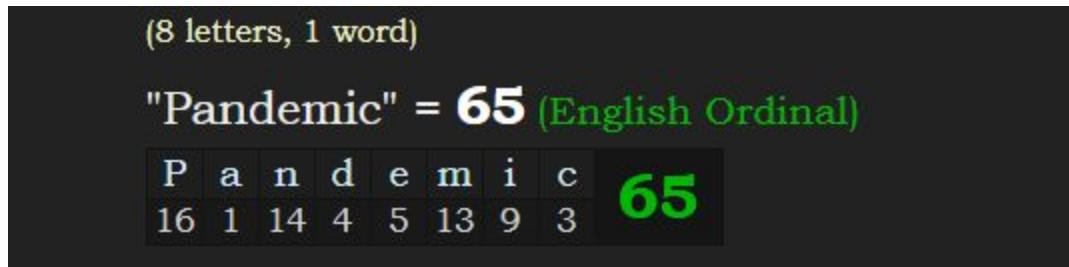

65 days can be converted to one of these units:

- 5,616,000 seconds
- 93,600 minutes
- 1560 hours
- 65 days
- 9 weeks and 2 days
- 17.81% of 2019

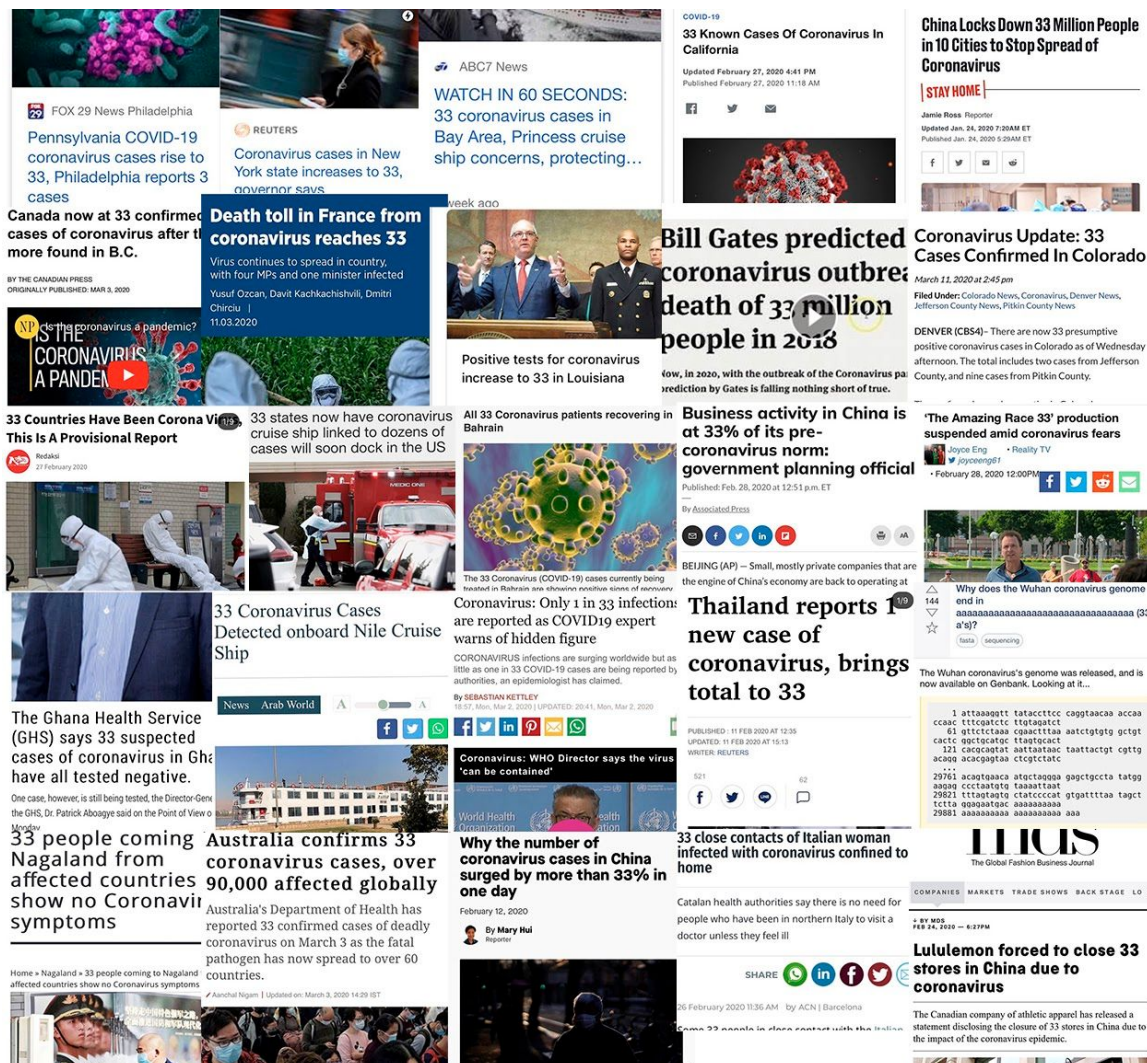

Times 65 occurs in relation to Coronavirus.

