

Dmitry Mugtasimov

Senior Python Developer / Team Leader

dmugtasimov@gmail.com

<https://www.upwork.com/fl/dmugtasimov>

Skype: dmugtasimov

*2900+ hours worked at Upwork • Top rated • 100% Job Success Score
Outstanding feedback from clients • Fluent English*

Specialization

- Backend implementation from scratch
 - HTTP REST API (based on Django, Flask or Falcon), HTTP RPC API (HTTP/JSON-RPC, HTTP/SOAP), GraphQL API, Non-HTTP API (WAMP over WebSockets, ZeroRPC over ZeroMQ, Kafka consumer/producer interface)
 - Database performance optimization (PostgreSQL, MySQL, Redis)
 - High performance data processing (algorithm optimization, Python C extensions, Cython, PyPy)
 - Command Line Tools (JSON, CSV, XML, YAML, MessagePack, pandas, SciPy, NumPy)
 - Web Scraping (Scrapy, BeautifulSoup, Requests, Selenium, PhantomJS)
- Refactoring or rewriting prototypes into production quality implementations
- Setup and improvement of development process
- Backend or full-stack team management

Professional Experience

21 years of professional experience in information technology (overlapping):

- 8 years of software development in Python (+ 4 years of software development in other languages)
- 8 years of managerial experience
- 8 years of software quality assurance
- 5 years of system administration

Jun 2017 – now (over 1 year and 5 months), Packy (network monitoring) at Upwork, packy.io, Senior Python Developer

Implemented 3 backend components (REST API server, WAMP/WebSockets API server, monitoring agent) of distributed network monitoring system

Python 3.7, Python 2.7, Django, Django REST Framework, Celery, Crossbar, Flask, gevent, PostgreSQL, RabbitMQ, Schematics, Docker, AWS EC2 / RDS / S3 / ElastiCache / SES, git, HTTP, WAMP, WebSockets, raw sockets (IP, ICMP and UDP protocols), HTML, JavaScript, JSON, YAML, PyCharm, Linux (Ubuntu, Raspbian, Ambian), Raspberry Pi 3 Model B/B+, Orange Pi Zero

Jan 2017 – Sep 2017 (9 months), CreditSCRIPT (finances) at Upwork, www.creditscript.com, Senior Python Developer

Developed 10 high performance loan bidding micro-services integrated via Kafka bus

Client's feedback: "Excellent senior python developer. Architected, developed and delivered a complicated project for us. Look forward to co-operating in future."

Python 3.5, Python 2.7, Flask, Flask-GraphQL, Flask-RESTful, gevent, asynchronous programming, PostgreSQL, MySQL, Cassandra, Kafka, RabbitMQ, SQLAlchemy, Alembic, Schematics, GraphQL, graphene, Docker, git, Prosper API, HTTP, JSON, YAML, PyCharm, Linux (Ubuntu)

Dec 2016 – May 2016 (6 months), Trounceflow (finances) at Upwork, www.trounceflow.com, Python Team Leader

Managed a team of Python developers and refactored a web scraping backend for financial data analysis application

Client's feedback: "Dmitry is a very strong developer and a good communicator. Thank you Dmitry!"

Python 3.5, HTML, PDF and XLS/XLSX data scraping and parsing, Django 1.10, AWS S3, PostgreSQL, SQLITE3, Schematics, Heroku, git, PyCharm, Linux

Oct 2017 – Jan 2017 (4 months), Semilimes (SaaS ERP) at Upwork, www.semilimes.com, Senior Python Developer

Developed backend and front-end of SaaS ERP on-boarding questionnaire with Flask and SQLAlchemy

Client's feedback: 5 stars

Python 2.7, Python 3.5, HTML, JavaScript, CSS, jQuery, JSON, JSON-RPC, XML, Tryton, Flask, Django, Django REST Framework, Werkzeug, Jinja2, PostgreSQL, git, PyCharm, Linux (Ubuntu)

Jul 2016 – Jan 2017 (7 months), Carpe (finances) at Upwork, www.carpe.com, Senior Python Developer

Developed a high performance Falcon-based and ZeroRPC-based backend servers for a personal finance management company

Client's feedback: "Dmitry is an experienced Python developer, with great English skills too (among the best I've seen on Upwork), so you can have a Skype call and

discuss plans quickly instead of writing long emails. He can do complex projects that many other developers would have difficulty with. Good developer, would recommend to others.”

