**SEED
GUIDE
2021**

YOUR 2021 HORIZON SEEDS PRODUCT GUIDE.

TRUSTED. CANADIAN. YIELD

One thing is for certain - change. This past year has transformed almost every aspect of how we live, work and play and now more than ever we see the value of the term “Canadian owned and operated” and the importance of keeping our local businesses relevant. We know you have many choices in where and how you decide to buy seed and we at Horizon Seeds will do our best to make us a valued investment for your operation. Everyday we strive to be a leader in the seed supply industry. Being family owned and fully Canadian is what makes our team proud and excited to sell solutions to growers to help make them better operations.

As we plan ahead for the 2021 crop year, we should not forget to celebrate the successes, whether big or small, we have enjoyed this past year. They should not be reduced, in our collective memories, to the current public health crisis. We are excited to be expanding our brand further and deeper from coast to coast. The launch of new technologies, new products have all helped our growth, and most important the people that surround our company - staff, dealers and customers are who we are truly grateful for.

This year we ask you to shop local and consider Horizon Seeds when it comes to corn or soybean acres on your farm this coming season. We sincerely hope that you will be an important part of this year as we continue to grow our partnerships with community producers.

PROVIDING SOLUTIONS TRAITS & TECHNOLOGY

The Agrisure® traits portfolio offers a range of technologies that help you manage production challenges and protect the genetic yield potential of your hybrid. From best-in-class insect control to water optimization, we can help you find the right combination to get the most from your field.

	Description	E-Z Refuge	Type of Insects controlled
Agrisure GT	The Agrisure® GT trait provides tolerance to in-crop applications of glyphosate-based herbicides. This hybrid is an excellent option for refuge acres in a structured refuge operation.	--	Herbicide Only
Agrisure 3010	Corn borer control with glyphosate and glufosinate tolerance.	--	
Agrisure 3120 <small>E-Z Refuge®</small>	Multiple modes of action against corn borer and suppression of ear-feeding insects.	✓	
Agrisure Viptera® 3110	Agrisure Viptera® 3110 provides excellent control of above-ground insects where corn rootworm is not a key problem.	--	
Agrisure Viptera® 3220 E-Z Refuge®	Agrisure Viptera® 3220 E-Z Refuge® features multiple modes of action for unsurpassed control of broad lepidopteran pests and corn borer.	✓	Above-ground insects
Agrisure Artesian® 3120A E-Z Refuge®	Season-long water optimization, two modes of action against corn borer and herbicide flexibility with an integrated refuge.	✓	
Agrisure Viptera® 3220A E-Z Refuge®	Multiple modes of action for unsurpassed control for broad lepidopteran pests and corn borer with the convenience of an integrated E-Z Refuge seed blend and season-long water optimization.	✓	
Agrisure 3000GT	Consistent protection from corn borer and corn rootworm with herbicide flexibility.	--	
Agrisure Viptera® 3111	Comprehensive, season-long protection against above-ground insects - including corn rootworm.	--	
Agrisure Duracade® 5122 E-Z Refuge®	Agrisure Duracade® 5122 E-Z Refuge® helps protect your crop all season long against above and below-ground insects, including corn rootworm and corn borer.	✓	Above & Below-ground insects
Agrisure Duracade® 5222 E-Z Refuge®	Agrisure Duracade® 5222 E-Z Refuge® offers premium above and below-ground control of 16 damaging insects, including corn rootworm.	✓	

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Horizon Seeds offers a complete range of treatment options depending on your pest pressure.

For growers who want to improve their insect control spectrum, Fortenza® Seed Treatment provides critical early season control.*

UNTREATED SEED

Untreated seed is available for those that do not want or cannot use seed treatment protection.

*Eligible hybrids only. Treatment options vary per hybrid.

A NEW DIMENSION OF INSECT CONTROL.

Give your field something different. With a unique mode of action that delivers best-in-class performance, Agrisure Duracade® trait stacks provide industry-leading above- and below-ground insect control.

Make the switch and experience the Agrisure Duracade difference.

Visit Syngenta.ca/Agrisure-Duracade.

FUNGICIDE ONLY

Maxim® Quattro delivers four effective modes of action for excellent seed and soil-borne disease protection.

INSECTICIDE & FUNGICIDE TREATMENT

A combination of separately registered products, is an insecticide/fungicide seed treatment that offers superior insect and disease protection.

FULL INSECTICIDE & FUNGICIDE TREATMENT

For corn growers who want to improve their insect control spectrum, Fortenza® seed treatment provides critical early season control of European chafer, wireworm and cutworm. Coupled with the proven package of Maxim® Quattro seed-applied fungicide, you get the added control of seed and soil-borne pathogens, such as Fusarium, Pythium, Rhizoctonia, Aspergillus and Penicillium fungi.

If you only see one...
It's already too late.