- Melinda gates 65th day of her age for that year. From her birthday 8/15/1964 to the date Event 201 took place on 10/18/19 - it was exactly 65 days. Bill and Melinda gates foundation was the primary donor and collaborator with John Hopkins university to run that simulation. Just a refresher - this was a simulation about a worldwide pandemic caused by a SARS Coronavirus.

- During the simulation 65 million people died.
- Century link field has exactly 65 people depicted in the green bubble “organized into columns” aka organized into quarantine.
- The word “Pandemic” itself if converted to numbers by a process called “gematria” equals 65. Test it out for yourself: <http://www.gematrinator.com/calculator/index.php> just type Pandemic and see what number comes out. See image below if you trust me.

Now you may be wondering, what about the other number in the green circle? What about the 33? Well 33 is the highest degree in freemasonry - you can do your own research on that, but 33 was pushed way more than 65. In fact here are all the headlines in relation to coronavirus that pushed the number 33. You were still asleep then so you didnt notice, but now you are one of us so behold.

```

I could write a 1000 page book on all the instances, open your eyes and expose the bullshit. This coronavirus was well known way in advance clearly.

“Oh but thats an absurd accusation” No its not. I proved to you Hollywood and the media knew. Now for the governments, WHO, CDC and the rest. They all knew.

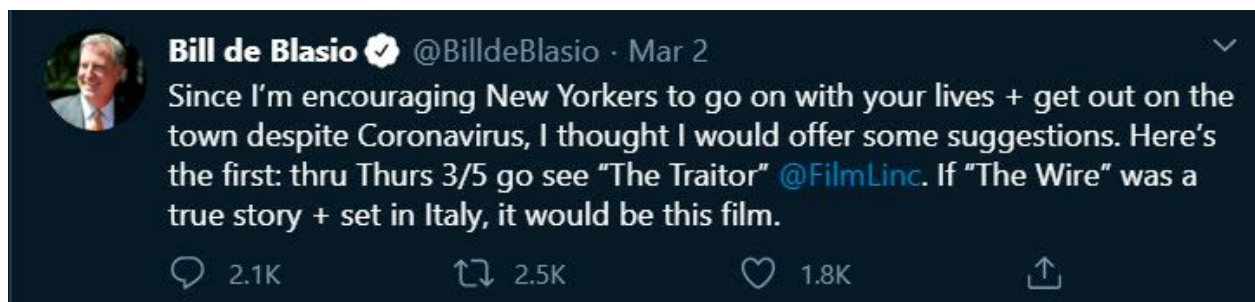

What do we now know about this virus?

1. It is an airborne/contact illness
2. It can be transferred from person to person
3. It severely attacks the lungs
4. It causes a severe cytokine inflammatory response
5. It does NOT discriminate against age - young people also die.
6. Social distancing slows the spread
7. Wearing masks are encouraged in areas where social distancing cannot be avoided aka in public.
8. It is not the flu, does not act like the flu, and is not subject to flu standards
9. Virus will not stop with "heat" as extremely hot places like africa also have the virus

Do you think we only know that because this is a BRAND NEW VIRUS and we figured this out now? Open your eyes you poor child. You have been lied to.

Nancy Pelosi Visits San Francisco's Chinatown Amid Coronavirus Concerns

By **NBC Bay Area staff** • Published February 24, 2020 • Updated on February 25, 2020 at 7:05 am

Speaker of the House Nancy Pelosi toured San Francisco's Chinatown Monday to send a message. She said there's no reason tourists or locals should be staying away from the area out of fear over coronavirus concerns.... [Read more](#)

Speaker of the House Nancy Pelosi toured San Francisco's Chinatown Monday to send a message. She said there's no reason tourists or locals should be staying away from the area because of coronavirus concerns.

"That's what we're trying to do today is to say everything is fine here," Pelosi said. "Come because precautions have been taken. The city is on top of the situation."

Pelosi visited The Wok Shop, a temple and the Golden Gate Fortune Cookie Factory, which was started 58 years ago by owner Kevin Chan's mother and uncle.

