Text of the world's petitions words Author of The World Petition

For such a plea, which is based on an attempt to perform an illegal blocking my people, this creates European political responsibility in the interests of economy, justice, security and stability of world politics and world peace, in the interests of possible 170 heads of foreign governments which are thus robbing, damaging and endangering . Therefore, Governments of countries around the world have every right to enforce criminal liability for the greatest genocide in human history, over 230 million children killed and expansion of deadly risks, consequential as common all claims and justice for safety and freedom, the emergence of the possibility of recovery of all financial debt for lost and damaged values 1,000,000,000,000,000,000 € orders over to € 1,000,000,000,000,000,000,000,000,000,000,000, € with a stable average calculation for each government of the country on our planet Earth. Values which are provided in the interests of data can be confirmed.

At the same time there is a misuse of European political relations for the expansion of monopolistic strategies that are designed to block justice, courts, political rights and freedoms of others. There is a running corruption, abuse of political rights in the interest of international and national. Expansion of organized criminal networks threaten many other innocent people and in the interest of justice, sending many ordinary people are sentenced to death for their collaboration on global terrorism. Frequently, in the interest of policy, it is illegal to operate World Terrorism been materialized in the context of politics, security, economics and legal rights, or by force international rules. European governments country support and coopered Operation illegal censorship in the media and in the interests of international politics, censorship that is created for this country to European governments could prove strengthening the quality of its own terrorist operation for powerfull oppression and illegal warnings physical and threaten or psychological violence against other persons and Other innocent or in the interest of peaceful step for governments many countries around the world. Organizing criminal movement intended to block other people and other governments around the world, robbing them of economical or strategic value. Violation of its own international agreements on diplomatic and security cooperation between the governments around the world. Probable violations of international space agreements and the possibility of expanding secret territorial boundaries, discouragement cosmic relationships and awareness. Robbing whole world of more value than that of the value of our planet Earth and all her existence for a period of several million years back. European governments are run silent criminal acts that have already rapidly can outperformed value crime of Adolf Hitler at the time of the First and Second World War in Europe or Wars in the World. Cooperation on the

biggest genocides in history, robbing the whole world about the financial value of which strongly outpace the value of our planet Earth, and at the same time, the governments of the European countries has become the worst criminal identity in the history of mankind.

European countries' governments try to block my ability to fully communicate in order to determine its own legal strategy and therefore to European political terrorist group could expand their own crime and terroristic cooperation in order to cooperate with security organizations under the corrupt and cooperation or threats and abuse of political power or associations. The spread of terrorism in the security structures of many organizations around the world and creating a terrorist movement in the United Nations, the Organization for Security and Co-operation in Europe, or NATO interests through cooperation also maintains that USA. European governments are constantly trying to expand the cooperation between different terrorist organizations or foreign governments, thus expanding the threat of bankruptcy crushing your politics, economy and civilization or safety. Society then decline and extinction of civilization.

Often violated international declarations on human rights and human freedoms and human rights for personal defense and communication with the company. European governments are willing to disregard any value to international agreements of political and civil rules. European governments are not willing to adhere to the country of human rights or genocide against the rules, the rules of the International Criminal Court and international criminal justice, which no longer act in the interests of corruption and attempts to quiet the damage in your country.

European governments are abusing the country certifiably different kinds of weapons of mass destruction, in the forms of climate technology to create a climate disasters, earthquakes, tornadoes, floods and floods, tsunami, heat and drought or similar disaster and destruction. European governments are run by many illegal activities in order to abuse of the technologies to influence reality around us (similar to teoris about kvantum reality, Planck, Marwel, Einstein, timespace reality around us and prediction of future events) and influenced the determination of actual accidents or incidents, while controlling the mind and intelligence of individuals and crowds of mass population. Abuse of information about the future and the reality of time utilization data for their own economic or political strategy, intended for cross-border takeovers of strategic markets and their position, or indeed confirmed changes reality of the past and incidents in the past, traveling in a time space in the interest of their own political strategies and is already steps to today really confirmed a fact which is based on actual information and experiences, live confirmed every day. Future, threat for the spread of deadly viruses and similar threats of genocide in the order of several million or miliard people. European governments are currently trying to retain their own political and civilizational position in the interests of the international system of world politics and history, European governments would therefore suggest that they

are willing to exterminate the population of greater value than the 3/4 of humanity around the world, and many have already proven their way appetite for genocide in the interest of the value of foreign nations. As confirmed it is that if it would not be true, then the European governments were willing to act in the interests of political rules and obligation upon. It really is, that European governments the country has killed 230 million small children. The fact that the worst genocide in the history of all humanity. Genocide which really amounts to cruel statistics, which proved too outstrip Hitler or any other mass murderers. Mass murder in the values of the largest genocides in the history of all humanity. Simultaneously, European governments countries no problem, they have the support of such acts to create a national reality show that adage is to make these genocide continued their next. National reality show that is designed to entertain the peoples of Europe, in the interest of all the Governments of hard harming the country worldwide expansion of the worst genocides in human history and at the same time the operation of various forms of torture, rape of small children, forced starvation, robbing many forms of human rights or many, other freedoms.

