

COVID-19 FACT TIMELINE

For purposes of this discussion I will cover the FACTS leading up to the OUTBREAK of COVID-19 & The INITIAL OUTBREAK

It is also extremely important to UNDERSTAND NO EVIDENCE EXISTS that COVID-19 was created in a lab as a BIOLOGICAL WARFARE AGENT.

There is however compelling evidence to suggest that a LAB was researching the virus and MOST LIKELY HAD AN UNINTENDED RELEASE WHICH STARTED THIS PANDEMIC

FACT (definition): something that is known to have happened or to exist, especially something for which proof exists

ORIGINS OF DEATH

June 10, 2012 local hospital in Bisha, Saudi Arabia (KSA) admitted 60-year-old Saudi businessman, Community-acquired pneumonia was suspected.

PT 0 is transferred from Bisha Hospital to Dr. Soliman Fakeeh Hospital in Jeddah on **June 13, 2012**. The patient rapidly deteriorates resulting in death on **June 24, 2012**

CDC STATED that MERS-CoV It is different from any other coronavirus that researchers have found in people before

MERS Cases and Deaths
April 2012 to November 15, 2013

Countries	Cases (Deaths)
France	2 (1)
Italy	1(0)
Jordan	2 (2)
Oman	1 (0)
Qatar	8 (3)
Saudi Arabia	127 (53)
Tunisia	3 (1)
United Kingdom(UK)	3 (2)
United Arab Emirates (UAE)	6 (2)
Total	153 (64)

The unknown virus was tracked by WHO & CDC in **2012** and determined it Caused **153** people to become infected and **64** Deaths

<http://www.cdc.gov/coronavirus/mers/>

ADVERSARY

PHILOSOPHY & MINDSET

LOOKING BACK AT OR ADVERSARY FOR A MOMENT

2000

Chinese Defense Minister
March 1993 to March 2003
General Chi Haotian

General Chi Haotian
2000

1. Provides briefing to CCP leadership regarding the long range plan on ensuring the CHINESE Nation
2. There were 3 Issues
 1. China and living space
 2. Chinese People to go out and colonize new land
 3. The **American** Issue

FACTS

General Chi Haotian

"Only by using non-destructive weapons that can kill many people will we be able to reserve America for ourselves. There has been rapid development of modern biological technology, and new bio-weapons have been invented one after another."

"Of course, we have not been idle... We are capable of achieving our purpose of 'cleaning up' America all of a sudden."

It is important to NOTE that China

SIGNATORY to by ACCESSION on **November 15, 1984**

Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their Destruction

FACTS

General Chi Haotian

Continues Stating

1. The United States is firm in blocking us (CHINA), it is hard for us to do anything significant to Taiwan, Vietnam, India, or even Japan, [so] how much more living space can we get?
2. Only countries like the United States, Canada, and Australia have the vast land to serve our need for Mass Colonization."
 - A. We China are not as foolish as to want to perish together with America by using nuclear weapons,"
 - B. "Only by using non-destructive weapons that can kill many people will we be able to reserve America for ourselves."

FACTS

General Chi Haotian

General Hoatian Stated the ANSWER IS ONLY FOUND in:
BIOLOGICAL WEAPONS
"he (General Haotian) stated "we (CHINA) have not been idle, in the past years we have seized the opportunity to master weapons of this kind."

FACTS

Gen. Chi Haotian

Chinese Communist Party CCP considers biological weapons to be the most important weapons for accomplishing their goal of "cleaning up America." Chi credits **Deng Xiaoping** for putting biological weapons ahead of all other weapon systems in the Chinese arsenal.

Chi makes additional arguments: "We must prepare ourselves for many scenarios. If our biological weapons succeed in a surprise attack, the Chinese people will be able to keep their losses at a minimum in the fight against the United States.

Deng Xiaoping

FACTS

The best course for a failing Chinese economy is war. One might ask what kind of war?

In a 2005 in an another speech given by Former Chinese Defense Minister General Chi Haotian (titled "War is not far from us and is the midwife of the Chinese century"), a biological attack on the United States was suggested as optimal.

"It is indeed brutal to kill one or two hundred million Americans," said General Chi Haotian. "But that is the only path that will secure a Chinese century..."

General Chi Haotian explained "We, as revolutionary humanitarians, do not want deaths," said Chi. "But if history confronts us with a choice between deaths of Chinese and those of Americans, we'd have to pick the latter..."