Again manipulating the race angle, they led people to hug a chinese person during a time where you are literally not supposed to hug ANYBODY.

Global Times ✓
@globaltimesnews

The mayor of Florence, Italy, @DarioNardella initiated "hug a Chinese" on Twitter on Feb 1, opposing anger toward China amid the #nCoV2019 outbreak, and calling for "Unity in this common battle!" Many Italian netizens responded by posting photos of themselves with Chinese.

6:48 AM · Feb 4, 2020 · [Twitter Web App](#)

At the same time that this was going on we had non medical professionals claiming to know about risk. Just a reminder, if a non medical person gave medical advice to somebody and they died because of it - they would be imprisoned for impersonating a medical professional and likely be brought up on manslaughter charges whether negligent or not. No slap on the wrist.

<https://www.axios.com/new-york-first-coronavirus-case-cuomo-risk-low-7eafa8d9-5148-4fbc-93ae-42affa09c313.html>

Cuomo: Coronavirus risk remains low despite first confirmed case in N.Y.

 Rebecca Falconer

New York Gov. Andrew Cuomo. Photo: Bruce Bennett/Getty Images

New York Gov. [Andrew Cuomo said Sunday](#) there's "no reason for undue anxiety" after a woman in her late 30s became the first in the state to test positive for the novel coronavirus.

Trump also with this narrative - both democrats and republicans were downplaying the virus.

<https://www.nbcnews.com/politics/donald-trump/trump-says-coronavirus-risk-americans-very-low-administration-effectively-handling-n1143756>

Trump says coronavirus risk to Americans 'very low,' puts Pence in charge of gov't response

The president addressed the outbreak at the White House, surrounded by the administration's public health experts.

— President Donald Trump stands with Vice President Mike Pence and members of his coronavirus task force during a news conference at the White House on Wednesday, Feb. 26, 2020. Carlos Barria / Reuters

Feb. 26, 2020, 6:49 PM EST / Updated Feb. 26, 2020, 8:27 PM EST

Over and over again it was downplayed, and on the news multiple leaders spoke about remaining calm, here is a list of trump saying to remain calm over a period of 3 weeks.

<https://www.factcheck.org/2020/03/trumps-statements-about-the-coronavirus/>

Jan. 22: “We have it **totally under control**. It’s one person coming in from China. We have it **under control. It’s going to be just fine.**” — Trump in a CNBC interview.

Jan. 30: “We think we have it very well **under control. We have very little problem in this country at this moment** — five — and those people are all recuperating successfully. But we’re working very closely with China and other countries, and we think it’s going to have a very good ending for us ... that I can assure you.” — Trump in a **speech** in Michigan.

Feb. 10: “Now, the virus that we’re talking about having to do — you know, a lot of people think that goes away in April with the heat — as the heat comes in. Typically, that will go away in April. **We’re in great shape though.** We have 12 cases — 11 cases, and many of them are in good shape now.” — Trump at the White House. (See our item “Will the New Coronavirus ‘Go Away’ in April?”)

Feb. 14: “**There’s a theory that, in April, when it gets warm — historically, that has been able to kill the virus.** So we don’t know yet; we’re not sure yet. But that’s around the corner.” — Trump in speaking to National Border Patrol Council members.

Feb. 23: “**We have it very much under control in this country.**” — Trump in speaking to reporters.

Feb. 24: “**The Coronavirus is very much under control in the USA.** We are in contact with everyone and all relevant countries. CDC & World Health have been working hard and very smart. Stock Market starting to look very good to me!” — Trump in a tweet.

Feb. 26: “So we’re at the low level. As they get better, we take them off the list, so that we’re going to be pretty soon at only five people. And we could be at just one or two people over the next short period of time. **So we’ve had very good luck.**” — Trump at a White House briefing.

Feb. 26: “And again, when you have 15 people, and the 15 **within a couple of days is going to be down to close to zero**, that’s a pretty good job we’ve done.” — Trump at a press conference.

Feb. 26: “I think every aspect of our society should be prepared. I don’t think it’s going to come to that, especially with the fact that we’re going down, not up. **We’re going very substantially down, not up.**” — Trump at a press conference, when asked if “U.S. schools should be preparing for a coronavirus spreading.”

Feb. 27: “**It’s going to disappear. One day — it’s like a miracle — it will disappear.**” — Trump at a White House meeting with African American leaders.

So during this time that the president was trying to calm down people and tell them everything was ok - the stock market - aka your retirement accounts - were literally causing the second great depression.