The worst value of the existence of all humanity.

Mention of the value of any infringement of my human rights, to the Charter of human rights and freedoms of citizens of the Czech Republic.

In order to research the values and category European policy and their ability to quietly and international falsehood in order to promote its own diplomacy, European governments are able to expand the country's inhumanity to really morbid and act against all humanity.

Confirming a real testimony about the deeds of many governments in the European continent which together act in the interests of a legal and lawful jointly organized groups. Acts which are based on publicly tyranny and forced the nation to cooperate. Rapes of young children and torture them psychological pressures through hypnotism. Ignoring all kinds of human rights and the obligation upon. Implementation of physical harm, barring the possibility to receive medical assistance or security services. Espionage, censorship of communication, abuse and manipulation with children and old human beings for hypnosis and torture or murder to death in the city hospital. Blocking communication with people, keeping to the edge of society, robbing a value and legal rights or hard until nearly fatal damage to health. Falsification of testimony and evidence, forced testimony by police and forced to criminal acts. Limiting food intake or forced starvation, sometimes life with the budget funds for meals with 8 € for one calendar month, be live in the europe. Torture as through the creation of psychopathy and psychological illnesses. Resugering brain using hypnosis and damaging other people's minds, rubbing the brain without a break. Abuse of persons under hypnosis, to operate its own political strategy. Robbed of property, blocking the intake of information and legal information. Blocking options for safety communications, the possibilities for cooperation in the interest of national and

international security. Blocking legal dealings and international markets, or misuse of stolen information, barring the possibility of a new international market to other foreign country. Probable murder of some political parties and endangering diplomatic relations. Murder of civilians and falsifying evidence for the creation of fake accidents. Therefore is too falsing statistics of national votings. Monitoring of illegal movement of people, control comunication, 24 hours each day, hypnotizing people to determine their whereabouts and interests. Abuse many young children and their families, abuse through hypnotism.

In the period of 2010-2011 in the Czech Republic, I could not use any value human rights and freedoms. All kinds and each section of instruments of human rights and freedoms of man, a Czech citizen, legal documents were fully blocking or damaging, or in the interest of the lead again in the direction of a functioning opposition organized crime.

Allegations of blocking every day, for more than 15 years back.

For a period of over 15 years back, there were many forms of violence with the help of hypnosis, I even witnessed certain forms of teaching young children in schools, in the interests of both the subject matter covered, really learn to Tyranny of small children with the help of hypnosis. Information on he taught every young student aged 6 to 16 year small children who were led to tyranny and slavery of other people abuse them with the help of hypnosis. At the same time small children and then, in practice, learned how to expand political corruption and fraud, murder, genocide, and as covered by international organized crime and international terrorism, how to make strategy against the International Rights and Policy. Children which collaborated well, then they could have a peaceful life and subsequently to can to study at better schools for their future.

Robbing on human rights, imprisoned people in public or harming owned information and dissemination of espionage in the interests of foreign political and economic or commercial steps. Abuse for fraud and theft, blocking opportunity to educate the sake of its own interests. Blocking to publicly communicate. Rape or performing other values tampering, abuse, ever since a young child. Death threats or other threats of violence. Tortured, publicly ridiculed, blocked on the edge of society, a ban on communication and cooperation. Forced to hunger, failure to provide medical assistance, organizing the World terrorism and forced to collaborate with many persons, other world trade policy. Oppression of all the rights of individuals or nations.

It's a fact that the objectives of the European countries' governments, we will together get into a situation where we have to repeat history, which in earlier times was based on nations and their false religious politics that guided the nation for the inhuman and barbaric treatment of human beings, public executions, suspicions of witchcraft and therefore burning of witches. Today the value of European politics, it's the same thing

as when we had to live in the Middle Ages, under the rules crazy and psychopatic fanatic who in these days and in the interest of the values of world politics today, they would now be able to compare the same political values as a sect Boko Haram, ISIS or similar movements sectarian anarcho-communism.

At the same time, in the interest of today's real situation, European governments are together the essence of world terrorism worse than any other entity in the form of a terrorist Al Qaeda or ISIS. It's the worst terrorism in the history of mankind and the worst in human affairs of the society. That means that the European countries' governments must not use no political rights and the possibility of any form of sovereignty.

