### Question No. 1

Clients are unable to access a company's API to obtain pricing data.

a. An analyst discovers sources other than

clients are scraping the API for data, which is causing the servers to exceed available resources. Which of the

following would be BEST to protect the availability of the APIs?

- A. IP whitelisting
- B. Certificate-based authentication
- C. Virtual private network
- D. Web application firewall

**Answer: A**

### Question No. 2

While conducting a cloud assessment, a security analyst performs a Prowler scan, which generates the following within the report:

```
7.74 [extra774] Ensure credentials unused for 30 days or greater are disabled
PASS! User admin has logged into the console in the past 30 days
PASS! User SecOps has logged into the console in the past 30 days
INFO! User CloudDev has not used access key 1 since creation
FAIL! User BusinessUsr has never used access key 1 and not rotated it in 30 days
PASS! No users found with access key 2 enabled
```

Based on the Prowler report, which of the following is the BEST recommendation?

- A. Delete CloudDev access key 1.
- B. Delete BusinessUsr access key 1.
- C. Delete access key 1.
- D. Delete access key 2.

**Answer: D**

### Question No. 3

A company's Chief Information Officer wants to use a CASB solution to ensure policies are being met during cloud access. Due to the nature of the company's business and risk appetite, the management team elected to not store financial information in the cloud. A security analyst needs to recommend a solution to mitigate the threat of financial data leakage into the cloud. Which of the following should the analyst recommend?

- A. Utilize the CASB to enforce DLP data-at-rest protection for financial information that is stored on premises.
- B. Do not utilize the CASB solution for this purpose, but add DLP on premises for data in motion.
- C. Utilize the CASB to enforce DLP data-in-motion protection for financial information moving to the cloud.
- D. Do not utilize the CASB solution for this purpose, but add DLP on premises for data at rest.

**Answer: C**

#### Question No. 4

The steering committee for information security management annually reviews the security incident register for the organization to look for trends and systematic issues. The steering committee wants to rank the risks based on past incidents to improve the security program for next year. Below is the incident register for the organization.

Date	Department impacted	Incident	Impact
January 12	IT	SIEM log review was not performed in the month of January	- Known malicious IPs not blacklisted - No known company impact - Policy violation - Internal audit finding
March 16	HR	Termination of employee; did not remove access within 48-hour window	- No known impact - Policy violation - Internal audit finding
April 1	Engineering	Change control ticket not found	- No known impact - Policy violation - Internal audit finding
July 31	Company-wide	Service outage	- Backups failed - Unable to restore for three days - Policy violation
September 8	IT	Quarterly scans showed unpatched critical vulnerabilities (more than 90 days old)	- No known impact - Policy violation - Internal audit finding
November 24	Company-wide	Ransomware attack	- Backups failed - Unable to restore for five days - Policy violation
December 26	IT	Lost laptop at airport	- Cost of laptop \$1,250

Which of the following should the organization consider investing in FIRST due to the potential impact of availability?

- **A.** Hire a managed service provider to help with vulnerability management
- **B.** Build a warm site in case of system outages
- **C.** Invest in a failover and redundant system, as necessary
- **D.** Hire additional staff for the IT department to assist with vulnerability management and log review

**Answer: C**

#### Question No. 5

A security analyst has been alerted to several emails that show evidence an employee is planning malicious activities that involve employee PII on the network before leaving the organization. The security analyst's BEST response would be to coordinate with the legal department and:

- **A.** the public relations department
- **B.** senior leadership
- **C.** law enforcement
- **D.** the human resources department

**Answer: D**