Protect your crop with Agrisure Viptera® –
the only trait that provides effective control of
western bean cutworm. It also protects the crop
from key insects like corn earworm, cutworm
and armyworm, for the most comprehensive
above-ground insect control available.

Discover why Agrisure Viptera is worth a closer
look at Syngenta.ca/Agrisure-Viptera.

**BREEDING FOR SILAGE**

We are proud to offer products that suit your fields maturity, insect and disease resistance and deliver top quality silage for your herd. To ensure our product meets your herds needs, our silage hybrids must have at minimum one of the following:

- High NDF digestibility
- High starch
- High yield potential

Rating Scale

10 = Excellent
5 = Average
1 = Poor

Ear Type

F = Fixed
SF = Semi-Flex
FL = Flex

RFV = Relative Feed Value

TDN = Total Digestible Nutrients

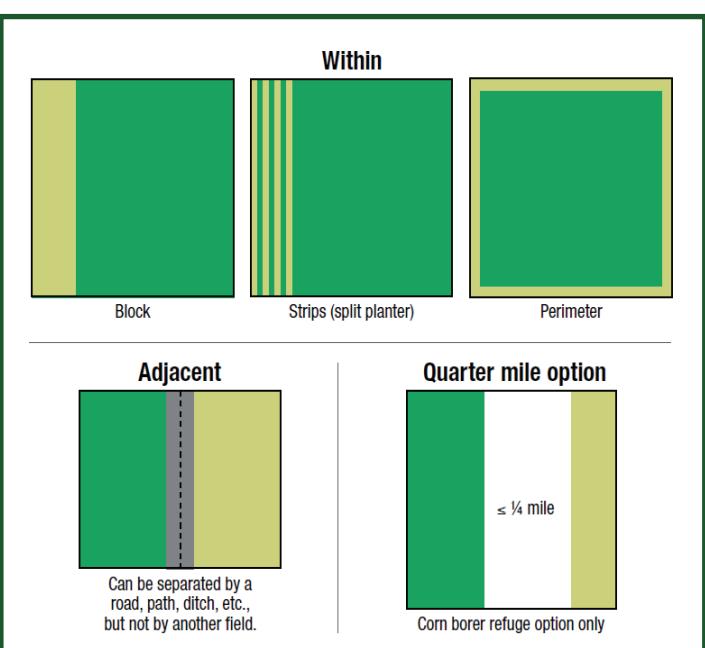

ADF = Acid Detergent Fibre

NDFD = Neutral Detergent Fibre Digestibility

REFUGE GUIDELINES

Product	Minimum refuge requirement	Location	Why?
Agrisure Viptera® 3110	20%	Adjacent to or within Bt field	Serves as an appropriate refuge for all pests targeted by these traits, including corn rootworm and European corn borer, or the Multi-Pest Complex™ Appropriate size to ensure enough susceptible Bt corn refuge mates are available
Agrisure 3010			
Agrisure Viptera® 3220 E-Z Refuge®			Serves as an appropriate refuge for dual Bt traits to control European corn borer and/or the Multi-Pest Complex™
Agrisure 3120 E-Z Refuge®			Appropriate amount to ensure enough susceptible Bt corn refuge mates are available
Agrisure Duracade® 5122 E-Z Refuge®			Additional convenience to ensure refuge is planted in all fields
Agrisure Duracade® 5222 E-Z Refuge®			

*Multi-Pest Complex includes black cutworm, western bean cutworm, fall armyworm, corn earworm & common stalk borer.

REFUGE PLANTING OPTIONS

Depending on the pest for which the refuge is being designed, there are various designs of refuge planting that will be effective. It can be planted in the following configurations:

- Block within the Bt field
- Perimeter around the Bt field
- Separate block within a 1/4 mile of the field (European corn borer only)
- Strips within the Bt field
- Block adjacent to the Bt field

Note: A neighbour's field that does not contain Bt traits does not meet the refuge requirements.

NOTES

Always read and follow label directions. Fortenza® Maxim® Quattro with Vibrance® is an on-seed application of Maxim® Quattro fungicide seed treatment, Fortenza® insecticide seed treatment and Vibrance® fungicide seed treatment. Fortenza® Vibrance® Maxx is an on-seed application of Fortenza® insecticide seed treatment and Vibrance® Maxx RFC fungicide seed treatment. Agrisure®, Agrisure Duracade®, Agrisure Viptera®, E-Z Refuge®, Fortenza®, Maxim®, Multi-Pest Complex™, Rooting Power® and Vibrance® are trademarks of a Syngenta Group Company.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

LIBERTY LINK Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post-emergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF Corporation.

HERCULEX AgriSure® Technology incorporated into these seeds is commercialized under license from Syngenta Seeds, Inc. Herculex® Technology incorporated into these seeds is commercialized under license from Dow AgroSciences LLC. HERCULEX® and the HERCULEX Shield are trademarks of Dow AgroSciences LLC.
