Best Fixed Spool Reel

Best Fixed Spool Reel

# New products 2016/17

Welcome to the Shimano 2016/17 new products guide. This year sees the introduction of many new products, all designed to satisfy modern angling trends ensuring you get the maximum performance and satisfaction from your fishing.

The universal increase in lightweight lure fishing has been one of the key motivations for the development of the new **Magnumlite Rotor**. This feature can be found on the award winning **Vanquish** and **Stradic CI4+** reels and offers increased weight saving, combined with more strength, better balance and improved lightweight rotation. For lightweight lure angling there's nothing better.

On some of the new larger reels used for carp and surfcasting there are two new developments which will maximise your casting performance - **Super Slow 5 Oscillation** and **Parallel Body** - see page 12 and 13 for full details. Both of these features are included in the new **Ultegra XT-D**, the most talked about carp reel of 2016!

Our new rods make the very best use of the latest carbon technology and have been designed to satisfy a wide range of requirements from advanced performance for the most demanding angler, to outstanding value for the angler with a smaller budget. You will also see very specialised models that have been selected from the Shimano worldwide range.

Also this year sees the largest range of clothing ever launched by Shimano in Europe. This highly technical range covers a wide range of angling situations and ensures you stay comfortable in the most diverse weather situations experienced.

There is also another first for **Shimano** - **Kairiki SX8**. A highly advanced 8 carrier braid with mysterious power, to find out more about the perfect match for your Shimano reel turn to page 94.

Finally, the new **2017 Shimano Catalogue**, containing the full range of Shimano tackle will be available at the start of 2017. Make sure you look out for it at your local Shimano dealer.

# HAGANE

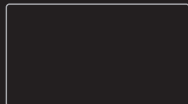

## HAGANE

OUR GOAL, ETERNALLY SMOOTH REELING

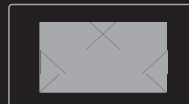

REEL MANUFACTURING BASED ON THE HAGANE CONCEPT  
IS SUPPORTED BY THE UNIQUE METALWORKING TECHNOLOGY  
THAT SHIMANO HAS DEVELOPED OVER THE YEARS.

Precision cold-forged  
**HAGANE Gear** is  
tremendously strong and  
durable.

**MICROMODULE Gear** has  
super-refined teeth for  
seamless engagement and  
power transmission.

**X-SHIP** precision gearing  
enables smooth yet strong  
reeling even under  
extreme pressure.

The highly rigid  
**HAGANE Body** protects gear  
rotation performance from  
heavy loads and shocks.

## BALL BEARINGS EXPLAINED

**S A-RB**

**Shimano Shielded Anti-Rust Bearings** have undergone a special heat treatment resulting in high metal strength and long lasting corrosion resistance. Because of their treatment, these bearings will last at least 10 times longer than standard stainless steel ball bearings in high salinity environments. These Shielded A-RB bearings use either a rubber shield or stainless steel shield (depending on bearing size) for the ultimate in corrosion resistance and contaminant protection against sand, salt or dust.

**A-RB**

**Shimano Anti-Rust Bearings** are specially treated stainless steel bearings to drastically increase the metal strength and corrosion resistance of the bearing. These bearings will last at least 10 times longer than standard stainless steel ball bearings in high salinity environments. Although these bearings are not shielded like the Shimano Shielded A-RB bearings this does not automatically implicate that these bearings are more fragile or vulnerable. Sometimes the actual positioning of a A-RB bearing in a Shimano reel can already rule out the chance of contamination by any sand, salt or dust and thus making the need for additional shielded protection unnecessary.

Shimano Shielded Stainless Steel Bearings use either a rubber shield or stainless steel shield (depending on bearing size) for optimal corrosion resistance and contaminant protection against sand, salt or dust.

Shimano Stainless Steel Bearings are of great corrosion resistance. Stainless steel bearings have better corrosion resistance against rust or stain than ordinary steel bearings do.