<https://fas.org/nuke/guide/china/doctrine/chinview/chinacont.html>

FACTS

Gen. Chi Haotian

Weaponizing Viruses

Most Western Nations did not grasp the underlying motives for China's ready desire to participate in many of the West's P4 microbiology labs, where many of world's most deadly microbes are studied (i.e., pathogen lethality level 4 labs Class A).

This should start to bring some clarity to the **Novel Coronavirus (COVID-19) Pandemic** which started in Hubei around Wuhan, located in the heart of China, just outside China's principle BSL-4 Virology lab (specializing in deadly viruses).

FACTS

Gen. Chi Haotian

Not long after delivering his speech, Gen. Chi stepped down as Defense Minister in 2003, which was the same year as the Initial SARS outbreak which occurred in China.

This was also the same year that (coincidentally) Beijing decided to build the Wuhan P4 Virology lab.

THE SUSPECTED SOURCE OF THE COVID-19 OUTBREAK

FACTS

Key Facts

1. China already stands accused of breaching international treaties and engaging in biological weapons research. (Sourced)
2. "Information indicates that the People's Republic of China engaged during the reporting period in biological activities with potential dual-use applications, which raises concerns regarding its compliance with the BWC," the 2019 annual US State Department report on China's arms treaty compliance warns. (Sourced)
3. "The United States has compliance concerns with respect to Chinese military medical institutions' toxin research and development due to the potential dual-use applications and their potential as a biological threat." (Sourced)

FACTS

Important Facts Related to COVID-19 as a **Biological Weapon**

The general consensus among Global Intelligence Agencies who routinely seek and analyze information relative to Countries PLAYING in COVERT CHEMICAL & BIOLOGICAL PROGRAMS STATES

COVID-19 would be a terrible bioweapon because of blowback.

"A good bioweapon, in theory, has high lethality but low, not high, transmissibility."

Increased suspicion is focused One of the Two (Operating in Plain Sight) Covert Biological Weapons Research Facilities in WUHAN

Wuhan Institute of Virology

Chinese Academy of Sciences publicly declared as holding Pathogen Level 4 (P4). studying the world's most deadly diseases.

Wuhan Institute of Biological Products

One of eight research facilities under the Biological Weapons Convention that China signed in 1985.

Concern Related to Chinas Biological Research Programs

"Researchers could, for example, change a less dangerous, non-pathogenic strain of anthrax or another pathogen or virus into a highly virulent form by altering a genome during benign research. Or recreate pathogens such as the deadly smallpox virus, which was eradicated in the wild in 1980.

With proper techniques and the right manipulations, a pathogen could be made to have greater invasiveness or virulence in a target population."

BACK TO 2013 AND THE UNKNOWN CORONAVIRUS IDENTIFIED IN ROTTERDAM ERASMUS MEDICAL CENTER

After the Identification of the Sample collected in Saudi Arabia

Dr. Frank Plummer NML Canada obtained a sample of the virus from the Erasmus Medical Centre in Rotterdam, the Netherlands.

Under a signed a material transfer agreement, a contract that outlines the terms and conditions for using the new novel-coronavirus sample.

Sample Arrives Canada's National Microbiology Laboratory in
Winnipeg
May 4, 2013

<https://www.cbc.ca/news/health/saudi-coronavirus-work-stymied-at-canadian-lab-1.1322426>

Dr Frank Allen Plummer
Canadian scientist, academic and HIV/AIDS researcher. He was "a recognized specialist in infectious diseases

Scientific Director General, National Microbiology Laboratory, chief science officer of the Public Health Agency of Canada

While at the National Microbiology Laboratory, he led the Canadian laboratory response to SARS, the H1N1 pandemic and oversaw the development of the successful VSV EBOV vaccine for Ebola viral hemorrhagic fever.

FACTS

**Lets look at who was
working at the
NML BSL-4**

Thousand Talents
Program
CHINAS TROJAN HORSE

Dr. Xiangguo Qiu

Born **1964**

1980, admitted to Hebei Medical College at 16

Graduated from Hebei Medical University in **1985**

Postgraduate Immunology, Tianjin Medical Univ
1990

1996 entered the **United States** as a member of
Thousand Talents Program
MEDICAL RESEARCH TEXAS

Associated/Sponsored by the MD Anderson Cancer
Center in Houston in **1996** as a guest scientist

1997 assistant research fellow in University of
Manitoba Cancer Treatment Center

2003 joined Special Pathogen Project of the
National Microbiology Laboratory, Canada

FACTS

November 2019, US Senate Permanent Subcommittee on Investigations and Committee on Homeland Security and Governmental Affairs calls China's Talent Recruitment Plans, including the **Thousand Talent Program TTP**, a **threat to national security**.