Python 2.7, Python 3.5, PyPy2.7, Cython, Lua, JavaScript, SQL, JSON, MessagePack, HTML, Falcon, gevent, gunicorn, uWSGI, SQLAlchemy, Alembic, Schematics, PeeWee, PostgreSQL 9.5, Redis, ZeroMQ, ZeroRPC, Linux (Ubuntu), AWS EC2/S3, nginx, Supervisor, boto3, git, PyCharm, Asana, unittest, pytest

Jun 2016 – Nov 2016 (6 months), Diamond Mine (bioinformatics) at Upwork, diamondmine.io, Senior Python Developer

- Developed backend and front-end for a web application to find correlation in user submitted blood samples data to help finding a cure for diabetes
- **Client's feedback:** “Dmitry's English is perfect. His commitment to the project was exemplary for a contractor. Notably, he was very capable at implementing new functions in our code base, as well as refactoring code from other contributors. His background in QA really shines through.”
- Python 2.7, Python 3.5, SQL, MessagePack, CSV, HTML, Django 1.9, Celery, PostgreSQL, RabbitMQ, pandas, Linux (Ubuntu), nginx, uWSGI, git, PyCharm

Jun 2015 – Aug 2016 (1 year and 2 months), Platform T (Uber-like taxi service startup seed funded by SAPRUN, www.saprun.com), Python Team Leader and Software Architect

- Designed a horizontally scalable system architecture of an Uber-like taxi business automation system (4 HTTP REST APIs, WAMP Pubsub API and WAMP RPC API available for 2 Android, iPhone and Desktop applications).
- Established the software development process from scratch based on agile practices.
- Hired the backend development team.
- Performed team leader role of a distributed team (3 locations) of Python backend developers.
- Developed and refactored backend part of the system.
- Participated in the project management to fill the gaps of project manager's experience and skills on managing an agile startup project
- Python 2.7, Django 1.8, Django REST Framework 3.3, Celery, JavaScript, Crossbar, Autobahn, Twisted, Tornado
- Linux (Ubuntu 14.04), PostgreSQL, SQL, Redis, RabbitMQ, uWSGI, nginx, Asterisk, Odoo
- HTTP, WAMP over WebSockets, SIP, JSON, YAML, HTML, CSS
- git, PyCharm, Jira, Jenkins, Ansible, unittests, Behave

Mar 2012 - Jun 2015 (3 years and 3 months), Lamoda (largest Russia and CIS fashion e-commerce company), www.lamoda.ru, Senior Python Developer

- Developed largest Russia and CIS fashion e-commerce website backend from scratch (as a member of a backend development team): business logic and data access library, SOAP and HTTP/JSON public API and Solr-based full text and faceted search service.
- Implemented feature requests and bug fixes for various parts of Lamoda's e-commerce website: backend, frontend, full text and faceted search, data export and import.
- Interviewed python developer candidates.
- Reviewed code and performed release management.
- Python 2.7, Java, SQLAlchemy, Spynne, Tornado, Django, SQL, JavaScript, jQuery
- Linux (Ubuntu, Debian), PostgreSQL, MySQL, Solr, Sphinx, Apache Tomcat, Redis, uWSGI, nginx
- HTTP, SOAP, JSON, XML, HTML, CSS, git, PyCharm, Jira, Jenkins, maven

Other

- Aug 2011 - Mar 2012, Govoritter, govoritter.com, startup project (Python technology stack)
- Aug 2010 - Aug 2011, Grid Dynamics, www.griddynamics.com, QA Lead
- Feb 2008 - May 2010, Neoflex, www.neoflex.ru, Head of Software Testing Department
- Jul 2007 - Feb 2008, Google Inc. (contract), www.google.com, Localization Testing Specialist
- May 2003 - Jul 2007, Amphora Group, www.amphora-group.ru, Senior Quality Engineer
- Dec 2002 - Mar 2003, Microtest, www.microtest.ru, Test Engineer
- Jan 2002 - Dec 2002, Trinity Logic Corp., www.tl-c.ru, Oracle Database Administrator, Developer
- Jul 1996 - May 2001, Altny Ay (Almetyevsk), Programmer, Senior System Administrator

Education

June 2006, MSTU "Stankin", Master of Technics and Technology Diploma (with honors)

Top 10% of HackerRank's Contest and Practice Leaderboards: <https://www.hackerrank.com/dmugtasimov>

Primary Technology Stack

Python 3.7, Flask, Flask-GraphQL, Flask-RESTful, Django, Django REST Framework, gevent, SQLAlchemy, Alembic, Spynne, Celery, PostgreSQL, MySQL, SQL, Redis, Solr, Sphinx, RabbitMQ, Docker, Ansible, uWSGI, nginx, Linux, HTML/CSS/JavaScript/jQuery, HTTP, REST, GraphQL, WAMP, WebSockets, TCP/IP, git, unittests, pytest, PyCharm, Jira, Jenkins