**PARALLEL  
BODY**

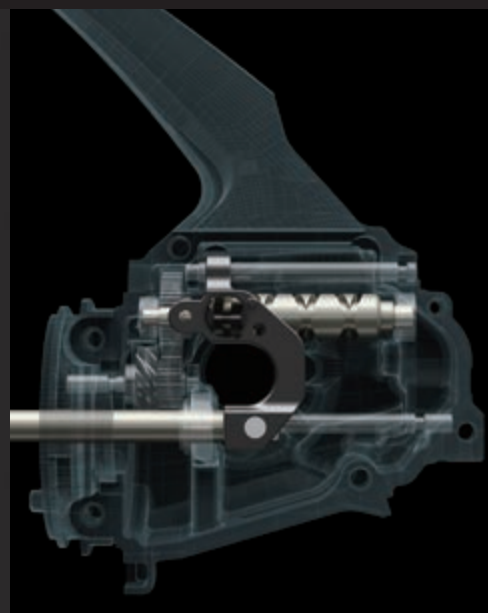

A new development where the rod and reel alignment is perfectly parallel. This delivers a smoother flow of line between the reel and the first guide and minimises 'line slap' of the rod, vastly increasing casting performance. See the new Parallel Body on the Ultegra XTD.

**FREE BODY**

Developed to shift the reel's centre of gravity closer to the rod. This has been achieved by moving the worm shaft oscillation mechanism 19mm from the bottom of the reel to the top.

By moving the centre of gravity closer to the anglers hand position, the G Free Body helps to reduce fatigue and enhance casting comfort.

**COREPROTECT**

The concept is simple... to provide water resistance without creating a heavy rotation feeling. There are three key areas of the reel that require protection; the roller clutch, the body and the line roller.

1. The Drag Area: This is the most critical area when it comes to balancing water resistance and performance. In order to achieve water resistance without damaging the light and smooth rotation, a surface protection coating that causes water to bead on the surface has been added. This beading action prevents water from flowing into the small crevices where mechanisms align.
2. The Body Area: To protect the body, COREPROTECT utilizes a series of 12 different seals and a flat body joint with surface treatment. The anti-reverse switch has also been removed from the body in order to enhance protection.
3. The Line Roller: The line roller is a sealed one piece design that provides water resistance and low maintenance. The sealed design does not require oil as part of regular maintenance.

COREPROTECT prevents water entering the body, from under the rotor at the front of the body, and also into the Roller Bearing unit.

# MGL ROTOR

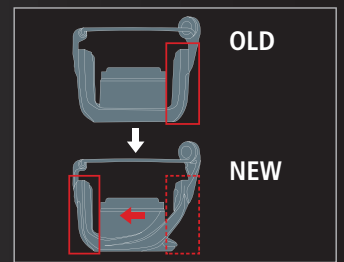

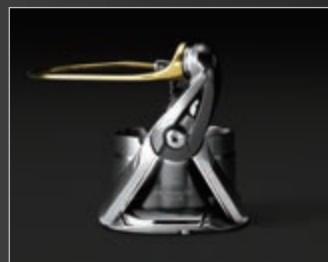

## THE FUTURE IS HERE... NEW MAGNUMLITE ROTOR

Design evolution delivers a new level of lightweight performance.

### ROTATION INERTIA REDUCED BY 14%. QUICKRESPONSE HAS BECOME EVER SHARPER.

The new design of the Magnumlite Rotor produces unprecedented light rotation. The rotor profile, which was previously symmetrical, is now asymmetrical. The bail arm mechanism, which was previously situated on the same side as the line roller, has been moved to the opposite side. This improves balance and combined with a lightweight line roller, titan bail and optimum arrangement of rotor thickness, a 14% saving in rotation inertia has been achieved increasing sensitivity to previously unreachable levels.

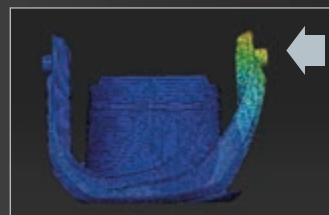

Redesigned Magnumlite Rotor now has the bail arm mechanism on the opposite side to the line roller for improved balance and lighter overall weight.

### STIFF AND STRONG. ROTOR RIGIDITY IMPROVED BY UP TO 30%.

Evolution of the rotor design not only contributes to low inertia and sensitivity. The rotor rigidity on line roller side is also an important factor, which can effect drag performance. The newly developed Magnumlite Rotor offers excellent rigidity with up to 30% less deflection under maximum pressure.

See the benefits for yourself on the Vanquish FA and Stradic Ci4+ FB

New rotor design is stiffer with less deflection under extreme load.

Standard rotor design has more deflection under extreme load.

“ The new Vanquish takes lightweight performance to a new level

## Vanquish

The new Vanquish FA takes lightweight performance to a new level.