The report from the hearing cited TTP contracts as violating research values, TTP members **willfully failing to disclosure** their membership to their **home institutions**, and cited numerous cases against TTP members for theft of intellectual property and fraud.

The success of the program in recruiting U.S.-trained scientists back to China has been viewed with concern from the U.S., with a June 2018 report from the National Intelligence Council declaring an **underlying motivation of the program to be "facilitate the legal and illicit transfer of US technology, intellectual property and know-how"** to China.

TALENT RECRUITMENT OR "BRAIN GAIN" PROGRAMS encourage the transfer of original ideas and intellectual property from U.S. universities. For example, China's talent recruitment plans, such as the **Thousand Talents Program**, offer competitive salaries, state-of-the-art research facilities, and honorific titles, luring both Chinese overseas talent and foreign experts alike to bring their knowledge and experience (or that of advisors and colleagues) to China.

KNOW YOUR ADVERSITIES TACTICS & GOALS

ACCORDING TO THE CHINESE GOVERNMENT'S STATE COUNCIL, CHINA USES THE FOLLOWING FOUR-STEP DEVELOPMENT PROCESS TO GAIN A TECHNOLOGICAL EDGE:

- 1 INTRODUCE** The Chinese government uses numerous methods—some legitimate but others, such as stealing technology from foreign competitors, meant to illicitly **introduce** foreign technology and knowledge to China.
- 2 UNDERSTAND** The Chinese government uses its numerous civilian and military institutions and resources to **understand** the materials acquired from foreign sources.
- 3 ASSIMILATE** Those same institutions **assimilate** foreign technology and knowledge into Chinese infrastructure—frequently by reverse-engineering it.
- 4 RE-INNOVATE** Chinese institutions **re-innovate** foreign technologies, such as military aircraft, high-speed trains, and nuclear reactors, to develop new and state-of-the-art technology. Such advances allow China to achieve generational advances and save time and money on research and development.

<https://www.fbi.gov/file-repository/china-risk-to-academia-2019.pdf>

FACTS

The **Made in China 2025 Plan** lists 10 domestic Chinese industries from which the government of China seeks to eliminate any foreign-produced technology:

- . Information technology
- . Computer numerical control machine tools and robotics
- . Aerospace equipment
- . Marine engineering equipment and high-tech ships
- . Advanced rail transportation equipment
- . Energy-efficient and new-energy automobiles
- . Electric power equipment
- . Agricultural equipment
- . New materials
- . **Biomedicine and high-performance medical instruments**

<http://www.cittadellascienza.it/cina/wp-content/uploads/2017/02/IoT-ONE-Made-in-China-2025.pdf>

FACTS

So now we understand
Dr. Xiangguo Qiu History and
connection to China TTP

PHAC Biologist

Dr. Xiangguo Qiu
Husband
Dr Keding Cheng
works at the NML
BSL-4

2003, Dr. Xiangguo Qiu joined the Special Pathogens Program at the National Microbiology Laboratory, Public Health Agency of Canada to start studying the most deadly viruses such as Ebola/Marburg/Lassa in the only level 4 (highest containment level) laboratory in Canada.

Head of Vaccine Development and Antiviral Therapy group
Special Pathogens Program of National Microbiology Laboratory,
Public Health Agency of Canada.

Adjunct professor in the Department of Medical Microbiology, University of Manitoba.

**Recipient of the Dr. Frank Plummer Researcher of the Year Award,
Medical Microbiology and Infectious Disease, University of Manitoba**

(Sourced NML CV)

FACTS

Canada's National Microbiology Laboratory in Winnipeg

The National Microbiology Laboratory (NML) is part of the Infectious Disease Prevention and Control Branch of the Public Health Agency of Canada (PHAC), the agency of the Government of Canada that is responsible for public health, health emergency preparedness and response, and infectious and chronic disease control and prevention.

