# AMS Tuning [AMSR]

**Your PSN MUST be visible to everyone on social club. You can check this on social club by going to settings > linked accounts > PSN > visibility.**
You MUST be able to at least understand **English** as it is the crew's main language, and you will struggle to communicate if not.

We want clean builds: **simple and realistic** designed cars – **tasteful/cultured** modification, for example using neons / custom tyres / tint sparingly, and only when they fit the style of car. It is completely in the crew's judgement to enforce the style of car, but we are not excessively harsh about it. You can find examples of suitable customisation in the *#winners_gallery* channel. You must at least know how to stance your car to join the crew.

## RESPECT ALL CREW MEMBERS
--------------------MEET RULES--------------------

When in a meet, look out for crew messages and pay attention to instructions from the host on discord. If you see a troublemaker, use the *#reports* channel on discord. If you do not like the theme of the meet, then please don't join and bring it down for others.

1) **No killing:** Revenge killing is not an exception… understand that accidents can happen sometimes, and you should apologise if you mistakenly kill someone.
2) **No crashing into people:** Maintain a good distance to others in the cruise since lag can be a factor. If you crash out of the line, wait and rejoin at the back.
3) **No overtaking:** It is not a race. Sometimes, the host will allow safe overtaking during highway driving. Make sure you show respect to other drivers in this scenario.
4) **No wanted level:** DO NOT BRING COPS TO THE MEET. Stance your car away from spot. If you become wanted, kill yourself in the interaction menu, bribe authorities if you are a CEO, or call Lester as quickly as possible and move away from the meet.
5) **Park carefully:** We might visit a small parking location – park 1 at a time and try not to block cars in. Sometimes we will do 'free parking' where you should park randomly in a certain area. Try to keep the same spacing between cars and fill any empty areas.

**Above all else just be chill and enjoy the meet.**

Commissioners reserve the right to take the appropriate necessary actions if someone is being generally disruptive. Suspected attempts (even accidental) to sabotage a meet will result in an instant ban, unless it is proven that it was not malicious or careless. Continued failure to follow the rules will result in a warning, followed by a kick to remove you from the meet, followed by a suspension. If you return after this and still can't follow the rules, you will be banned from the crew.

We have a meet calendar which can be summoned using the *!calendar* command. It is also useful to download the 'Teamup' app for the calendar, where you can choose your timezone. Most meets are held at **8pm London time**.
Anyone can host a meet, just provide a commissioner with the theme details at least 24hrs before and they will reserve a 2-hour slot on the calendar for you.