Ultra light, ultra strong and ultra responsive, the Vanquish contains the very latest Shimano technology, including the incredible new Magnumlite Rotor and the ultra light magnesium G Free body is balanced to perfection making this reel perfect for using with the lightest, advanced carbon rods. Inside the body, the Hagane gearing combines X-Ship and Micro Module gear for ultra smooth performance, especially useful for precision retrieving when lure fishing and is protected by Coreprotect to ensure water is repelled from important components. Available in a wide range of different gear speed models, in sizes ranging from 2000 to 4000, the Vanquish FA is guaranteed to satisfy the most demanding angler's requirements.

### FEATURES

- Shielded A-RB Bearings
- Magnesium Frame
- Single Carbon Handle
- Titanium One-Piece Bail
- Cold Forged Aluminium Spool
- Waterproof Drag
- Rigid Support Drag
- Floating Shaft II

**LIGHTWEIGHT  
SERIES**

“ The Stradic C14+ is the perfect companion for modern lightweight rods

# STRADIC C14+

The latest version of the hugely popular Stradic C14+ pushes the boundaries of lightweight, light rotation reel design to the limit. Part of the Lightweight Series, the new Stradic C14+ sets new standards in the mid- priced reel category and features the new Magnumlite Rotor for increased performance for anglers wanting the very best sensitivity and feeling. Add to this the lightweight C14+ G Free body for improved balance, powerful X-Ship Hagane gearing, and Coreprotect water protection and you have a reel that oozes class.

Available in a range of popular sizes from the small 1000 (weighing only 160g) to the mid- sized 4000, in standard, high and extra high gear speeds, the Stradic C14+ also has a new easy to use front drag knob that makes adjustment when playing fish easier than ever.

## FEATURES

- Shielded A-RB Bearings
- C14+ Frame
- Single Machined Aluminium Handle
- Titanium One-Piece Bail
- Cold Forged Aluminium Spool
- Waterproof Drag
- Rigid Support Drag
- Floating Shaft II

LIGHTWEIGHT SERIES

# CARDIFF

Originally designed in Japan for competition trout fishing, the Cardiff C14+ is part of the Lightweight Series, weights only 165g. Built using Shimano's exclusive C14+ material and featuring the Magnumlite Rotor, it is perfect for European light lure fishing and dropshot techniques using ultra fine lines and is available in a 2000 super shallow spool and 2000 high gear shallow spool models.

In addition to the remarkable lightweight feel, this special reel also has an exclusive front drag designed for using with the lightest lines, making it perfect for anglers targeting smaller species. As a final touch of quality and to increase sensitivity the Cardiff has a cork grip reel handle.

## FEATURES

- Shielded A-RB Bearings
- C14+ Frame
- Single Machined Aluminium Handle
- One-Piece Bail
- Cold Forged Aluminium Spool
- Waterproof Drag
- Rigid Support Drag
- Super Stopper II
- Floating Shaft II

Product coding denotes: SS = Super Shallow Spool · HS = High Gear / Shallow Spool

**LIGHTWEIGHT  
SERIES**

The Soare BB is lightweight, compact and perfect for using with fine braided lines

# Soare BB

The Soare BB is the entry level Lightweight Series model and weighs only 190g, making it perfect for lightweight rods. Fitted with the Magnumlite Rotor and super smooth X-Ship gearing this reel is perfectly suited to light finesse type lure fishing, yet it possesses a powerful retrieve ratio of 4.3:1 creating the torque required to play hard fighting fish with control and confidence. The lightweight shallow spool is designed for ultra thin lines and the AR-C front spool lip maximises casting distance without fear of tangles for techniques such as Dropshot.

## FEATURES

- Shielded A-RB Bearings
- C14+ Frame
- Single Machined Aluminium Handle
- One-Piece Bail
- Cold Forged Aluminium Spool
- Waterproof Drag
- Rigid Support Drag
- Super Stopper II
- Floating Shaft II

**LIGHTWEIGHT  
SERIES**

Featuring technology found on many high-end Shimano reels, the Nasci FB takes P4 reels to a new level

# NASCI FB

Nasci FB is the first Shimano P4 reel to feature a Hagane gear and also uses technology usually found on much higher priced Shimano reels. Coreprotect for water protection, G Free body for better balance and X-Ship gearing all combine to make this model outstanding value for money. With models ranging from the small 1000 up to the mid-sized 5000 the new Nasci FB range is one of the most versatile available.

