

Can I Put My Hands Into Ultrasonic Cleaning Solution

<https://www.bjultrasonic.com/can-i-put-my-hands-into-ultrasonic-cleaning-solution/>

Can the Hands Be Immersed in the Ultrasonic Cleaning Solution While the Cleaning Process Is Ongoing ? Immersing the hands in the cleaning bath during the cleaning process is not advisable. When an ultrasonic cleaning process is ongoing, ultrasonic power produces ultrasonic waves that act on the cleaning solution to create cavitation bubbles. The implosions of these bubbles are intense and produce powerful energy. The implosions can cause skin irritations while the energy from implosions can harm the tissues of the joints. Rheumatic diseases can develop when joint tissues are harmed.

Beijing Ultrasonic

[Beijing Ultrasonic](#) is a leading ultrasonic products manufacturer, providing [ultrasonic cleaners](#), [immersible ultrasonic transducer](#), [ultrasonic generator](#), [ultrasonic transducer](#) , [ultrasonic atomizer](#) and [piezoceramics](#).
