

## Cure cancer immediately!

**Treat cancer using a new method that is easy for everybody to employ, costs only \$20 dollars (at least 5 dollars) and cures in all cases!**

**The cancer will be cured guaranteed.**

There are people who are being miraculously cured within 1-2 weeks!

Remark:

Before you read this document, please send it to at least 10-20 (other) cancer patients. They will benefit as well.

There is a way to treat cancer that is very easy to employ and causes no side effects. There are people who are being **miraculously cured within only 1-2 weeks!**

This method uses 2 compounds, Quercetin and Vitamin C (ascorbic acid form) that are mixed together in a 0.5 L water bottle. While taking this, you also need to take Vitamin E, 400+ IU a day. Optionally, you can add green tea extract to the mix in order to make it 100+ times stronger.

Instructions:

- 1 Buy a 0.5L water bottle.
- 2 Buy Quercetin + Vitamin C (ascorbic acid form) from vitamin stores, such as on the internet: (press ctrl+left to open in new window)  
<http://www.vitacost.com/vitacost-quercetin-vitamin-c>  
<http://www.vitacost.com/natrol-quercetin>  
<http://www.puritan.com/natrol-brand-0076/quercetin-250-mg-039139>

or

Go to google.com and type: buy Quercetin + Vitamin C [ENTER] for example.

or

You can find Quercetin + Vitamin C everywhere in vitamin stores, depending on which country you are located in.

Also buy 400+ IU vitamin E and green tea extract from internet or vitamin stores: (press ctrl+left to open in new window)

<http://www.vitacost.com/vitacost-natural-vitamin-e-400-iu-100-liquid-capsules-10>

<http://www.vitacost.com/vitacost-green-tea-extract-standardized>

- 3 Select the fastest shipping option and you will receive your cure faster!
- 4 If you have any questions or remarks you can send them to [treatcancerinfo@gmail.com](mailto:treatcancerinfo@gmail.com)

5 When the cure has arrived, open the package and there is your quercetin + vitamin c. Open the capsule containing both quercetin + vitamin c and sprinkle the content in the 0.5L bottle. Open another capsule so that you get approximately 500 mg Quercetin and 500-1500 mg vitamin C.

**Shake the bottle very well several times.**

6 The bottle now contains a very potent anti-cancer potion. Drink it slowly, or it may cure too fast and cause tumor lysis syndrome. Take 1 sip (15 mL), wait 5 hours and then **if there are no side effects**; Take 1 sip again.

**While doing this, take 400+ IU vitamin E a day!**

OPTIONAL: If you can't find Quercetin and vitamin C together in 1 supplement, you can buy them both as standalone supplements and mix them together in the 0.5 L water bottle. Take approximately 500 mg Quercetin and 500-1500 mg Vitamin C.

7 If the mix doesn't work enough, you should drink more of the bottle. **VERY IMPORTANT:** It should be noted that you should wait approximately 15 minutes each time you take a sip (15 mL) out of the mixture. Taking more than a sip won't make it work stronger. Why? This is explained later. Every time you take a sip, you should shake the bottle a bit first. If after a week it still does not work enough, take green tea extract along with the mix. This can make the mix 100+ times stronger. So be careful and start with a low dosage.

8 Again, if you have any questions, remarks or you want to share treatment results you can send them to [treatcancerinfo@gmail.com](mailto:treatcancerinfo@gmail.com)

9 Now read the message on page 6. It's about supporting us.

## This theory explains how Quercetin/ Flavonoids work:

Quercetin is an antioxidant. It neutralizes free radicals. While doing so this quercetin changes to a radical molecule. For example it neutralizes 4 radical molecules and becomes a radical molecule with 4 radicals.

Then it sticks to DNA (covalent binding). Because there is no water present there, it stays a radical molecule.

When a cell divides, water nears this molecule so it reacts with water causing OH radicals killing the cell.

Normal cells always repair their entire DNA before cell division, so the radical flavonoid molecule is removed. So normal cells stay unharmed.

Cancer cells divide before they have repaired their entire DNA, so they die.

So it's actually a bomb.

A flavonoid molecule is like a bomb that explodes if it's not removed before a cell tries to divide. Cancer cells that divide before reparation die, because the bomb isn't removed, so it explodes when the cell tries to divide. Normal cells that divide after reparation remove the bomb so they live.

Cancer cells that do completely repair their DNA before cell division aren't cancer cells anymore (they are normal cells) because they have to wait a long time before cell division.

Normal cells that did not completely repair their DNA before cell division can pass a mutation down to daughter cells.

So flavonoids kill only cancer cells but no normal cells.

