

How To Fix Minecraft Launcher Installer Not Working

While Minecraft is playable on almost any device but some people have preferences with playing the game on PC and Mac, where you can play both the Bedrock and Java editions of the game. However, you first have to download the games to your hard drive before having the chance to play them. If you're having difficulty getting the Minecraft Launcher installer to work Here are some suggestions to fix it.

Check out and confirm the date time, region, and date.

If you're having difficulty getting the Minecraft Launcher to install, we recommend first rebooting your PC and sign out, then logging returning to the Microsoft Store or the Xbox apps, depending on which one you are using to access the launcher. You can now download the launcher using Game Pass since all Minecraft versions are available. To sign out, click on your profile icon in the upper right corner of the window and then sign Out.

Additionally, ensure that your time zone and date are displayed correctly on your PC. If they're not, right-click on the date and time in lower right corner of your screen, and then select the option to adjust date/time. Make sure Set time automatically and Set time zone automatically are on. Click on Sync now to Synchronize your time. Before you exiting from the Settings select the left-hand side of the screen. ensure you have the correct region you're in selected.

Troubleshoot Windows Store and then update Windows

Open Settings - Click on Update and Security.

- Click on Troubleshoot and then Additional troubleshooters.

Scroll to the bottom and click Windows Store Apps.

Follow this link to reset your computer.

If you haven't updated your Windows in some time, go to Settings and go to Update & Security. Click Check for updates under Windows Update.

Reset the store

If the troubleshooting method didn't work, we recommend resetting the store. Click the Start button, and then enter `wsreset`. A black box will pop up when you click on the Run command entry. Do nothing until the box goes away and the store opens again.

Then step is to start Settings and then click Apps. In the search bar, find the Microsoft Store. Click on it, and then select Advanced Options. Scroll down and select Reset. Log in again.
