As a result of my communication with CNBG friends, they are sorry that they won't be able to have this meeting with MG at 3am of Beijing's time. CNBG friends do really appreciate INDI's hard and efficient work in finishing the MOU between MG and CNBG. They also were very excited to have this cooperation.

However, two weeks after the MOU was signed, MG still did not propose a work plan for the Phase III clinical trials of COVID-19 vaccine, and still didn't get proposals from CRO companies. This current work progress concerns CNBG. As the COVID-19 pandemic is still raging around the world, CNBG team is almost racing against time every day in order to contribute to the world with a safe and effective vaccine. They can't wait any longer.

Therefore, considering the urgency of the Phase III clinical trials of COVID-19 vaccine, CNBG is very sorry to inform you that they will suspend the cooperation with MG on Phase III clinical trials, but look forward to the future cooperation in commercialization of vaccines and other cooperation opportunities with Minas Gerais State.

I hope you can understand this difficult decision. Thanks again for INDI's coordination and all your hard work!

Stay safe!

Best regards!
