

Philips UVC Desk Lamp

Covid-19 pandemic brings anxiety of personal and public hygiene to people worldwide.

The demand for sterilization are everywhere in public and professional spaces, where professional measures and special treatment are conducted for disinfection.

For residential spaces e.g. home and hospitality area, the needs for “easy to get” and “easy to use” disinfection are also very important.

USP / Differentiator

- High effectiveness of UVC productivity (253.7nm)
- Microwave Sensor detection for human and pet safe
- Easy to use, easy to disinfect for different spaces at home and other residential areas
- High quality luminaires and disinfection application design from Philips

Reason to Believe

- Equipped with Philips sterilizing UVC lamp, kills 99.9% hazardous germs and mites
- Sensor + smart timer control logic to secure user safety
- No ozone emission, environmentally friendly vs. liquid disinfections
- 10 yrs working lifetime (based on 3hrs per day usage)
