Work Experience

Front-end developer - Smart Testing, Part-time, Auckland

- I am working with **a real NZ Agile team**. We have a product owner, a scrum master from BNZ, a front-end developer, a back-end developer and a tester.
- We are producing a recruitment app. I release new features weekly.
- Based on the storyboard, I fully in charge of the front-end part and my teammates are very satisfied with my website.
- The main technology of the front-end part is React, Redux, sass, bootstrap, ant-design etc. We also **use Trello, Jira, Bitbucket** to manage the development process.

Strength

- **Industry level project experience** and Agile team experience. Already working **in real NZ team.**
- Smart and learn fast. I always deliver first-class outcome. **Achieved higher marks (top 5%)** than most other three-year university students.
- Strong logically thinking. Targeting problem and find solutions fast.

Steven Wang

EDUCATION

Massey University, Graduate Diploma in Information Science, Jul, 2018 - Jul, 2019

- **Top 5% student** with strong leaning skills, achieving over A- for most of my courses.
- I make efforts, **make plans** to perform better and **gain learning strategy** though some top students and even my dean. Focus on tasks, **make notes on online app** and then review the materials make me more efficient and good memory. Thereby, I achieve a lot of A- at my university.
- I try my best to manage teams because I am eager to deliver a premium outcome. I **assign different tasks base on team member's skills and personality.** Most of my teams work well and achieve high scores.
- **Main Course:** Web development **(A-),** Application Software **(A-),** Object-Oriented Programming, User Experience **(A-),** Database (B+), Project Management **(A-).**
- Good at analyzing and abstracting complex problems.