Secondary technology stack

PyPy, Cython, Lua, Falcon, gunicorn, Tornado, Twisted, Crossbar, Autobahn, ZeroMQ, Java, C/C++, SOAP, PHP, Perl, Pascal, Assembler x86, Assembler Z80, FoxPro, 1C:Enterprise built-in language, DXL, Basic, VBA, SQABasic, PL/SQL, T-SQL, TCL, VU, AEL, Shell-scripts, XML, XSLT, XPath, UML, IDEF0, JUnit, Android SDK, Asterisk, Oracle 8i/9i Server, MS SQL Server 2000, DB2, Microsoft Access, Derby, Apache HTTP Server, Apache Tomcat, gradle, maven, Ant, JUnit, Development for Android, Android SDK, Android Studio, IntelliJ IDEA, Eclipse, NetBeans for Java and PHP, gcc, Visual C++ 6.0, Visual FoxPro 5.0, Visual Basic 6.0, Atlassian Confluence, VSS, CSV, HP QC, HP BPT, HP QTP HP WinRunner, Rational Test Suite, Telelogic DOORS, BPwin 4.0, Inflectra SpiraTest, TestLink, Selenium IDE/WebDriver, soapUI, JMeter, Behave, lettuce, RUP (Test discipline), ITIL, Requirements Analysis, Functional/Manual/Automated/Load Testing, Windows, Microsoft Office

Non-technical Skills and Experience

Fluent English (IELTS Overall Band Score: 7.0, 2009), native Russian, basic knowledge in accounting and banking, lecturing and presentation experience, driving license (category B)

Portfolio Projects

Name	Description	Technology Stack	Years	SLOC*
-	Digital currency arbitrage bot	Python 3, gevent, SQLAlchemy, Schematics, PostgreSQL, JSON, YAML, Docker, AWS EC2 / RDS, Linux	2017 - now	2100
-	Carpooling social network	Python, Java, Django, Django REST Framework, Linux (Ubuntu), Android SDK, Git, HTML, CSS, nginx, PostgreSQL, REST, gradle	2013 - 2015	6 000
TaxiBot	Automated taxi order auto accepting service (by preferred order pattern) - for 2 different taxi services	Python, Java, Django, Linux (Ubuntu), Android SDK, Git, HTML, CSS, Apache HTTP Server, MySQL, Python multiprocessing, asynchronous programming, Java multithreading	2012 - 2014	> 4 000
Govoritter	Phone call microblogging service http://govoritter.com (not available any more)	Python, Django, Linux (CentOS), Git, HTML, CSS, JavaScript, jQuery, Apache HTTP Server, MySQL, Asterisk, SIP Stack, AEL, RabbitMQ, lettuce, Selenium IDE/WebDriver	2011 - 2012	4 000

Name	Description	Technology Stack	Years	SLOC*
Test Generator	Tool that generates test set out of a given complex condition. http://dmugtasimov.scienceontheweb.net/testgenerator/testgenerator.html (operational if Java Applets are enabled) Sources: http://dmugtasimov.scienceontheweb.net/articles/articles.html	Java, JavaCC, LL-grammars, Java Applets, HTML, JavaScript, DOM	2007 - 2008	-
CDA model and test data generator**	Tool that models an application under test and generates test data	Visual Rules, XML, XSLT, Microsoft Access, Batch-files	2007	-
Functional Requirement Coverage**	Tool that creates a cross-coverage report of functional requirements on test requirements and vice versa	Telelogic DOORS, DXL	2006	750
System of Change Management and Change Control**	Change control tool that compares formally specified changes with the actual changes in the environment	Rational ClearQuest, Perl, SQL, Toad, Java, Batch-files	2004	-
jCOM adapter**	Rational Robot Add-in that enabled DCOM-script recording for load testing	Visual C++ 6.0, COM, DLL, WinAPI	2003	-
LabWork	Laboratory work simulator, that emulates an electric circuit. http://dmugtasimov.scienceontheweb.net/labwork/ (operational if Java Applets are enabled)	Java, awt, applets, JavaScript, HTML	2001	900
Backup partitions system	Quick OS (disk) recovery tool	Assembler x86, Batch-files, FAT16	2001	-
Session	Students assessment results management system	1C:Enterprise 7.7 built-in language	2001	3 000
DrugStore	Incoming prescriptions management application. http://dmugtasimov.scienceontheweb.net/dstore/	Visual FoxPro 5.0, SQL	2000	-
Best 2 Utility for Titul	Add-in that replaces broken functionality of "Best 2" accounting software	Visual FoxPro 5.0, SQL	1999	-
