## PEM Quiz 2018 ANSWER SHEET

lev 1 best result - berh got 11,23p and Mielz 10,98p out of 13p possible for 1.1+1.2

Name 6 internals (name/number) which include a text inside them.

Level	Text - up to 0,5p for full answer
18 SPIRAL	SPIRAL
32 STEEP CORNER	START
43 HEHE	HE HE
46 BOWLING	MUE. Theres also an "?" but nobody said. MUE was enough for 0,5p
48 DOWNHILL	TRY AGAIN, SLOW DOWN, I WARNED YOU!!! Some people knew a mix of 2, nobody knew all
55 MORE LEVELS	WWW.ELASTOMANIA.COM VISIT OUT HOMEPAGE FOR MORE LEVELS Nobody knew full answer. E.g. "visit www.elastomania.com for more levels" " was enough to get 0,4p

Averagely people had 3 correct answers, usually followed by correct text.

Nobody knew all 6 levels, some knew 5 though.

Berh 7,23p and Mielz 6,98p out of 9p possible

1.1. Is the fastest public SL replay of shown route faster than official (#401) WR? Tick the faster option. Many correct answers, around half of people had 4/4p

☒ SL ☐ WR 1p

☐ SL ☒ WR 1p

☒ SL ☐ WR 1p

☐ SL ☒ WR 1p

27 SL is around 0,1s faster than WR. 22 and 46 were imaginary routes. Some people said "i didnt know such style exists" :D well, im quite sure there were some attempts (at least the 22) but these are basically slow

2.1 Name one battle levpack name that are/were made by these kuskis (eg. ZroXX or daquiXXX). The core matters; amount of Xs is optional.

At first i wanted to ask for 5 packs, but it would be just too much to mention

Most people had quite low results.

Best result was by berh who got 11/12 correct answers. The only wrong one from him was "pawqXX" instead of e.g. "pawqBX" or "pawqPXX" D:

### lev 3 - BO NIE POMYSŁ, ACZ TECHNIKA ZROBI Z CIEBIE ZAWODNIKA

This was the hardest question as expected. It required some nice connection of riddle solving and elma technique knowledge. Style ideas didnt give points, because Zworqy has "great volt ideas"  
 Nobody had high result, but some nice job by PEMguys anyways!  
 Berh had most with 6,25p/8p

Zworqy asks:	Attachment:	Your answer:
Damn, i cant hang the apple and get back up. Any tips? You <b>HAVE TO</b> hang, but i keep falling. HELP! P.S. Bismuth does a weird laughs at me again.		<b>Set high fps</b> Remember the "Bismuth messes with eolconf.exe" part in question? Connect it with the "P.S." part in message. Bismuth changed FPS to low and you cant get the grip. Around half people knew
Help me fast, its a short battle! TL put a fucked up flower inside ground and you have to bug into inside. I press brake on the Vshaped place but it doesnt work. I'm stuck! What should i do? P.S. i just did a sicko slide in a battle, even zweq was amazed! plz check replay after.		<b>Set low fps</b> Look at the P.S. part. Zworqy did a slide so it seems he has high fps. He needs low fps to bug inside. Around half people knew
My fingers start to hurt. I do alo, then right. Of course i keep gasing the way you see. But i keep hitting head. <b>IM SURE</b> i have to do the spin, cause its faster. Turn at the last moment doesnt help either. Any ideas? Cheers.		<b>Spinboosting (nobody said the 2 techniques of it though)</b> <b>Low fps</b> Nobody mentioned both, each answer had a few guessers

<p>What a kicker, LOL! I have to squeeze through the hole smaller than wheel on the start. But i <b>HAVE TO</b> hang on the vsync on bottom. Cant get in because of killer. I tried multiple FPS but its either start or end that works. Please help, what is the trick?</p> <p>P.S. i cant use any non-eol external programs. I dont like cheating.</p>		<p><b>Press printscreen</b></p> <p>Nobody knew, but i gave points for “put timer on at beginning” and “ingame +/- zoom” as they MAY indeed work in specific circumstances. Also only like 3 people answered like that and i decided to award these as they show a good technical understanding</p>
--	---	--

3.2 There are 3 zweq spin types. Please describe the key techniques of each - what and when to press? Assume you are already spinning. (3x 1p)

Mark the technique that would allow you to go up a slope. (1p).

- just alo

- **aloing and turn-turn to make backwheel gas at the ground**

- **brake with fronthwheel, gas with second wheel <- slope one**

Berh had close to full result with 3,5/4p. Most had at least 2 close-to correct enough answers but often brake technique was not described correctly. And many knew brake is needed for slope
