INTRODUCTION

Moretsky and Cassidy Vision Correction team wants you to see all the goodness, beauty, happiness, and kindness in your lifetime. The picture is always clearer with a better vision! Tell us your vision story at our LASIK eye clinic Glendale AZ and our professional yet caring staff will offer the best customized solution to your vision problems.

Choosing the Best Lasik Surgeon

If you are unhappy with your vision, glasses and lens, choose Lasik eye surgery, Phoenix, AZ. You may find it a bit daunting to find the right surgeon, but once you find one, it isn't a difficult procedure to get through. While looking for a Lasik surgeon, browse through the net; ask for referrals from trusted friends and family. You can go through the reviews, but they shouldn't be your defining factor.

MISSION

Over 10 million surgeries have been performed all over the world to help people with vision correction. By undergoing a LASIK vision surgery Phoenix at Moretsky and Cassidy Vision Correction clinic, a lifelong need for contact lens or glasses can be overcome, as this safe and effective procedure can restore 20/25 vision.

VISION

Better vision for better life! The corneal tissue of the eyes is removed, and the shape of the cornea is reset by the eye surgeon. By performing this procedure, the light focus shifts to the back of the eye i.e. the retina, hence making images, objects and words clearer.

Dr. Moretsky and Dr. Cassidy have practiced together for over 35 years, and have consistently taken care of their own patients during this interim. At Moretsky Cassidy Vision Correction, patients can expect to be pre-screened and operated on by the Doctors represented in the organization's name.