Finished in gloss black with contrasting silver and gold trim, the Nasci looks as good as it performs.

## FEATURES

- Shielded Stainless Steel Bearings
- XG1-7 Frame
- Single Machined Aluminium Handle
- CAP Bail
- Waterproof Drag
- Rigid Support Drag
- Super Stopper II
- Cold Forged Aluminium Spool

The Sienna is perfect for new anglers offering Shimano quality at an low price

# SIENNA FE

When it comes to entry-level performance the Sienna FE takes some beating. The compact lightweight XGT-7 body makes this reel easy to use, even for young anglers and the ball bearing and roller bearing combine with Dyna-Balance to makes winding delightfully smooth. There are three general purpose sizes: 1000, 2500 and 4000, which cover all manner of light line situations, from artificial bait fishing to feeder and float. If you're just starting out in fishing or the kids are showing some interest that requires something more sophisticated than just a basic 'cheap' reel, the new Sienna FE is the perfect choice.

### FEATURES

- Shielded Stainless Steel Bearings
- XGT-7 M Compact Body
- Single Handle
- CAP Bail
- Diecast Aluminium Spool
- Super Stopper II

SN1000FE	210	5,0:1	0,18mm-170m	1 x S SS + 1 RB	61	3	25.99
SN2500FE	260	5,0:1	0,18mm-290m	1 x S SS + 1 RB	71	4	26.99
SN4000FE	335	5,2:1	0,25mm-260m	1 x S SS + 1 RB	82	8.5	27.99

# AX<sup>®</sup> FB

The new Shimano AX FB is designed for new anglers to the sport of fishing and has an extremely low price for a branded Shimano reel. Available in three sizes (1000, 2500, 4000) this versatile model can be used for a wide range of freshwater fishing situations including lure fishing, float fishing and feeder fishing. Featuring a stainless steel ball bearing and a roller bearing the AX offers smooth, powerful performance that will help all anglers fish more effectively.

### FEATURES

- Shielded Stainless Steel Bearings
- Single Handle
- Super Stopper II

AX1000FB	206	5,2:1	0,20mm-140m	1 x S SS + 1 RB	64	2	14.99

# BIG PIT & SURFCASTING

# LONG RANGE CASTING TECHNOLOGY

Shimano have launched two new technical features that improve distance casting performance.

**Super Slow 5** places 50 wraps of line onto the spool per full spool oscillation and **Parallel Body** aligns the reel perfectly on the rod ensuring a smoother flow of line from the reel.

These new features, combined with Shimano's **AR-C Spool** and **Aero Wrap** line lay ensure you maximise your casting distance.

Parallel Body is a new feature that is designed to improve dynamic line flow from the reel to the first guide.

On many reels the spool is aligned slightly upwards towards the rod blank, but with Parallel Body it is at exactly 90° to the blank. The result is less line slap the blank as it travels towards the first guide during casting.

## SUPER SLOW OSCILLATION = GREATER CASTING DISTANCE

Slower line oscillation reduces the speed the line travels up and down the spool on the cast. This results in less friction as line leaves the spool and reduced drag on the lead, which improves casting distance and accuracy. SHIMANO STANDARD Oscillation (up to 19 wraps per cycle) outperforms the industry standard. SHIMANO SLOW OSCILLATING (up to 49 wraps per cycle) exceeds almost anything else ever seen. Shimano now has two Super Slow Oscillation systems - Super Slow 5 (50 wraps) and Super Slow 10 (100 wraps).

**STANDARD**

STANDARD Oscillation  
Up to 19 wraps

**SLOW**

SLOW Oscillation  
20 - 30 wraps

**SUPER SLOW 5**

SUPER SLOW 5 Oscillation  
40-50 wraps

**SUPER SLOW 10**

SUPER SLOW 10 Oscillation  
90-100 wraps

## ULTEGRA XTD

The Ultegra XT-D has taken the carp world by storm since its launch earlier in 2016. The matt black 'stealth like' visual appearance of this reel is perfect for the modern carp angler and the technology and price almost defy logic. There are two new features on this model that combine to improve casting performance. The Super Slow 5 oscillation wraps 50 turns of line onto the spool per full oscillation cycle. This produces remarkably smooth line lay. Also, for the first time, there is Shimano's new Parallel Body design. This aligns the spool parallel to the rod butt which in turn reduces line slap when casting.