NML THEFT INCIDENT

May 5, 2009 Konan Michel Yao (Ivory Coast Native) removed (walked out with) 22 vials of Ebola genetic vectors, Yao whose work at the lab had included research on Ebola, the same lab Dr. Xiangguo Qiu supervised

Yao was arrested in North Dakota as he headed to a new job with the NIH in US. He admitted that he had taken 22 vials of biological specimens GENETIC MATERIAL EBOLA without his employer's permission. Yao covered the vials in aluminum foil wrapping them within a glove and plastic bag. Mr. Yao was sentenced to the 17 days he had already spent in custody. "I'm sorry for what happened," he told Judge Alice R Senechal

Dr. Frank Plummer, the scientific director of the Winnipeg lab, said the genetic material taken was not the full Ebola virus and does not pose a risk to the public. Also it was RCMP who informed the lab of the theft NOT THE LAB INFORMING THE RCMP

Yao is now employed with the World Health Organization

<https://wadem.org/wp-content/uploads/2017/03/yao.pdf>

Dr. Xiangguo Qiu
Travel History
2017 thru 2018

Along with her husband
and CHINESE STUDENTS

Dr. Xiangguo Qiu traveled to China at least five times in 2017-2018, including providing training program for science and technology personnel in the newly established P4 laboratory in **Wuhan China**,

Dr. Xiangguo Qiu was invited to the **Wuhan National Biosafety Laboratory** of the **Chinese Academy of Sciences** for two consecutive years, twice a year for up to two weeks at a time. Public Health Canada says Qiu's actions could be "**violating policies.**"

Dr. Xiangguo Qiu visit was funded by an **UNKNOWN third party**", During her trip from September 19th to 30th, 2017, she also met in Beijing with CCP Officials

(Sourced) RCMP Investigation

FACTS

March 31, 2019 SUNDAY

2019

Dr. Xiangguo Qiu

Supervisor for the Special Pathogen Project at National Microbiology Laboratory

Prepared samples **Ebola and Henipah viruses** and sent them to **Academy of Sciences in China** on commercial Air Canada Flight. This is not uncommon in the BSL-4 Lab World however what was different about this shipment was

1. **Intellectual-property protocols were not followed.**
2. **The shipping process which requires numerous Agency/Government approvals was not followed**
3. **The live tracking NOTIFICATION which is a requirement during the shipping process was not followed**

The shipment was **first flagged by Officials in Ottawa**, after the sample had already left Winnipeg and arrived in CHINA on **May 24, 2019**

PROTOCOL STATES researchers are not allowed to send anything to other countries or labs without the intellectual property office negotiating and having a material transfer agreement in place

NML LAB Protocol SOP

(Sourced) RCMP Investigation & NML SOP

FACTS

All transfers of **Risk Group 4** samples follow strict transportation requirements and are authorized ONLY senior officials at the lab and the NML tracks and keeps electronic records of all shipments of samples in accordance with the **HPTA. Human Pathogens and Toxins Act**

Strained
Canada/ China
Relations during
this Timeframe

Important SIDE NOTE March 1, 2019 the Department of Justice Canada issued an Authority to Proceed, which formally commenced an extradition process of **Meng Wanzhou to USA**

CCP regards the intellectual property theft as a critical strategy for its rise to becoming a great nation and its Dominance of the **WORLD.**

June 2019 IT specialists at the NML enter Dr. Xiangguo Qiu office after hours under direction and CLONE & replace computer hard drive and other media. Intellectual Property Theft & Transfer is the **PREDICATE** for actions.

July 5, 2019 Dr. Xiangguo Qiu & Dr Keding Cheng & 5 Chinese National Students are escorted by RCMP out of the NML BSL-4 Lab & Security Access **REVOKE to ALL RELEVANT FACILITIES & SUBSIDIARIES**

No Direct Connection

Accept Thousand Talents Program

January 28, 2020 Dr. Charles Lieber, 60, Chair of the Department of Chemistry and Chemical Biology at Harvard University, was arrested this morning and charged by criminal complaint with one count of making a **materially false, fictitious and fraudulent statement.**

The complaint alleges that in 2018 and 2019, Lieber lied about his involvement in the **Thousand Talents Plan** and affiliation with Wuhan University of Technology (WUT) In November 2018, NIH inquired of Harvard whether Lieber had failed to disclose his then-suspected relationship with WUT and China's Thousand Talents Plan.

