

Bass Guitar Beginner Kits

Bass Guitar Beginner Kits are a perfect solution for those who may be intimidated by the difficulty level of learning to play a bass guitar. Bass Guitar Beginner Kits are great for anyone that wants to pick up playing one of the musical instruments in a relatively short amount of time. Whether you are just starting to learn how to play guitar or have been playing for years, these starter kits provide a perfect way to quickly familiarize yourself with one of the most popular musical instruments today.

Fender Custom Shop Bass Guitar Beginner Kits are made by some of the most respected and well-known bass manufacturers in the world today. The custom shop crafts each bass guitar to exacting standards, providing customers with premium quality construction for a lifetime of playability. Features solidity that is unrivaled. Solid, true tone is delivered from the bass guitar without popping or rumpering. The neck is comfortably contoured to your body while a five-layer fiberglass neck joint is reinforced for strength and reliability. Features include premium quality components, precision-tuning mechanisms, and standard sizes.

Yamaha Electric Bass Guitar Beginner Kits are designed for an acoustic guitarist looking to improve on their basic skills without taking up too much room. Yamaha electric bass kits are easy to play and give guitar players a real "rock" sound. These beginner guitars are also reasonably priced, making them an excellent investment for all ages. They feature a comfortable saddle for easy access to the strings, and come pre-assembled for simple setup. Features include high quality components, easy to follow tabs, and standard size guitar case.

Gibson Custom Shop The latest in modern technology for the bass guitar is a single-coil pickup which is now available from many popular music sources, including Gibson. This single-coil pickup set is a new innovation that reduces buzzing and distortion typical of double-coil pickups. Unlike a normal single coil, this design produces a smooth note instead of a strangled tone. The new single coil has fewer coils, resulting in increased musical stability. This is important when you consider that you don't want your bass guitar to sound like it's being attacked by a hundred volts of electricity! The neck profiles of many of these basses are specially designed for a single-coil pickup configuration, including a low-profile truss-rod and Tune-Bore.

Martin D-35 An electric bass guitar player's dream come true! For the beginning guitar player, a Martin D-35 is a beautiful, affordable, and versatile guitar that will offer you years of faithful playing. This affordable musical instrument features a neck that is straight and flat for accurate sound projection and a medium action for easy handling. Martin's Heat Press technique makes designing your own custom sound effects easy.

Squier Affinity For a brighter tone with a wider range of frequencies, the Squier Affinity is perfect for the serious bass guitar beginner. With a single-sided sound hole, it's ideal for tight vocal passages as well as close acoustic licks. You'll love the squier's dual locking bridge, which prevents it from becoming wobbly when you need a tight hold. And with a precision-tuned tone control, you can achieve the sort of complex guitar tones that professional guitarists use.

Yamaha Cricut A true bass guitar beginner kit! You've probably seen the ads on television and even in magazines: They're everywhere. This is a fine-looking bass guitar with a thick neck and a thick pickguard. fretless bass guitar kits The Cricut has two single-sided humbucker pickups and one humbucker with a capacitor. The only draw back you might have is the fact that it doesn't have an enamel paint finish, but you'll appreciate how well it works and its rugged build makes this bass guitar starter kit ideal for players who plan to take their instrument on the road.

Fender Stratocaster Another fine bass guitar for a beginning player's kit is the Fender Stratocaster. The Stratocaster is a fine-looking bass guitar that features a maple bolt-on neck with a twelve-inch scale. If you want a classic Strat tone, this is it. It's also worth taking a look at some online guitar tutorials to get an idea about tuning and playing the Stratocaster.