In practical fishing situations the new super fast Instant Drag only requires one full turn from off to maximum lock making fish-playing easier. Destined to become one of Shimano's biggest selling Big Pit reels over the next few years, the new Ultegra XT-D is the reel carp anglers have been dreaming of for years.

The matt black 'stealth like' visual appearance of this reel is perfect for the modern carp angler

### FEATURES

- Shielded A-RB + Shielded Stainless Steel Bearings
- Cold Forged Aluminium Spool
- XT-7 Body
- Maintenance Port
- Machined Aluminium Handle
- 4 x Line Reducers (2 x 10000, 2 x 3500)

ULT14000XTD	645	4,3:1	0,40mm-400m	1 S A-RB + 3 S SUS + 1 RB	103	20	159.99
-------------	-----	-------	-------------	---------------------------	-----	----	--------

“ Super Slow 5 oscillation produces remarkably smooth line lay with both braid and mono lines and improves casting distance

## ULTEGRA XSD

The Ultegra XS-D is sure to be a surfcasting favourite with its new Super Slow 5 oscillation which wraps 50 turns of line onto the spool per full oscillation cycle. This produces remarkably smooth line lay with both braid and mono lines and improves casting distance when compared to faster oscillation line lay reels. Another innovation is Shimano's new Parallel Body design. This aligns the spool parallel to the rod butt which in turn minimises line touching the rod when casting, an especially useful feature when using beachcasting rods.

The new Ultegra XS-D also features X-Ship gearing which improves winding efficiency making fish-playing and retrieving leads from distance easier and the super Fast Instant Drag can be locked solid with only one turn making 'spool slip' on the cast a thing of the past.

### FEATURES

- Shielded A-RB + Shielded Stainless Steel Bearings
- Cold Forged Aluminium Spool
- XT-7 Body
- Maintenance Port
- Machined Aluminium Handle
- 4 x Line Reducers (2 x 10000, 2 x 3500)

ULT14000XSD 645 4,3:1 0,40mm-400m 1S A-RB + 3S SUS + 1RB 103 20 159,99

# AERLEX XT-B

For anglers wanting a low cost reel for carp fishing, from a brand they can trust, the Aerlex XT-B has to be a serious consideration. The black bodied Aerlex XT certainly looks good on any specimen rod set-up and the addition of an AR-C spool and Aero Wrap II line lay makes distance casting easier for anglers of all abilities. The Instant Drag spool enables the spool to be set very loose when waiting for a bite but changed into a fishing drag setting with minimal fuss.

Also available is the Aerlex XT-B Spod reel which has a faster gear ratio of 5.3:1 making consistent spodding easier and the spool also has three line clips for marking the distance of different spots on a single cast.

## FEATURES

- Shielded Stainless Steel Bearings
- XT-7 Body
- Machined Aluminium Handle
- 2 Speed Oscillation
- Maintenance Port

ALX10000XTB	645	4,6:1	0.40mm-300m	2 S SUS + 1RB	100	15	84.95
ALX10000XTBSP	650	5,3:1	0.40mm-300m	2 S SUS + 1RB	115	15	84.95

Product coding denotes: SP = SPOD

# AERLEX XS-B

The Aerlex XS-B is a great value, tough reel designed to cope with all surfcasting situations. Fitted with an AR-C spool and using Aero Wrap II line lay the new Aerlex certainly casts as well as other reels in its category and the 4.6:1 gear ratio retrieves an impressive 100cm of line per handle turn.

Fitted with 2 Shielded Stainless Steel Ball bearings and a Shimano Roller Bearing this model delivers smooth, powerful performance at a price that will please all surfcasters.

## FEATURES

- Shielded Stainless Steel Bearings
- XT-7 Body
- Machined Aluminium Handle
- 2 Speed Oscillation
- Maintenance Port

ALX10000XSB	645	4,6:1	0.40mm-300m	2 S SUS + 1RB	100	15	84.95

“ The special shallow spool is perfect for braided lines and can take 250 metres of 0.20mm line

## SUPER AERO *SURF LEADER CI4+*

Designed for ultra long range casting, the Super Aero Surf Leader CI4+ has an ultra light CI4+ body making it one of the lightest reels of its kind. The special shallow spool is perfect for braided lines and can take 250 metres of 0.20mm line.