Dr Lieber is a specialist in nano-technology

NO CONNECTION TO
COVID-19

Dr Lieber DID NOT STEAL/SMUGGLE ANY GENETIC MATERIAL ALSO NOT DIRECTLY INVOLVED IN BSL-4 Virology Institute

FACTS

Yanqing Ye

January 28, 2020 Yanqing Ye is a Lieutenant of the **People's Liberation Army (PLA)**, the armed forces of the **People's Republic of China** and member of the Chinese Communist Party (CCP). On her J-1 visa application, Ye falsely identified herself as a "student" and lied about ongoing military service at the **National University of Defense Technology (NUDT)**, a top military academy directed by the CCP. It is further alleged that while studying at Boston University's (BU) Department of Physics, Chemistry and Biomedical Engineering from **October 2017 to April 2019**, Ye continued to work as a PLA Lieutenant completing numerous assignments from PLA officers such as conducting research, assessing U.S. military websites and sending U.S. documents and information to China.

A search of Ye's electronic devices revealed that at the direction of one NUDT professor, who was a **PLA Colonel**, Ye had accessed U.S. military websites, researched U.S. military projects and compiled information for the PLA on two U.S. scientists with expertise in robotics and computer science. Furthermore, a review of a WeChat conversation revealed that Ye and the other PLA official from NUDT were collaborating on a research paper about a risk assessment model designed to decipher data for military applications.

**NO CONNECTION TO
COVID-19**

FACTS

<https://www.justice.gov/opa/press-release/file/1239796/download>

Zaosong Zheng

January 28, 2020 Zaosong Zheng August 2018, Zheng entered the United States on a J-1 visa and conducted cancer-cell research at Beth Israel Deaconess Medical Center in Boston from **Sept. 4, 2018, to Dec. 9, 2019.**

It is alleged that on **Dec. 9, 2019, Zheng stole 21 vials of biological research and attempted to smuggle them out of the United States aboard a flight destined for China.** Federal officers at Logan Airport discovered the vials hidden in a sock inside one of Zheng's bags, and not properly packaged. It is alleged that initially, Zheng lied to officers about the contents of his luggage, but later admitted he had stolen the vials from a lab at Beth Israel. Zheng stated that he intended to bring the vials to China to use them to conduct research in his own laboratory and publish the results under his own name.

Forensic evidence indicates Zheng had communications with two people in China about the stolen vials, including one person from a University that planned to store the material in China.

NO CONNECTION TO
COVID-19

Anming Hu,

February 25, 2020 Anming Hu, 51, an Associate Professor in the Department of Mechanical, Aerospace and Biomedical Engineering at UTK, is charged with three counts of wire fraud and three counts of making false statements.

The indictment alleges that beginning in 2016, Hu engaged in a scheme to defraud the National Aeronautics and Space Administration (NASA) by concealing his affiliation with Beijing University of Technology (BJUT) in China. Federal law prohibits NASA from using federally appropriated funds on projects in collaboration with China or Chinese universities. As alleged in the indictment, Hu's false representations and omissions to UTK about his affiliation with BJUT caused UTK to falsely certify to NASA that UTK was in compliance with federal law.

NO CONNECTION TO
COVID-19

<https://www.documentcloud.org/documents/6789026-USA-v-Hu.html>

FACTS

A close-up photograph of a person's face, specifically the nose and mouth, looking through a hexagonal opening in a dark, geometric structure. The structure is composed of many overlapping, semi-transparent hexagonal panels, creating a complex, layered effect. The lighting is dramatic, with the person's face illuminated from the side, casting shadows. The overall mood is mysterious and technological.

OUTBREAK BEGINS

In an effort to understand the source of the OUTBREAK in regards to the **new NOVEL-Coronavirus** Intelligence Agencies / Health Organizations and Government Agencies are all on the hunt for ONE PERSON.

CHINA is not allowing any outsiders with backgrounds of EPIDEMIOLOGY/VIROLOGY entry to HUBEI Province and its Capital WUHAN

In fact China has gone to great lengths to DESTROY EVIDENCE / CHANGE STORYS/ and SILENCE INDIVIDUALS related to the Wuhan Incident.

It is also important to note that CHINA was also attempting to silence another **CLASS A Infectious Disease** OUTBREAK which was occurring in CHINA a suspected case of PNEUMONIC PLAGUE which has the same symptom presentation as the unknown New Novel Coronavirus. As you will see for the initial presentation of the patient the Doctor was unable to identify the source of the illness

Thru sources in CHINA and other locations OUR INTELLIGENCE ORGANIZATIONS are 95% certain of the source of the outbreak. In the following slides I will cover the suspected source and dynamics of the OUTBREAK

I want to reiterate again NO EVIDENCE EXISTS that COVID-19 was created in a lab as a BIOLOGICAL WARFARE AGENT.