It's like this:

Normal cell -> completely repaired -> flavonoid bomb removed -> cell divides normal

Cancer cell -> not completely repaired -> flavonoid bomb detonates -> cell killed while it was dividing.

Cancer cell that completely repairs = normal cell.

**Theoretically, this is a 100% cure against cancer!**

Quercetin is dissolved in vitamin C (ascorbic acid form), because then the Quercetin is protected from being degraded. Also, the vitamin C works as DMSO, because the Quercetin is dissolved in the vitamin C and vitamin C is dissolved in water, while Quercetin is dissolved in fat. Vitamin E has to be added because it's an antioxidant too and it works synergistically with Quercetin + vitamin C.

The Quercetin has to be taken slowly because it has a very short half-life and it works on free radicals. There are only a limited amount of free radicals in the body, so in order to use these free radicals to kill cancer, you need to dose the Quercetin every 15 minutes. If you take a very high dosage of Quercetin, it will be eliminated very fast and it will not be able to use the free radicals that are available after the approximately 15 minutes.

Be careful if you choose to add free radicals: Because flavonoids work on free radicals, adding free radicals to Quercetin + Vitamin C + Vitamin E can dramatically potentiate it. Free radicals can make the mix 100-10,000 times stronger, according to calculations. Green tea extract could work as a pro-oxidant (it generates free radicals), this is why it is included to this treatment protocol. Be sure that the green tea extract hasn't oxidized, because then it would not work. You can also brew some green tea.

Adding H<sub>2</sub>O<sub>2</sub> or fluoride (toothpaste) to the mix might also work. If you choose to add H<sub>2</sub>O<sub>2</sub> or fluoride to the mix, you should drink the mix quickly because the oxidized vitamin C only has a half-life of a few minutes. 1 ml of 3% H<sub>2</sub>O<sub>2</sub> should be enough to do the trick. Just add the H<sub>2</sub>O<sub>2</sub> to the mix of Quercetin + Vitamin C dissolved in water and take it quickly after adding the H<sub>2</sub>O<sub>2</sub>. If you have a doctor who wants to work with you, you could also combine this mix with radiation, because radiation generates free radicals. Chemotherapy is also known for its ability to generate free radicals, so therefore combining this treatment protocol with chemotherapy might also make it work much better!

If you are cured out of cancer and you want to support us. Please do so. By supporting us, you can help us treat and help more cancer patients. Send your donation internationally to our bank account. These are our bank account details/ numbers:

## Bank Donations

Name: **Steven Chang**  
Address: **Mezenhof 1 k333**  
Postal Code: **3082 ZE**  
City: **Rotterdam**  
Country: **The Netherlands**  
BIC code: **INGBNL2A**  
IBAN code: **NL22INGB0007389860**

You can also look up our bank account details by searching on google. Go to google and type "cancer cure protocol quercetin vitamin c Steven Chang" [ENTER], or go to:

<https://www.google.com/search?q=Cancer+cure+protocol+Quercetin+Vitamin+C+Steven+Chang>

Or email us in order to ask our bank account details:

[treatcancerinfo@gmail.com](mailto:treatcancerinfo@gmail.com)

If your donation is given before January 2018, all of it will be solely spent on advertising and researching this cancer treatment protocol, so that more people can be saved. Advertising is very important, because we need to give this treatment protocol public attention in order to save many more people! If we didn't advertise, you would never have seen this treatment protocol, so please support us! If your donation reaches our bank account later than Jan 2018, our spending policy might change a little bit. For example there might be a 5% fee. Remarks: We are not a non-profit organization. This is an alternative treatment (no proof).

This cancer treatment protocol was invented by  
**Mr. Steven Chang.**

Please thank him for inventing this cancer treatment protocol.

## **General information about flavonoids/ Quercetin:**

Information about flavonoids:

<https://en.wikipedia.org/wiki/Flavonoid>

Information about Quercetin:

<https://en.wikipedia.org/wiki/Quercetin>

A scientific article about the anti-cancer effects of flavonoids:

[http://www.ncbi.nlm.nih.gov/pubmed?cmd=Retrieve&list\\_uids=16097445&dopt=Abstract](http://www.ncbi.nlm.nih.gov/pubmed?cmd=Retrieve&list_uids=16097445&dopt=Abstract)

A scientific article about the anti-cancer effects of Quercetin:

<http://www.ncbi.nlm.nih.gov/pubmed/16573383>

Tumour response to Quercetin, a bioflavonoid with some promises in therapies:

<http://www.ijpsonline.com/article.asp?issn=0250-474X;year=2006;volume=68;issue=5;spage=570;epage=574;aulast=Indap>

Our main website:
