

TRUST DAO

Whitepaper 1.0

Background.

- 📞 Going back to how this channel (@UniswapEarlyCalls) started - The purpose of this channel is to make good early calls, so that everyone can have an equal (early) opportunity.
 - We do our best to do thorough due diligence to avoid scams. However, there is never going to be a 100% guarantee, but so far we are doing very well! The team here knows how to do due diligence and we will make calls only with the best odds (of not exit scamming).
 - This channel will not make many calls, but only quality ones! We will not make a call when a token is pumped at 10X or 20X just to shill our bags. We have seen many channels doing this, and burned people who follow them blindly.
 - Also, many channels made obvious scams, where clearly no proper research was done. Or those calls were just meant to pump and dump bags to naïve community members.
- No research is 100% fail proof but such calls were just simply poor.

Problem:

There are currently no quality discussion groups in the space now. Existing Telegram discussion groups are just being used as avenues for bad actors to promote scams and rugs (using multiple accounts), shilling personal bags (token holdings) without justification, promoting bad calls and etc.

Multiple “Uniswap” channels are making calls without proper research, or merely just pumping and dumping “calls” (tokens).

Trust DAO

We are proud to present Trust DAO Community group, which aims to weed out bad actors, and promote exchange of good insight, research, good calls etc within the community.

Potentially, we may implement some form of onchain reputation for Trust DAO community members.

Trust DAO Community group will be limited to only 50 people initially.

\$TRUST: Token Utility

- **\$TRUST** will have **DEFLATIONARY** functions.
- **\$TRUST** will have **BURN** functions.
- **\$TRUST** will hold real value in ETH, and Token Sale will be conducted according to a predetermined price and supply schedule.
- In order to be whitelisted as a member of the Trust DAO community, lockup of 1000 **\$TRUST** tokens are required at all times. Bad actors will have 1000 **\$TRUST** tokens **BURN**ed.
 - Whitelisting instructions and group invite link will be communicated.
- Top **\$TRUST** token holders will be invited to participate in various **private sale placements**.
- **\$TRUST** team tokens will be **BURN**ed when a call made by <https://t.me/UniswapEarlyCalls> is negative ROI.
- **\$TRUST** **DEFLATIONARY** pool tokens will be **BURN**ed when a call made by <https://t.me/UniswapEarlyCalls> is positive ROI.
- **\$TRUST AIRDROP** pool tokens will be rewarded to the top 10 holders, who do not move tokens for 1 month.

\$TRUST tokens
will be distributed
via a bonding
curve token sale.

- A bonding curve is a predetermined relationship between supply and price. In this case for Trust DAO, a bonding curve schedule is implemented where the price grows slightly exponentially as the number of \$TRUST tokens sold increase.

\$TRUST Bonding Curve

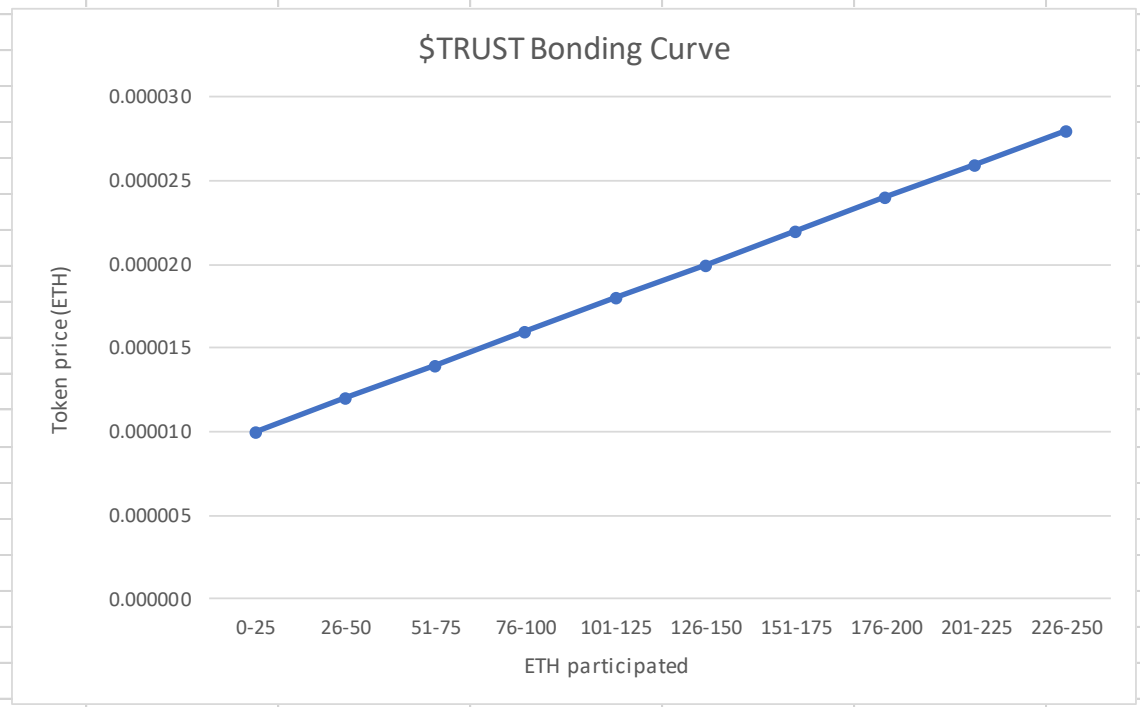

\$TRUST Bonding Curve Presale Schedule:

ETH participated:	Token price (ETH):	No. of tokens	USD (ETH \$240)
0-25	0.000010	2,500,000	0.0024
26-50	0.000012	2,083,333	0.00288
51-75	0.000014	1,785,714	0.00336
76-100	0.000016	1,562,500	0.00384
101-125	0.000018	1,388,889	0.00432
126-150	0.000020	1,250,000	0.0048
151-175	0.000022	1,136,364	0.00528
176-200	0.000024	1,041,667	0.00576
201-225	0.000026	961,538	0.00624
226-250	0.000028	892,857	0.00672

TRUST DAO

(Will be updated):

1. Roadmap
2. Enhanced token metrics
3. Partnerships
4. Launch of TRUST DAO Community
5. Launch of private sale placements.