FACTS

November 3, 2019 Sunday Evening

Dr Li Jifeng

FACTS

Dr Li Jifeng a doctor at Beijing Chao Yang Hospital, **FIRST PERSON INTERVIEW** I was on duty as an external second-line physician in the Department of Respiratory and Critical Care Medicine. The emergency department is one of my responsibility.

In the middle of the night, the emergency doctor called and said that the two pneumonia patients came, into the Emergency Department I said let me go down and see. I went to see a case of a middle-aged male (48 y/o) with fever and dyspnea for 10 days. The local hospital's treatment was not good and the condition gradually worsened. The doctor at the local hospital recommended the patient to our hospital. Another case was his lover (46 y/o), who took care of the patient while he was hospitalized in a local hospital with a fever. He also developed fever and difficulty breathing a few days later. So came to our hospital together.

After so many years of specialist training, I have become familiar with the diagnosis and treatment of most respiratory diseases. But this time, I looked at it again and again, and couldn't figure out what pathogen caused the pneumonia. I just thought it was a rare disease. I carefully asked about the contact history, and there was no abnormality.

November 4, 2019 Monday Morning

The next day, the patient's condition worsened, and I admitted him to our department's ICU (RICU). In RICU, although I looked and looked at it. I couldn't guess what pathogen caused this pneumonia. I only knew it was rare .

November 4, 2019 Monday Evening

The CCP/Local/Government/Police quarantined the emergency room in the Chaoyang Hospital The emergency room was in police blockade Monday night A resident medical school student at Chaoyang Hospital stated he received an emergency notice from the school, asking them not to go to the emergency room in the following weeks.

Chaoyang Hospital told local media that the two patients have been transferred to another hospital, without disclosing the name of the hospital.

No Infectious Disease was identified at admission So why the aggressive security measures at the Hospital?

FACTS

Pneumonic Plague, first signs of illness are fever, headache, weakness and rapidly developing pneumonia with shortness of breath, chest pain, cough and sometimes bloody or watery sputum. The pneumonia progresses for two to four days and may cause respiratory failure, shock and death.

~~NO REPORTING~~

Pneumonic plague can be transmitted from person to person

Notification

**NO
Notification
by PRC
as part of
IHR**

Internationally notifiable diseases under International Health Regulations (IHR) (i.e., cholera, **pneumonic plague**, and yellow fever) are reportable in compliance with the **World Health Organization's International Health Regulations.**

As part of the **International Health Regulations**, the World Health Organization WHO rapidly identifies, verifies and alerts for incidents of (potential) international public health concern, including those involving environmental health hazards. The International Health Regulations, or IHR (2005), represent an agreement between 196 countries including all WHO Member States to work together for global health security.

<https://www.who.int/ihr/about/faq/en/>

~~FACTS~~

November 5, 2019 Tuesday

China's State Council Information Office (SCIO) and the Ministry of Public Security MPS instructed online news aggregators in China to "block and control" online discussion related to news about patients at **Chaoyang Hospital**.

Under Articles 4, 6, and 8 of the Interim Provisions on the Administration of Internet Websites Engaged in News Posting Operations

These are two powerful organizations that work at the direction of the CCP
Chinese Communist Party NO DISCRETION

November 12, 2019 Tuesday

November 12, 2019, It was announced that two people, from the Chinese province of Inner Mongolia, were diagnosed with pneumonic plague. They received treatment in Beijing's Chaoyang District, and authorities have implemented preventative control measures.

FACTS

November 16, 2019 Tuesday

November 16, 2019 authorities diagnosed a 55-year-old man with bubonic plague not pneumonic plague the after he ate wild rabbit meat on Nov. 5. CCP Authorities said his case was not related in any way to the couple being treated for pneumonic plague at **Chaoyang Hospital** health officials stated that the risk of an outbreak was minimal.

Bubonic Plague, Symptoms Fever and chills. extreme weakness. Abdominal pain, diarrhea and vomiting. Bleeding from your mouth, nose or rectum, or under your skin. Shock. Blackening and death of tissue (gangrene) in your extremities, most commonly your fingers, toes and nose

Pneumonic Plague can be transmitted from person to person; **Bubonic Plague** cannot.