This model features Shimano's latest Super Slow 5 oscillation which wraps 50 turns of line onto the spool per full oscillation cycle and Parallel Body design. Both of these features combine to improve distance casting performance. In use the strength and smoothness of the Hagane Gear and X-Ship can be immediately noticed as the handle is turned and the powerful 3.5:1 gear ratio delivers remarkable winding power to cope with large fish or rough ground.

### FEATURES

- Shielded A-RB Bearings
- CI4+ Frame
- Machined Aluminium Handle
- Cold Forged Aluminium Spool
- Waterproof Drag
- Rigid Support Drag
- Floating Shaft II

14SASDCI4355GR	530	3,5:1	0,20mm-250m	5 S A-RB + 1RB	84	20	224.99
----------------	-----	-------	-------------	----------------	----	----	--------

# SALTWATER SPINNING

“ Exsence CI4+ is perfect for anglers fishing lures from the shore or from boats where long casts and fast retrieves are important

## EXSENCE CI4+

The Exsence CI4+ is hugely popular in Japan for Sea bass fishing and makes a great light saltwater (or fresh water) spinning reel for European anglers. Fitted with a Hagane gear and X-Ship gearing, the Exsence CI4+ also has 9 top of the range ball bearings and a roller bearing that deliver smoothness and power.

The lightweight CI4+ composite body is saltwater safe and this reel has a shallow spool that is perfect for braid. The fast gear ratio of up to 6.2:1 (4000 XG), which retrieves 99cm of line per handle turn, makes this special reel perfect for anglers fishing lures from the shore or from boats where long casts and fast retrieves are important.

### FEATURES

- Shielded A-RB Bearings
- CI4+ Frame
- Machined Aluminium Handle
- One-Piece Bail
- Cold Forged Aluminium Spool
- Waterproof Drag
- Rigid Support Drag
- Floating Shaft II

**LIGHTWEIGHT SERIES**

Sephia BB was originally designed for squid fishing using EGI lures, but has also become very popular with saltwater anglers fishing light lures

# Sephia BB

Sephia BB is a worldwide model and has also become very popular with Light rock fishing "LRF". Part of the Lightweight Series this reel balances light rods perfectly and has ultra light, smooth rotation thanks to the Magnumlite Rotor and X-Ship gearing. This enables small lures to be worked with finesse when required. Fitted with a shallow spool designed for braid, the Sephia BB also has a lightweight AR-C spool for trouble-free, long casts.

## FEATURES

**LIGHTWEIGHT SERIES**

# SOCORRO SW

The mid-sized Socorro SW is a versatile reel for multi-species saltwater anglers fishing with lures, jigs or bait, from both the shore or a boat. Featuring a super tough Hagane Gear and X-Ship gearing, the cranking power and smoothness of this model is remarkable for the low cost.

Fitted with a waterproof cross carbon drag that applies up to 12kg of force, and powerful gear ratios ranging from 4.6:1 to 4.9:1 the Socorro SW is a superb saltwater game fishing reel. For anglers using the more expensive Shimano saltwater reels the Socorro makes a very cost effective back-up or second rod reel.

## FEATURES

- Shielded A-RB Bearings
- XT-7 Frame
- Cold Forged Aluminium Spool
- Waterproof Drag
- Cross Carbon Drag

# JIGGING MULTIPLIER

OCEA JIGGER 2001NR-PG

OCEA JIGGER 2001NR-HG

# OCEA JIGGER

Designed for deep water jigging, and built for ultra heavy use with a Hagane body and X-Ship gearing, the Ocea Jigger 2001 NR is a big fish specialist. The super free spool gives total depth control, even when jigging in a strong current, and the narrow spool design makes for easy winding. The PG has a 5.1:1 gear ratio that delivers awesome power and a retrieve of 96cm of line per handle turn, whilst the HG model has a high speed 6.3:1 gear ratio which retrieves 117cm of line per handle turn. Both models are fitted with a waterproof carbon drag for consistent performance in the most extreme situations.

## FEATURES

- Shielded A-RB Bearings
- Aluminium Frame
- Long Power Handle
- Star Drag Adjustment

Perfect for lighter saltwater jigging the Ocea Calcutta balances Game Type jigging rods perfectly

# OCEA CALCUTTA

The Ocea Calcutta 301HG is perfect for lighter saltwater jigging with the strength needed to control bigger fish thanks to the Hagane body and X-Ship gearing. Weighing only 350g, this reel balances Game Type jigging rods perfectly and the hi-speed 6.1:1 ratio and a level wind system makes retrieving super quick with 81cm of line per handle turn.