https://en.wikipedia.org/wiki/2020_stock_market_crash#16_March

The **2020 stock market crash** is a global stock market crash that began on 20 February 2020.^{[1][2][3]} On 12 February, the **Dow Jones Industrial Average**, the **NASDAQ Composite**, and **S&P 500 Index** all finished at record highs (while the NASDAQ and S&P 500 reached subsequent record highs on 19 February).^{[4][5]} From 24 to 28 February, stock markets worldwide reported their largest one-week declines since the 2008 financial crisis,^{[6][7][8]} thus entering a correction.^{[9][10][11]} Global markets into early March became extremely volatile, with large swings occurring in global markets.^{[12][13]} On 9 March, most global markets reported severe contractions, mainly in response to the 2019–20 coronavirus pandemic and an oil price war between Russia and the OPEC countries led by Saudi Arabia.^{[14][15]} This became colloquially known as Black Monday. At the time was the worst drop since the Great Recession in 2008.^{[16][17]}

Three days after Black Monday there was another drop, Black Thursday, where stocks across Europe and North America fell more than 9%. Wall Street experienced its largest single-day percentage drop since Black Monday in 1987, and the **FTSE MIB** of the **Borsa Italiana** fell nearly 17%, becoming the worst-hit market during Black Thursday.^{[18][19][20]} Despite a temporary rally on 13 March (with markets posting their best day since 2008), all three Wall Street indexes fell more than 12% when markets re-opened on 16 March.^{[21][22]} At least one benchmark stock market index in all G7 countries and 14 of the G20 countries has been declared to be in bear markets.

As of March 2020, global stocks have seen a downturn of at least 25% during the crash, and 30% in most G20 nations. On March 20, **Goldman Sachs** warned that the **US GDP** would shrink 29% by the end of the 2nd quarter of 2020, and that unemployment could skyrocket to at least 9%.^[23] Australian Prime Minister **Scott Morrison** has called the looming economic crisis 'akin to the Great Depression'.^[24]

2020 stock market crash

Notice the dates -

February 20th - March 16th. This is when majority of americans realized coronavirus was not bullshit, this was when the average normie started panic selling. But what about politicians? When did they panic sell?

Four senators sold stocks before coronavirus threat crashed market

Michigan mayor calls on commissioner who joined protest against coronavirus restrictions

Four senators sold stocks shortly after a January briefing in the Senate on the novel coronavirus outbreak, unloading shares that plummeted in value a month later as the stock market crashed in the face of a global pandemic.

According to financial disclosure forms, Sens. Kelly Loeffler (R-Ga.), James Inhofe (R-Okla.), Dianne Feinstein (D-Calif.) and Richard Burr (R-N.C.) each sold hundreds of thousands of dollars in stocks within days of the Senate holding a classified briefing on Jan. 24 with Trump administration officials on the threat of the coronavirus outbreak.

KEY POINTS

- National Economic Council Director Larry Kudlow said the coronavirus fears won't dominate market direction forever.
- "The virus story is not going to last forever," Kudlow said. "I would suggest very seriously taking a look at the market, the stock market, that is a lot cheaper than it was a week or two ago."
- Stocks plunged for a second day, with the Dow tumbling about 1,800 points since Monday, after officials warned of a wide spread of the coronavirus in the U.S.

Larry Kudlow, director of the U.S. National Economic Council, speaks during a television interview at the White House in Washington, D.C. U.S. on Thursday, Jan. 30, 2020.
Alex Edelman | Bloomberg | Getty Images

National Economic Council Director Larry Kudlow said the coronavirus-triggered selloff has created a buying opportunity for long-term investors.

"The virus story is not going to last forever," Kudlow said on CNBC's on "The Exchange" on Tuesday. "To me, if you are an investor out there and you have a long-term point of view I would suggest very seriously taking a look at the market, the stock market, that is a lot cheaper than it was a week or two ago."

Stocks plunged for a second day, with the Dow Jones Industrial Average tumbling about 1,800 points since Monday, after officials warned of a wide spread of the coronavirus in the U.S.

"The markets obviously are reflecting new fears. A lot of volatility out there. I don't think these are fundamental factors ... This thing will run its course," Kudlow said.

Along with the drastic drop in stocks, the benchmark 10-year Treasury yield plunged to a record low of 1.31% on Tuesday.

The Centers for Disease Control and Prevention officials said the coronavirus is "likely" to continue to spread throughout the U.S. and outlined what schools and businesses should do if the disease becomes an epidemic.

Total confirmed cases globally have surged to more than 80,200 and at least 2,704 people have died of the coronavirus. Overnight, South Korea reported 60 new cases to bring the country's total to 893 infected, while China's National Health Commission reported 508 new confirmed cases and 71 new deaths.

