Post a Project, something along the lines of this.

Title: Account creation for dating site US ips needed long term work needed.

Message:

—

I need 50-100 accounts created on 2 dating sites using account details from www.leadpile.com or www.fakenamegenerator.com accounts must be activated and confirmed via email.

—

1 USA ip address per account preferable using program called IP Rental.

–

Cookies cleared every account

–

Web browser changing I recommend using the “user agent switcher” tool for firefox.

–

M/F Ratio Male 60% Female 40%

I was paying \$0.10 -\$0.30 per account and getting paid \$1.00 to \$3.00 per account.

Once you receive some Pms tell the bidders to add you on a instant messenger to talk further this will help you avoid the fees. Get them to complete 10 trial sign ups. Check your stats if you are credited for the sign ups you have found your man for the job.

Step 4:

To ensure you do not get a 100% success rate and to avoid getting banned you will need to buy some cheap traffic example www.fulltraffic.com or <http://forums.digitalpoint.com/> normally the rate is 10,000hits = \$10. you

need to aim for around a 10% success rate so

10 hits : 1 sign ups

10,000hits : 1000 sign ups = \$1000 -\$3000

Step 5:

Once you can see the traffic flowing in from your stats get your worker to

begin creating accounts daily, I suggest starting off small help not get your

account banned. Example

week 1 : 10 daily per dating site

week 2 : 20 daily per dating site

week 3 : 30 daily per dating site

and so on..

That is all you need to do, now sit back make a coffee and let the money roll

in.
