

LAAAC

Los Angeles Aging Advocacy Coalition

Mission: To advocate for, preserve, protect and enrich the quality of life for older persons, their families and caregivers in Los Angeles County and statewide by forging joint advocacy efforts to influence fiscal and public policy in the field of aging.

Purpose: To function as a common meeting ground for professionals and others interested in the field of aging.

Guiding Principles: The primary guiding principles of LAAAC are to **Inform, Educate, and Engage.**

Over 1.6 million seniors call Los Angeles County their home. Los Angeles County has the highest number of seniors in California, and the number of seniors is projected to double by 2030. Today, while California's aging population continues to rapidly grow, its safety net faces proposed eliminations.

The Los Angeles Aging Advocacy Coalition seeks to build a formal and united alliance to:

Inform elected and appointed officials, and policy makers on issues affecting aging adults

Educate our members and community through enriched training and informational opportunities

Engage in the planning, design and implementation of service delivery and coordination models, while providing a forum to promote professional networking that supports our advocacy efforts on issues affecting the well-being of older adults & their caregivers