Kudlow reassured investors that the U.S. has "contained" the coronavirus and it will likely not be an "economic tragedy."

So people lost some money, who cares right? Well your average every day person lost money, while again - the rich get richer through clever manipulation of information they are privy to.

Anyway - its just money, they print it and its worthless, whats more worthless is your life and the lives of your loved ones. With the information these people had - what did they suggest?

The World Health Organization (WHO) claimed there was no evidence of human to human transmission.

<https://twitter.com/WHO/status/1217043229427761152?s=20>

That tweet turned out to be completely false. And remember "The absence of evidence is NOT the evidence of absence". Reassuring people based off preliminary absence of evidence is literally insane.

So at first there was “No evidence of human to human transmission”, which was echoed by many people under the guise of “just live your lives there is nothing to worry about”. But then they told people not to buy or wear masks -

https://twitter.com/Surgeon_General/status/1233725785283932160?s=20

This is an advertisement from the World Health Organization.

So initially masks were NOT effective in preventing the general public from catching the coronavirus.

Then the WHO literally said do not wear a facemask if you are well.

In hindsight - this got people killed.

The trajectory for rates of infection were different for countries that had masks vs those that advised against it.

Here is some information on different masks - why did the WHO and CDC not give this information to the public???

WHAT MASK SHOULD I GET?

An educational chart to show how much each option protects YOU

LEVEL 1 - Surgical Masks, N95, Dust masks

The lowest amount of protection, When in a crowded area you have a high chance of being infected if healthy. Does not stop airborne infection, Only keeps you from infecting other people. Better than nothing. Don't trust your life on it.

Low particulate protection, Good at protecting against sneezes but no protection against airborne pathogens.

LEVEL 2 - Half Face Masks, Industrial particulate filters

The middle of the road option, The best in terms of cheapness. Usually single layered P3/P100 filters with no casing. A plastic casing around the filter is always better. When in a crowded area you have a 99.97% filtration rate of particulates in the air from infected people coughing. Does not protect against aerosols if someone sneezes directly on the filter, Change immediately and keep spare filters if someone sneezes on the filter while holding breath.

LEVEL 3 - Full Face Masks, NBC/CBRN(same thing) Masks

The most expensive option, But offers the best protection. Usually the filters have multiple P3 layers and have metal or plastic casing around the them to protect the filters against aerosols like mucus thrown out of someones mouth and nose. Filters all known inorganic, organic gases and particulates. If someone sneezes on you directly or coughs on you, The filter will most likely not get contaminated. When in a crowded area you have almost no chance of getting infected while wearing one of these.

They even went as far as to say masks INCREASE infection risk -

Use of Cloth Face Coverings to Help Slow the Spread of COVID-19

[Other Languages](#) [Print Page](#)

[Printer friendly version](#)

How to Wear a Cloth Face Covering

Cloth face coverings should—

- fit snugly but comfortably against the side of the face
- be secured with ties or ear loops
- include multiple layers of fabric
- allow for breathing without restriction
- be able to be laundered and machine dried without damage or change to shape

CDC on Homemade Cloth Face Coverings

[CDC recommends](#) wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies), **especially** in areas of significant community-based transmission.

CDC also advises the use of simple cloth face coverings to slow the spread of the virus and help people who may have the virus and do not know it from transmitting it to others. Cloth face coverings fashioned from household items or made at home from common materials at low cost can be used as an additional, voluntary public health measure.

Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the mask without assistance.

Right so now because three months went by, there was no social distancing for 2 months, and for 3 months no face masks were worn. We now know that there was ASYMPTOMATIC transmission from person to person for up to 21 days.