The Calcutta 301HG has a Super Free spool and a clicker system making it suitable live-bait fishing and is fitted with a waterproof carbon drag for consistent performance in the most extreme situations.

## FEATURES

- Shielded A-RB Bearings

# TORIUM

This second generation of Torium HG reels is the flagship of the star drag multiplier range. The high speed gear of 6.2:1 allows efficient use of the latest fishing techniques in both tropical and cold water oceans, for species as fast as tuna or as powerful as conger eels. The S compact body design makes the overall reel look smaller whilst still retaining the spool capacity required for versatile fishing. The use of cross carbon drag washers delivers up to 11kg of drag power that is both smooth and consistent across all settings.

## FEATURES

- Shielded A-RB Bearings
- Diecast Aluminium Frame
- Brass Gear

# BAITCASTING

# CALCUTTA CONQUEST

Shimano's flagship round bait caster, Calcutta Conquest features the new S3D balanced spool and SVS infinite centrifugal brake system to provide superb casting performance, combined with the super smooth operation of Micro Module gear and X-Ship gearing. The compact aluminium Hagane body creates the strength required to deal with the most extreme situations and maintains the integrity of the internal gearing for maximum winding efficiency.

Every aspect of the Calcutta Conquest is sophisticated and perfectly engineered, making this visually stunning reel perfect for both fresh and saltwater anglers who want the very best Shimano has to offer.

## FEATURES

- Shielded A-RB Bearings
- Aluminium Frame
- Star Drag Adjustment
- Double Aluminium Handle

# Metanium DC

The new Metanium DC is a brilliant, versatile casting machine that comes equipped with Shimano's new DC brake system called 'I-DC5'. This feature has two manual adjustment options and can be set for the type of line used and also lure size. There is also an auto function which lets the built-in technology DC decide optimal brake setting during the cast.

In use the smoothness of Micro Module gear and X-SHIP gearing, combined with the lightness of the new Magnumlite spool, is immediately obvious and produces excellent lightweight winding efficiency when working lures and awesome cranking power when fighting fish.

# ALDEBARAN BFS XG

Simply put, Aldebaran BFS XC redefines the lightweight, compact low profile baitcasting reel category. Weighing a featherweight 130g, Aldebaran delivers unmatched smoothness and precision with S3D spool, SVS Infinity cast control and the new SilentTune technologies. While Aldebaran is lightweight, it has the durability required in the most demanding fishing environments. Equipped with the X-Ship gearing system and housed in an aluminium Hagane body, Aldebaran excels at fishing jerkbaits, light crankbaits and a variety of finesse baits and has a super fast retrieve gear ratio of 8:1.

## FEATURES

## CURADO

For over two decades the Curado name has been associated with high quality, reliable baitcasting reels that are popular with anglers of all abilities. New for 2016 is the '71' model which features a compact Hagane body and quick retrieve rates of either 7.2:1 (HG) or 8.2:1 (XG). Excellent casting performance is delivered by the S3D spool and SVS Infinity cast control combination that is found on many of Shimano's top models.

The new Curado is the perfect size for pitching, flipping and casting lighter lures and makes best use of X-Ship gearing to provide smoothness and durability across a wide range of fishing situations.

### FEATURES

- Shielded A-RB Bearings
- Aluminium Frame
- Double Handle with Paddles
- Level Wind System
- Star Drag Adjustment

## GRAPPLER BB

The new Grappler BB is primarily designed for jigging with a lightweight body manufactured from Shimano's exclusive CI4+ material to reduce the overall weight and minimise fatigue when jigging for extended periods of time. To improve jigging and fish-playing performance, the Grappler BB has a long 51mm double handle, with EVA grips, that increases torque and improves winding power. The perfect combination for the Grappler BB rod series, this specialist reel has a carbon drag that can apply up to 5.5kg of power helping the angler move fish from the bottom quickly.

### FEATURES

- Shielded A-RB Bearings
- CI4+ Frame
- Double Handle with Paddles
- Level Wind System
- One Touch Removable Side Plate
- Star Drag Adjustment

**Inner Layer**

Shimano infinity carbon tape

**Blank Construction**

Many Shimano rods make use of exclusive carbon technology to achieve lighter, stronger, more responsive rods. This delivers improved performance, which leads to more enjoyment, and ultimately more fish. Two of the main technologies are Spiral X and Hi-Power X construction.

