

Firstname Lastname

123 E Main Ave, Somecity, IL 60170 • (555) 555-5555 • lastname.firstname@example.com • in/lastname-firstname

OBJECTIVE

To encourage secure business practices and strong teamwork skills that have measurable client and company benefits

CERTIFICATIONS and COURSEWORK

OSCP (Offensive Security Certified Professional), Offensive Security *Scheduled for March 2017*
Certification ... The gold-standard for Network Pen Tests. The certification process has lead to deeper internal pen testing scenarios, solutions, and "Pair Testing"

PWK: Penetration Testing with Kali Linux, Offensive Security, Online Course *January 2017*
Course ... Hardened internal pen tests with deeper enumeration techniques, information gathering, and inspired more collaborative, and more frequent, pen tests

GWAPT (Certified Web Application Penetration Tester), GIAC (Global Information Assurance Certification) *September 2016*
Certification ... Deep knowledge of web application security and hacker techniques expanded depth and breadth of employee training and Security Code Reviews

SEC542: Web App Penetration Testing and Ethical Hacking, SANS Institute (SysAdmin, Audit, Network, and Security), FL *April 2016*
Course ... Learned and implemented new techniques for bypassing standard web app securities, integrated into Engineer Security Training, hosted CTF-based training

GWEB (Certified Web Application Defender), GIAC *March 2015*
Certification ... Helped lay the foundation for Engineer Security Training, and encouraged cross-team collaboration for hardening of application perimeters

DEV522: Defending Web Applications Security, SANS Institute, Online Course *January 2015*
Course ... Utilized this course to raise the bar for secure coding practices, more rigorous code reviews, and implementing security in every aspect of the SDLC
