Shields

Block trackers and ads which follow you across the web.

These are the default Shields settings. They apply to all websites unless you change something in the Shields panel on a particular site. Changing these won't affect your existing per-site settings.

This will block most ads on websites, not Brave Private Ads — those are controlled in the [Brave Rewards](#) settings.

About Brave v 1.37.111

Privacy and security

- Autocomplete searches and URLs**
Sends some cookies and searches from the address bar and search box to your default search engine
- WebRTC IP handling policy**
[Learn more](#) Default
- Use Google services for push messaging**
- Allow privacy-preserving product analytics (P3A)**
This completely anonymised info helps Brave estimate the overall usage of certain features and make them better for you.
- Automatically send daily usage ping to Brave**
This anonymous, private ping lets Brave estimate active users.
- Automatically send diagnostic reports**
Help improve Brave's product stability by automatically sending diagnostic reports when the Brave Browser crashes or freezes. [Relaunch](#)
- Clear browsing data**
Clear history, cookies, cache, and more
- Cookies and other site data**
Third-party cookies are blocked
- Security**
Safe Browsing (protection from dangerous sites) and other security settings
- Site and Shields Settings**
Controls what information sites can use and show (location, camera, pop-ups, and more)

About Brave v 1.37.111

Security

Safe Browsing

- Standard protection**
Standard protection against websites, downloads, and extensions that are known to be dangerous
- Detects and warns you about dangerous events when they happen
- Checks URLs with a list of unsafe sites stored in Brave.
- No protection (not recommended)**
Does not protect you against dangerous websites, downloads, and extensions.

Advanced

- Always use secure connections**
Upgrade navigations to HTTPS and warn you before loading sites that don't support it
- Use secure DNS**
This setting is disabled on managed browsers
- Manage phones**
Control which phones you use as security keys
- Manage certificates**
Manage HTTPS/SSL certificates and settings

IPFS

Method to resolve IPFS resources

[Learn more](#) about Brave local IPFS node and gateway privacy considerations.

Ask

IPFS public gateway address

https://dweb.link

Change

IPFS public gateway fallback

Automatically fall back to public IPFS gateway if your Brave local IPFS node cannot be reached.

Redirect IPFS resources to the configured IPFS gateway

Automatically uses the configured gateway for IPFS resolutions when an IPFS gateway resource is encountered.

Automatically redirect to IPFS pages via DNSLink when possible

Automatically uses DNSLink to navigate to an IPFS version of a website when possible. [Learn more](#)

IPFS Companion

Uses the IPFS Companion extension for enhanced IPFS support in Brave, including access to common IPFS tasks from your browser bar.

Maximum IPFS cache size (GB)

A soft upper limit for the size of the IPFS repository's datastore.