Today is also the real fact true that European organized crime is directed against the country to the other governments were robbed of financial value that can be viewed in the economically more important than the values of our planet Earth.

Many of my step and menus, everything is based upon the value of which is for every government to countries around the world really more expensive than the value of our planet Earth, and today's human existence.

In the interests of major duty To situation,

Each Government countries around the world, the country's government that acknowledges that this would be in their interest to support and cooperate in the interests of our development cooperation, cooperation that is based on the most significant development in the history of the values of all humanity, values that are more important and more important than our Planet Earth and human existence over a period of several miliards years back then every government to countries around the world, the country's government that acknowledges their interest in such cooperation, they then can the European territories require a court payout values that are really rapidly, more expensive than any value of planet Earth. It is reall true be the World Safety or Justifical system, International and National of the governments worldwide.

Of actual according to my calculations based on today's values homage of the world, I can confirm that the total value in order to calculate a planet Earth, my real value for cooperation is in the interests of 12 kvadriliard times more than the value of planet Earth, calculation only in time of the planet Earth. Then I own other projects that are intended for expansion of human civilization throughout the universe, in the interests of my true abilities, I can be able to expand human civilization up to a distance of several light years away septilionu of our planet Earth. Basic, standard step, first fase, be calculation of possibilities for development of the Human civilization to next yers, septilion Light Years is OK. Next, we can rise our distance on many powerful times, with my plans for cosmic transport and colonizing technologys who I own today.

These are precisely the values that European governments are stealing the all

countries from around the world. Those are exactly the values which may require every man who will want to start cooperation with me. Because my values is for share, common cooperation with strong cooperation for supported of the World Peace and Stability.

Therefore, it means that in the case of my win against global terrorism, then Europe will be strong in bankruptcy who will follow bankrupt policies of civilization and economy.

That means, in my interests to remove the threat from any crisis, I create the full form of the constitution of the new government, constitution which determines the territory of Europe as a special form of international sovereignty, which is designed for international democracy in the interest of the common policy of every government to countries around the world.

Our joint steps for the legal removal of a terrorist group and subsequently created jointly replace the terrorist movement for sovereignty. We can legally remove European terrorist governments and next common cooperation can created common sovereignty in time of the government around the European terrorist territories today. The World Diamond. It is true that you can create joint efforts that again outstrip the most advanced value of all existence of European governments land. For the whole world, the first unified territory, the strongest possibility of world politics, it is a fact of our union is one of the most significant step in the history of all humanity, common sovereignty international politics from around the world, in the interests of New Territories The World Diamond.

These are steps that can bring our collective sovereignty for each of the governments around the world and at the same time open up the unification of the territory for every person living on our planet! It is a step that is intended for the whole world, to every living human on our planet Earth. It is a step that is able to unite the entire world and give rights to each for the use of common international values common qualities and possibilities of the world. It is a step for us will bring significant achievements and open up opportunities all over the world.

Governments of all political center of the country, organization, communities and movements from around the world. The biggest global center of world politics. The biggest step in the history of the human, since the formation of our existence! The World Diamond, international territory with significant civilization which is based on cooperation on the All Governments of the world. Our cooperation which is therefore based on the strength and common success, achievement of world politics which is based on cooperation between the governments of countries in the interests of their sovereign rights and the use of common territory. It anyway, in the interest of all organizations, communities and movements from around the world, logistics group of various kinds, people who can use for example the possibility of joint communication

of global centralizing the entire world movement. It is a step which could be used for the rapid rise in the world of joint values, world peace, global cooperation, global development and world understanding for a unified nation.

It is a step that is really advantageous and is responsible for him to fight any legal form, current legal form in the interests of its value by doing so.

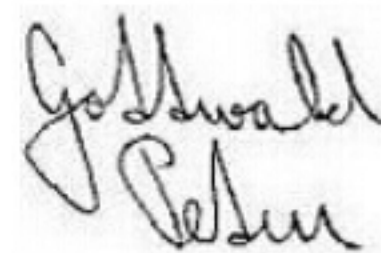

Therefore, it is well, the utilization of and encourage a common value of the entire humanity, to encourage better future directions and also as one step to remove European governments the country in the interests of international law, they are the value of the worst people in the history of all humanity, the worst value to human existence. It's very advantageous to cooperate and therefore ensure rapidly grow up our values, improving our values and indeed in the interest of legal rights and options, according to our all claims and justice. It is this legal step and a big advantage for the future of all humanity.

Therefore, I want to ask the whole world, in the interests of our common relatedness and the demands for justice, asks for our cooperation, which is intended for the creation of international cooperation towards global society, organizations and communities, the government and World corporations. Our rights are stronger than the value of European governments in our country and most of world is unbeaten in values or without the possibility of any type of threat.
