

Minecraft Console Commands And Cheats

Work hard: If it's not your thing, there's always cheating and console commands. What better way to conquer the sprawling sandbox that is a Minecraft world than opening the command bar, entering certain words and symbols, and magic-ing yourself up a prissy clippy-cloppy pony with diamond armour?

A console command is more than simply a string of letters. They can change the world, from killing all enemies around you to melting every metal in your inventories. Some people may call this cheating but we see it as simply a way to save time and letting you get on with your amazing Minecraft project.

How do you enter Minecraft commands? Luckily, Minecraft console commands are wonderfully simple to use; they're similar to entering Minecraft seeds. When you're creating a brand new Minecraft world you'll be prompted to select whether or not you want to allow cheating. After choosing yes and loading up the world, you'll have to press the "C" key to pull up the command bar, which is where you'll enter all cheats and commands.

Any command you type in single player needs to be prefixed by forward by a slash (/); multiplayer commands will not work with this prefix.

It's now a simple case of entering the desired command, then pressing the "Enter" key.

Minecraft cheats and console commands

Target selector shortcuts @p- nearest player @r - random player @a All players @e - all entities @s - the person who executes the command Target selector variables set a specific target without typing out their full name. Below are five shorthand commands. You'll be accustomed to seeing these when playing on the top Minecraft servers.

Help /help [CommandName] Gives you more information about the command.

Give/give [Amount] to give an item from your inventory to a different player. Example: give PCGamesN minecraft:planks 13. This would give PCGamesN 13 Spruce Wood Planks. This command is simpler when giving single objects, but it can be useful for stackable objects.

Teleport /tp [TargetPlayer] to instantly transport you or another player to a specific place in the world. The coordinates can be substituted with the name of another player to transport the target directly. You can also teleport to a different world using these Minecraft maps.

Kill /kill Kills your characters, and adds the name of another player to apply the command.

Weather /weather WeatherType enables you to select the weather or the world. The options include snow, thunder, and rain.

Creative mode /gamemode creative Changes the game mode to Creative mode that allows players to fly unlimited resources and also prevents mobs from attacking you.

Survival mode/gamemode survival changes the gamemode to Survival mode, which means mobs will attack you, and you'll need to gather all resources the old-fashioned way.

Time /time set 1000 Sets the day's date and time. For dawn, noon and night, replace "1000" by "0", "6000" or "12000" and "18000" respectively.

Change difficulty to Peaceful/difficulty peaceful Changes difficulty to Peaceful/difficulty peaceful. For more difficulty Replace "peaceful" with "easy", "normal", or "hard".

How to find the seed code of your world's population This will generate a code for your world, note it down to be able to load a similar one in the future.

Keep inventory when you die. / game rule keepInventory true. It ensures that you don't lose your items upon dying. To revert this simply type "false" instead of "true"

Stop time /gamerule doDaylightCycle true This will stop the game's day/light cycle from taking its place, allowing you to live under permanent sunshine or moonlight. To restart the day/light cycle, enter "/gamerule doDaylightCycle true".

Summon /summon Instantly drops the desired creature or object into your world. This is especially useful for those who are short on Ocelots that are tame.

Atlantis mode/atlantis Dramatically raises the level of the oceans, submerging all except the highest mountains.

Ride/ride Transforms any creature you are facing into a mount.

Instant mine /instantmine One-click mining with any tool.

Freeze/freeze Stops mobs from their tracks.

Fall damage/falldamage Turns on fall damage.

Fire damage/firedamage turns on or off the fire damage

Water damage /waterdamage Turns water damage on and off.

Superheat/Smelt item turns everything into smelted.

Instant plant/instantplant There is no need to wait for a seed to grow.
isrse37

Dropstore/Store Items All inventory items are stored in a chest that spawns close to.

Items damaged or damaged by items are no longer subject to degradation or damage.

Duplicate/duplicate copies , then drop the stack of items that you have equipped.

That's all the Minecraft console commands will be required to improve your game and take the hard work out of crafting. But what next? Maybe you can make your game even more impressive by using these Minecraft mods. They'll make your game even more thrilling than Mojang ever imagined. They could even bring Pokemon into your world!