November 17, 2019 Wednesday

Patient ONE

November 17, 2019 a 55-year-old presents to the Hubei Provincial Hospital of Integrated Chinese and Western Medicine with an onset of symptoms 2 days prior shortness of breath, fever, general body weakness. CT scans of his lungs also showed ground glass opacity.

He has no connection to the Huanan Seafood Wholesale Market

FACTS

November 17 thru December 10, 2019

Patients present to Hospitals & Clinics throughout Hubei Province at a rate of 1 to 5 new cases per day with symptoms which include Fever, Shortness of Breath body weakness.

KNOWN NOVEMBER CASES of unknown pneumonia onset to include hospital admissions of

4 Males 35-79 years of age average Not related No connection to Huanan Seafood Wholesale Market

5 Females 30-82 years of age average Not related No connection to Huanan Seafood Wholesale Market

November 30, 2019 Saturday

November 30, 2019 a second case on bubonic plague was confirmed by Chinese health authorities reported a fresh case of bubonic plague in the country's northern Inner Mongolia region, bringing the total number of reported bubonic plague cases, originating from Inner Mongolia to 2

FACTS

December 10, 2019

December 10, 2019 Wei Guixian a Shrimp merchant STALL (##) developed what she thought were cold symptoms she walked to a small local clinic for treatment and then went back to work after an examination and a antibiotic injection.

December 11, 2019

December 11, 2019 Wei Guinean returned to work felt weak and still ill she went to the Eleventh Hospital in Hubei an was re-examined and released she returned to work at Huanan Seafood Wholesale Market

December 15, 2019

December 15, 2019 WECHAT surveillance / oversight puts the total known number of cases of unknown cause community suspected pneumonia at 27, These cases have no direct connection as a WORKER to Huanan Seafood Wholesale Market

FACTS

December 17, 2019

December 17, 2019 first double-digit daily 15 case rise was observed thru WECHAT and reported Hubei Provincial Health Officials-

December 18, 2019

December 18, 2019 Wei Guinean now feeling continually lethargic she seeks care at Wuhan Union Hospital. She is admitted and told that the "sickness" is ruthless and many from the Huanan Seafood Wholesale Market are seeking care.

December 20, 2019

December 20, 2019 the total number of confirmed cases has now reached 60, the data revealed. Not all are connected to the Huanan Seafood Wholesale Market but there is a cluster of

FACTS

December 26, 2019

December 26, 2019 Dr Zhang Jixian at Hubei Provincial Hospital of Integrated Chinese and Western Medicine. States she attended to a senior couple living in the residential community near Dr Zhang's hospital. She went to their home for their fever and cough. They were transported to the Hospital for CT of the thora
CT scans of the couples lungs showed ground glass opacity.

Zhang asked the couple to have their son examined in the hospital. She found the CT image of his lung was similar to his parents.

December 26, 2019

December 26, 2019 WeCHAT and other reports are now showing a rapid spike in Patients with similar symptoms throughout Hubei Province. The total number of cases at this point is 180 people presenting with symptoms and or admitted to facilities

December 27, 2019

December 27, 2019 Wuhan Municipal Health Commission inform local HOSPITALS regarding a new coronavirus is causing the illness.

<http://wjw.wuhan.gov.cn/front/web/showDetail/2020010509020>

FACTS

December 29, 2019

December 29, 2019 Wuhan Municipal Health Commission confirms they have been monitoring 59 patients who have had an onset of Symptoms Between Dec 12 and Dec 29. No deaths and they are all being quarantined at various Wuhan Medical Institutions

December 30, 2019

December 30, 2019 Dr Ai Fen, Director of the Emergency Department Wuhan Central Hospital's shared a diagnostic report with colleagues on WeChat on December 30

Dr. Ai received a virus detection report from an unidentified pneumonia patient. Dr Ai circled the words "SARS Coronavirus" in red. That night the WeChat report spread throughout the doctor circle in Wuhan, and the people who forwarded the report included the eight doctors were admonished by the police.

Dr. Ai. As the source of the communication, was interviewed by the Wuhan Central Hospital's Disciplinary Committee and suffered "unprecedented and severe rebuke", saying that she was rumoring as a professional.

FACTS

December 30, 2019

December 30, 2019 Two doctors in Wuhan, **Dr Li Wenliang** and **Dr. Xie Linka**, messaged colleagues and friends via WeChat, a social media platform, warning of possible "SARS" cases and urging people to stay away from Huanan seafood market, where the patients said they had gone.
