Propionat 100 comes in 10 mL vial (100 mg/mL). Propionat 100 is a very effective compound for bodybuilders in bulking phases of training. While Propionat 100 is has a quick effect of only 1 or 2 days, many athletes experience an increase of training energy, a better pump and an increased appetite. Being fit CAN be 6 pack abs, it can be keeping up to your kids, or it can be being able to squat down and pick something up without hurting yourself.

Propionat 100 Usage. Propionat 100 is used in a dosage of 50 mg each day or 100 mg at intervals of one day (for athletes who do not have much experience in the use of steroids). For more advanced athletes, the initial dosage is considered to be from 100 mg per day. The cycle is conducted from 4 to 6 weeks. This picture was taken two days after I was treated with NSAIDs, which didn't work, only aggravated my symptoms. Whereby, landed up in Eye Casualty again the week after. Upon my second visit, and after waiting for 6 hours, I needed steroids for a month to 'save my left eye'... All worked in the end and I've been red eye free for a year!