 Author information

Abstract

The 2002-3 pandemic caused by severe acute respiratory syndrome coronavirus (SARS-CoV) was one of the most significant public health events in recent history. An ongoing outbreak of Middle East respiratory syndrome coronavirus suggests that this group of viruses remains a key threat and that their distribution is wider than previously recognized. Although bats have been suggested to be the natural reservoirs of both viruses, attempts to isolate the progenitor virus of SARS-CoV from bats have been unsuccessful. Diverse SARS-like coronaviruses (SL-CoVs) have now been reported from bats in China, Europe and Africa, but none is considered a direct progenitor of SARS-CoV because of their phylogenetic disparity from this virus and the inability of their spike proteins to use the SARS-CoV cellular receptor molecule, the human angiotensin converting enzyme II (ACE2). Here we report whole-genome sequences of two novel bat coronaviruses from Chinese horseshoe bats (family: Rhinolophidae) in Yunnan, China: RsSHC014 and Rs3367. These viruses are far more closely related to SARS-CoV than any previously identified bat coronaviruses, particularly in the receptor binding domain of the spike protein. Most importantly, we report the first recorded isolation of a live SL-CoV (bat SL-CoV-WIV1) from bat faecal samples in Vero E6 cells, which has typical coronavirus morphology, 99.9% sequence identity to Rs3367 and uses ACE2 from humans, civets and Chinese horseshoe bats for cell entry. Preliminary in vitro testing indicates that WIV1 also has a broad species tropism. Our results provide the strongest evidence to date that Chinese horseshoe bats are natural reservoirs of SARS-CoV, and that intermediate hosts may not be necessary for direct human infection by some bat SL-CoVs. They also highlight the importance of pathogen-discovery programs targeting high-risk wildlife groups in emerging disease hotspots as a strategy for pandemic preparedness.

So we have established bats can directly infect humans. In 2015 - two years later this article comes out.

<https://www.nature.com/articles/nm.3985>

A SARS-like cluster of circulating bat coronaviruses shows potential for human emergence

Vineet D Menachery , Boyd L Yount Jr, Kari Debbink, Sudhakar Agnihothram, Lisa E Gralinski, Jessica A Plante, Rachel L Graham, Trevor Scobey, Xing-Yi Ge, Eric F Donaldson, Scott H Randell, Antonio Lanzavecchia, Wayne A Marasco, Zhengli-Li Shi & Ralph S Baric

So now we've established that there is a potential for human emergence.. But whats interesting here is WHY there is a potential for human emergence. Its because the researchers made a man-made chimera virus by combining two different viruses in order to give the virus artificial functions - extraordinary abilities that the virus in nature would not have.

The emergence of severe acute respiratory syndrome coronavirus (SARS-CoV) and Middle East respiratory syndrome (MERS)-CoV underscores the threat of cross-species transmission events leading to outbreaks in humans. Here we examine the disease potential of a SARS-like virus, SHC014-CoV, which is currently circulating in Chinese horseshoe bat populations¹. Using the SARS-CoV reverse genetics system², we generated and characterized a chimeric virus expressing the spike of bat coronavirus SHC014 in a mouse-adapted SARS-CoV backbone. The results indicate that group 2b viruses encoding the SHC014 spike in a wild-type backbone can efficiently use multiple orthologs of the SARS receptor human angiotensin converting enzyme II (ACE2), replicate efficiently in primary human airway cells and achieve *in vitro* titers equivalent to epidemic strains of SARS-CoV. Additionally, *in vivo* experiments demonstrate replication of the chimeric virus in mouse lung with notable pathogenesis. Evaluation of available SARS-based immune-therapeutic and prophylactic modalities revealed poor efficacy; both monoclonal antibody and vaccine approaches failed to neutralize and protect from infection with CoVs using the novel spike protein. On the basis of these findings, we synthetically re-derived an infectious full-length SHC014 recombinant virus and demonstrate robust viral replication both *in vitro* and *in vivo*. Our work suggests a potential risk of SARS-CoV re-emergence from viruses currently circulating in bat populations.

An Italian news network called TGR in 2015 covered this story: watch video here:
<https://www.youtube.com/watch?v=kjLKIKPUnc>

The researchers were both of American and Chinese nationality. And as the news network noted - the USA government called for a moratorium on virus research, and also suspended its research of this virus.

Severe Acute Respiratory Syndrome Coronavirus as an Emerging and Reemerging Infection

Vincent C. C. Cheng, Susanna K. P. Lau, Patrick C. Y. Woo, and Kwok Yu

State Key Laboratory of Emerging Infectious Diseases, Department of Microbiology, Research Centre Immunology, The University of Hong Kong, Hong Kong Special Administrative Region, C

SARS-CoV AS AN AGENT OF EMERGING/REEMERGING INFECTION 683

or immunization (Table 10). The Koch's postulates for SARS-CoV as a causative agent of SARS were first demonstrated in a primate model using cynomolgus macaques (*Macaca fascicularis*), which demonstrated clinical and pathological similarities to those found in humans. In contrast, African green monkeys (*Cercopithecus aethiops*) did not develop significant lung pathology with the SARS-CoV. The lack of consistency between models of rhesus, cynomolgus, and African green monkeys for experimental SARS was noted in another review; these large mammals are expensive and difficult to maintain. BALB/c mice demonstrated asymptomatic infection in lungs and nasal turbinates by intranasal inoculation, which was not significantly different from the findings in immunological Th1-biased C57BL/6 mice that were 12 to 14 months old developed pneumonia, which correlated with the susceptibility to acute SARS in humans (287). As 11-knockout-immunodeficient mice had fatal disease (143). Transgenic mice expressing ACE2 receptors also developed fatal disease, with dissemination to many organs including the brain. It is interesting that mouse-adapted SARS-

SHOULD WE BE READY FOR THE REEMERGENCE OF SARS?

