

# Free Minecraft Hosting: what should you Know?

Minecraft the game that had been there for long has seen numerous changes. But, despite all these changes, the game has continued to be the favorite of the present. If you want to set up a small Minecraft server on your home computer to play with one or two of your friends, you simply need to set up Minecraft in Linux or Putty. Follow these steps to start a Minecraft hosting service in the event that your Windows operating system is installed.

Download the Minecraft software directly from the official Minecraft website. It is recommended to save it in a folder that will contain all your Minecraft files in the future. Before you begin, make sure Java version 6 or higher is installed on your computer. This is necessary because the versions have issues that could make the installation of the downloaded software nearly impossible. Done this, proceed with the executable file, and then open it, and click open. This initiates the automatic configuration of the Minecraft host server on your computer. Don't pay attention to the error messages that might pop up between. Guimods.com Upon its completion you will need to increase the memory of your Minecraft server. Simply open a notepad , and copy the following code.

```
"C:\Program Files\Java\jre6\bin\javaw.exe" -Xmx2048M -Xms2048M -jar  
"Minecraft_Server.exe". This file retrieves the Minecraft server file you use to set up the  
Minecraft server. After you've completed this, you'll have to rename it as "run.bat". It should  
be saved in your Minecraft folder. In this way, you increased the memory of your Minecraft  
server from 100MB to 2GB, which is considered to be adequate to play the game for some  
time.
```

But, when the game starts increasing in intensity and more of your friends joining in the excitement, your computer may be unable to cope up with the extra pressure it's required to deal with. This could result in the game being interrupted several times and can be annoying. This can be interpreted as a signal to warn you to the need for an online server that is paid for the same. A paid server will offer greater stability and better performance which allows you to enjoy the full thrill of the game. If you choose to use a paid service for your Minecraft game would never create an environment where you're forced to regret your choice. Minecraft allows you to express your creativity and adventure spirit. The hunt for treasure in the game is made dangerous with the presence of angry monsters which are waiting to be spotted there. If you are too close to them, you get killed. You must also find all the treasure you have previously hunted in the past when you restart the game. All of this is lost when you die.
