

PSYCHIC MENTAL SHIELDING

There are a few fields including in the new sigil, all designed to help you having best possible psychic mental shielding around you 24/7.

Mental Defense

Can protect you from more than just deliberate mental and spiritual attacks. For instance: Have you ever entered a room after a quarrel or an emotionally charged event and were still able to feel tension in the air, although everyone behaved kindly "it was stuffy" with tension. A mental residue of this type can have a negative effect on some people, causing them to be more likely to act aggressively. Your neighbor or co-worker bad day projects negative in the atmosphere. This may affect you and your day if you are not shielded. Often such a day is labeled as "bad hair day." Also protects you from all negative entities.

Emphatic Defense

Some people are so negative that they have the ability to drain other people's energies just by being in their presence. Often such a person does not seem overly negative on the surface. Until now, you feel exhausted both morally and physically, for no real reason. Being screened is important if there is such a person in your life.

Skillful sales of a person (or even a good swindler) can, their energy, push them to their customers. A client who is not protected can manipulate these energies and he agreed on something that he did not want or could not afford. What a wonderful world it will be if mental self-defense was taught at school. If everyone puts their mental defense on the first thing in the morning. Life would be much easier without so many negative emotional projections bouncing between people and master manipulators is not so easy to manipulate.

Protection Defense

At the physical level, this item protects you, helping you avoid troubles, causing fear and discomfort to potential threats, as they approach you and helping you make the right decisions in stressful situations.

Your natural "danger of feeling" will be very purposeful and active when a situation requiring attention begins to arise. You will be keenly aware of the dangers and therefore more likely to act on that feeling and keep yourself safe.

Aura terror of fear

It will really lead those who are looking you for a victim to think twice about taking you. They will suddenly find yourself dangerous for some reason, regardless of your physical size or real danger, and 'an attacker' or a criminal they will feel more and more uncomfortable and instead have desire to leave you. This is a measurable effect, so if a person attacks from fear, they just feel uncomfortable, but multiple scary simply!