The medical and scientific community demonstrated marvelous efforts in the understanding and control of SARS within a short time, as evident by over 4,000 publications available online. Despite these achievements, gaps still exist in terms of the molecular basis of the physical stability and transmissibility of this virus, the molecular and immunological basis of disease pathogenesis in humans, screening tests for early or cryptic SARS cases, foolproof infection control procedures for patient care, effective antivirals or antiviral combinations, the usefulness of immunomodulatory agents for late presenters, an effective vaccine with no immune enhancement, and the immediate animal host that transmitted the virus to caged civets in the market at the beginning of the epidemic. Coronaviruses are well known to undergo genetic recombination (375), which may lead to new genotypes and outbreaks. **The presence of a large reservoir of SARS-CoV-like viruses in horseshoe bats, together with the culture of eating exotic mammals in southern China, is a time bomb.** The possibility of the reemergence of SARS and other novel viruses from animals or laboratories and therefore the need for preparedness should not be ignored.

What about the USA government? How far back were they studying this virus?
Well seeing as there is a patent for SARS-COV isolated from humans which was filed in **2003**.... It's approximately 20 years since they had to have done research on it well before they filed the patent.

Coronavirus isolated from humans

Abstract

Disclosed herein is a newly isolated human coronavirus (SARS-CoV), the causative agent of severe acute respiratory syndrome (SARS). Also provided are the nucleic acid sequence of the SARS-CoV genome and the amino acid sequences of the SARS-CoV open reading frames, as well as methods of using these molecules to detect a SARS-CoV and detect infections therewith. Immune stimulatory compositions are also provided, along with methods of their use.

Notice how the virus was assigned to “The government of the united states of America as Represented by the Secretary of the Department of Health”. This is the guy:

Michael O. Leavitt

founder

Michael O. Leavitt is the founder of Leavitt Partners, where he helps clients navigate the future as they transition to new and better models of care. He served as administrator of the Environmental Protection Agency and secretary of Health and Human Services in President George W. Bush's administration and served three terms as governor of Utah.

March 5

Michael Leavitt: To prepare for coronavirus, here's what all of us must do

When it comes to a pandemic, there is a role for everyone to play. For the world to be prepared, every nation, every city, every business, every school, every hospital, every clinic, every church, and every household needs a plan.

Notice how hes now a Fox News contributor. He even wrote an opinion column on the Coronavirus:

<https://www.foxnews.com/opinion/michael-leavitt-to-prepare-for-coronavirus-heres-what-all-of-us-must-do>

OPINION · Published March 5

Michael Leavitt: To prepare for coronavirus, here's what all of us must do

In this article this man literally lies and says we have no clue about this virus when in fact - a patent on the virus was assigned to him during his service as secretary of health!!

Preparing for tomorrow

Now coronavirus – or as it is scientifically called, COVID-19 – is spreading around the world. I need not repeat the statistics. We are all following this daily. This looks like the real deal.

There is much we do not yet know. Public health officials will tell us what they know about how it spreads and update us when they learn more. We don't know how virulent the virus is. We do know that lives are being lost, and pandemic viruses can be vicious killers.

The situation creates uneasiness, and a question of what action we should take. At this time, it is important to be informed and to plan.

Wouldn't it be nice if this flames out like many of these viruses do? However, if it doesn't, we must be ready. We have one great advantage in this realm over those who lived in the past: we have a far greater capacity to prepare.

Never have we possessed such a wealth of knowledge about the problem and such a strong ability to prepare. The ultimate weapon in preparing for a pandemic is a vaccine. The goal of developing and stockpiling vaccines is simply stated, but not easily achieved.

Developing and stockpiling vaccines is not a job for any one government. It is not even a job for any one nation. It requires cooperation between nations, cooperation between different government entities within nations, and cooperation between governments and the private sector.

Pandemic preparedness requires that all these different elements work together. The better they do so, the better prepared we will be, as a species.

Realistically, a COVID-19 vaccine is six to nine months away in a best-case scenario. Pandemic viruses tend to come in waves. Typically, there is more than one wave. So a vaccine will help on subsequent waves, but not the first one. In this first wave, prevention and avoidance are our only options.

