

SOCIONICS MODEL M vol. 2

Tuukka Virtaperko
Released into public domain

New in this version: an explanation about why a new model was made.

Types of MODEL M

Some types of Model A have been renamed. Specifically, each perceiving extrovert of Model A has been renamed as an introvert, and each perceiving introvert of Model A has been renamed as an extrovert. This modification is necessary because the Information Elements have been modified. A list of renamed types:

MODEL A	MODEL M
ENTp	-> INTp
ISFp	-> ESFp
INFp	-> ENFp
ESTp	-> ISTp
INTp	-> ENTp
ESFp	-> ISFp
ISTp	-> ESTp
ENFp	-> INFp

Information Elements

Deviations from Model A are marked by !

MODEL A	MODEL M
Se	Si !
Si	Se !
Fi	Fi
Fe	Fe
Ti	Ti
Te	Te
Ne	Ni !
Ni	Ne !

In some documents Si and Se are denoted by "Ri" and "Re". The letter R stands for "resilience".

Logical Progression Chart of MODEL M

This chart defines relations between types.
Deviations from Model A are marked by !

ALTERED VARIABLES	RELATIONSHIP	EXAMPLE
1st	CONTRARY	ENTp - INTp
1st, 2nd	IF -p, SEMI-DUAL	ENTp - ISTp
	IF -j, ILLUSIONARY	ENTj - ISTj
1st, 3rd	IF -p, ILLUSIONARY	ENTp - INFp
	IF -j, SEMI-DUAL	ENTj - INFj
1st, 4th	QUASI-IDENTICAL	ENTp - INTj !
1st, 2nd, 3rd	DUAL	ENTp - ISFp
1st, 2nd, 4th	-j BENEFACTOR TO -p	ENTp < ISTj !
1st, 3rd, 4th	-p BENEFACTOR TO -j	ENTp > INFj !
1st, 2nd, 3rd, 4th	ACTIVE	ENTp - ISFj !
2nd	IF -p, LOOK-A-LIKE	ENTp - ESTp
	IF -j, COMPARATIVE	ENTj - ESTj
2nd, 3rd	SUPER-EGO	ENTp - ESFp
2nd, 4th	-j SUPERVISOR TO -p	ENTp > ESTj !
2nd, 3rd, 4th	CONFLICTING	ENTp - ESFj !
3rd	IF -p, COMPARATIVE	ENTp - ENFp
	IF -j, LOOK-A-LIKE	ENTj - ENFj
3rd, 4th	-j SUPERVISOR TO -p	ENTp < ENFj !
4th	MIRROR	ENTp - ENTj !

Why has MODEL A been changed?

The initial motive for altering model A is that of reversing the introversion and extroversion of Information Elements Ni, Ne, Si and Se.

Ni of model M creates narratives about the present moment. These narratives are not the present moment. Instead, they explain what has brought us to our current situation.

This Information Element is introverted because the narratives aren't perceived by others unless they are shared. Sharing them requires some method, such as symbols or language.

Ne of model M is the present moment in episodic time. This Information Element is extroverted because sharing it doesn't require a method. For example, seeing a certain person in a certain place is readily understood without language.

Se of model M is the present moment in empirical time. "Empirical time" means time that can be measured by using a stopwatch. This Information Element is extroverted because it refers to immediate perceptions of sensory stimuli.

Si of model M is introverted because it doesn't refer to immediate perceptions of stimuli. Instead, it refers to interpretations about what do immediate perceptions mean in a social context. This Information Element is introverted because it involves the self in relation to other beings, whereas Se could involve nothing else than succeeding at performing a particular motorbike stunt.

In general, introverted Information Elements relate perceptions to the self whereas extroverted Elements do not. This is why those who have strong and valued Extroverted Intuition are described to behave in a confusing manner. They do not relate to their surroundings as selves because they conflate themselves with their surroundings. Which is an extroverted thing to do.
