So you are confused about whether to shop for [handguns for sale](#) with a long barrel or not. If you are confused about whether to order firearms with a long barrel, you are unaware of the benefits of using this kind of gun. To make your doubt clear regarding this subject matter, we are here with some proven benefits that will surely convince you to buy this kind of gun for satisfying your shooting purpose. Without wasting time, let us discover the more significant advantages associated with purchasing this handgun.

### **Advantages-**

#### **1- Accuracy-**

The primary advantage of using **long barrel handguns** is the maximized side radius, a longer distance between rear sights and front sights. This permits the shooter bit more precision in aiming at targeting long distances. Being that said, many shooters have an uncanny ability to hit targets reliably at a distance to 2000 yards with the snub-nosed revolver. The short, long barrel is more inherently accurate than the short barrel, all else being equal. More importantly, a long barrel puts more distance between the rear sight and front sight. This thus provides you longer sight radius and thus improving accuracy.

#### **2- Velocity-**

Another plus point that [long barrel handguns](#) is having is efficiently burned the powder charge, providing greater velocities and better exterior and terminal ballistics. This is particularly important to those who hand load their ammo. For the guns with the short-sized barrel, shooters use faster burning powders such as WW231, bullseye, HP-38, so the powder is not wasted. Slower burning powder such as H110, 2400 allows themselves better toward longer barrel weapon as their ignition rate give up greater velocities and flatter trajectories.

#### **3- Safer and easier-**

Firing ammo tailored for **long barrel handguns** are 100% safe to fire in snubbies. A long heavier gun will recoil less, making it easier and faster to shoot and reacquire the target.

### **How can you say a long barrel is the right fit for you?**

Despite it being a revolver or pistol, the barrel's length impacts many things and must be taken into account when picking up the right gun for you. Long barrel offers more accuracy, but they are not easier to hide in a concealed application. Another benefit of using a long barrel is target visibility as well as sight alignment.