So now do you understand what you're dealing with? He said it himself - the vaccine is six to nine months away IN A BEST CASE SCENARIO. There is more than one wave so we need the vaccine.

Now I know some of you must be reading and thinking that this is SARS-COV were talking about, not SARS-COV2 - well it turns out that SARS-COV2 is 79.6% EXACT MATCH to SARS-COV patented by the government, and also 96% EXACT MATCH to already existing bat coronavirus genomes. The same bat coronaviruses which were studied for DECADES by USA and China. The virus used the same ACE2 receptor that was discussed 2013 article from above. Further more - this article is from january 20th 2020.

Since the outbreak of severe acute respiratory syndrome (SARS) 18 years ago, a large number of SARS-related coronaviruses (SARSr-CoVs) have been discovered in their natural reservoir host, bats^{1–4}. Previous studies have shown that some bat SARSr-CoVs have the potential to infect humans^{5–7}. Here we report the identification and characterization of a new coronavirus (2019-nCoV), which caused an epidemic of acute respiratory syndrome in humans in Wuhan, China. The epidemic, which started on 12 December 2019, had caused 2,794 laboratory-confirmed infections including 80 deaths by 26 January 2020. Full-length genome sequences were obtained from five patients at an early stage of the outbreak. The sequences are almost identical and share 79.6% sequence identity to SARS-CoV. Furthermore, we show that 2019-nCoV is 96% identical at the whole-genome level to a bat coronavirus. Pairwise protein sequence analysis of seven conserved non-structural proteins domains show that this virus belongs to the species of SARSr-CoV. In addition, 2019-nCoV virus isolated from the bronchoalveolar lavage fluid of a critically ill patient could be neutralized by sera from several patients. Notably, we confirmed that 2019-nCoV uses the same cell entry receptor—angiotensin converting enzyme II (ACE2)—as SARS-CoV.

I hate to take it there, but the question is - how the hell did the governments drop the ball on this? THEY CREATED THE VIRUS, THEY STUDIED THE VIRUS. How did they not know the mode of transmission? How did they not know what to do or be prepared? The only logical conclusion is that they pretended to not know with maliciously sinister intent to allow the virus to proliferate.

Why would they do this? Open your eyes. This virus is completely known. They were already working on the vaccine even before the outbreak.

Israeli scientists: 'In a few weeks, we will have coronavirus vaccine'

Once the vaccine is developed, it will take at least 90 days to complete the regulatory process and potentially more to enter the marketplace.

By MAAYAN JAFFE-HOFFMAN APRIL 13, 2020 11:24

"Let's call it pure luck," he said. "We decided to choose coronavirus as a model for our system just as a proof of concept for our technology."

But after scientists sequenced the DNA of the novel coronavirus causing the current worldwide outbreak, the MIGAL researchers examined it and found that the poultry coronavirus has high genetic similarity to the human one, and that it uses the same infection mechanism, which increases the likelihood of achieving an effective human vaccine in a very short period of time, Katz said.

"All we need to do is adjust the system to the new sequence," he said. "We are in the middle of this process, and hopefully in a few weeks we will have the vaccine in our hands. Yes, in a few weeks, if it all works, we would have a vaccine to prevent coronavirus."

This article was originally written at the end of February and was updated on April 7.

“Let’s call it pure luck” Lets call that bullshit.

Israeli scientist granted US patent for novel coronavirus vaccine design

Press Trust of India | Tel Aviv

Last Updated at April 19, 2020 22:12 IST

And it begins. Now they have what they want. A deadly virus, and a public ready to accept the cure. And as of literally TODAY! A scientist is granted the patent for a novel coronavirus vaccine.

Closing thoughts

The novel coronavirus - SARS COV2 was created in a lab. There is proof that this virus is almost identical to previously lab created coronaviruses. The city of Wuhan where the virus originally had its outbreak - is home of a virology lab where it is presumed that this virus “leaked” out from. All the predictive programming revealed that this virus was planned from a very long time ago. There are people that have already made a financial gain from this pandemic and there are people right now as we speak with their mouths watering looking to reap profits from the havoc that they have caused. The media will never report on this information or be as bold to insinuate anything written in here. That is because the media is controlled by intelligence agencies to pour misinformation propaganda into the general public to make keep the population under control and docile. This is just the tip of the iceberg. There are many unanswered questions that you should investigate.

Watch this video titled “Out of Shadows” which is a documentary that lifts the mask on how the mainstream media & Hollywood manipulate & control the masses by spreading propaganda throughout their content. The goal is to wake up the general public by shedding light on how we all have been lied to & brainwashed by a hidden enemy with a sinister agenda.