**Spiral X**

Spiral X is a process Shimano apply when constructing a rod blank and it offers the best balance of both strength and low weight. Rods built using traditional construction processes can suffer blank twist and torsion, not offering a true curve, which results in a loss of power and also effects casting distance, hooking power and overall ease of use. With the Spiral X construction process carbon is spirally wrapped in extremely tight coils, both inside and outside of the blank. The Spiral X construction process increases overall performance and reduces blank twist or torsion. Shimano utilise over 30 different types of carbon tape, with each rod utilising different configurations to make the most effective blank for its intended use.

**Hi-Power X**

Hi-Power X is an extremely important feature. The Hi-Power X incorporates a carbon tape wrap on the outside of the blank in a spiral pattern to increase overall strength. This also enhances stiffness and removes twist completely. This process offers greatly increased performance when casting longer distances and produces more accuracy and greater strength when hooking hard fighting fish. Hi-Power X construction also allows the carbon tape to be wrapped from the butt to the tip of the blank, which is an industry first. Because fine tips are more prone to twist, Hi-Power X is an extremely effective feature in this area of a blank. Shimano has both the knowledge and technology to apply this to such fine sections.

ROD TECHNOLOGY

**Softube Top**

Shimano Softube Top provides the sensitivity of an ultra fine solid carbon tip with the lightness of a hollow construction. Softube Top construction can be found on models where sensitivity and finesse are both important requirements. The smooth, seamless action of Softube Top offers the angler an unrivalled experience for bite detection and fish-playing performance.

**Taftec**

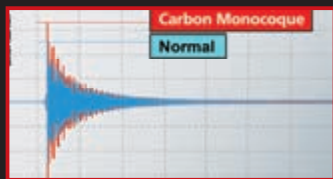

Traditionally, solid carbon tips are made by forming carbon fibre cloth into a solid cylindrical carbon fibre bar, which is then ground to a tapered profile to make the tip. Because the fibres in the carbon cloth are multi-directional they become damaged during the surface grinding process which can weaken the final tip and give inconsistent results. Shimano TAFTEC tips utilise a pre-stretched T-3500 directional yarn fibre with low resin saturation. This directional alignment of the fibres results in much less damage during the grinding process and results in a spineless construction which tests have shown to be much stronger, lower in weight, faster in action and more sensitive. TAFTEC tips are used throughout the Shimano rod range where sensitivity is an important requirement of the the rod.

**CI4+**

Shimano develop a wide range of reel seat designs to match the rod on which they are applied. Some of the more specialised reel seats incorporate the use of CI4 and CI4+ carbon. CI4 is over 20% lighter and 1.6 times stronger than conventional polymers, with CI4+ being a technical advancement of CI4 which offers even more strength. This exclusive material allows Shimano to make ultra light reel seats, whilst maintaining the maximum strength.

**CARBON  
MONOCOQUE**

## Carbon Monocoque

An integrated hollow rear grip that is made from carbon. This advanced design removes the need for other materials to be wrapped on to the blank, is extremely lightweight, and offers excellent transfer of vibration from the blank to the hand. When compared with existing grips, the Carbon Monocoque is up to 10g lighter and increases sensitivity by up to 130%, enabling you to feel every vibration of a lure and the exact moment a fish attacks. Extensive testing has delivered excellent results producing outstanding performance, and the Carbon Monocoque design gives Shimano more options to develop much more sensitive rods for many other fishing disciplines.

## Rod Materials

**NANOALLOY  
TECHNOLOGY**

Toray NANOALLOY technology is used on selected premium Shimano rods. The resin, which holds the carbon fibres together in the blank, is distributed more evenly, eliminating weak spots and creating a better alignment of the fibres. The result is stronger, lighter and more responsive fishing rods.

**HPC**  
HIGH PRESSURE CARBON

Shimano **High Pressure Carbon** is a process which creates stronger, more responsive blanks. Pressure is applied to the blank surface during curing (heating) which evenly distributes the resin through the carbon fibre matrix. The result is a much stronger, more consistent performance and improved response.

**XT500/LRC**  
LOW RESIN CONTENT CARBON

Shimano **Low Resin Carbon** uses less resin to hold the carbon fibres together. This results in lighter more responsive blanks. Low Resin Carbon is usually used on lightweight rods where balance and action are very important.

## XT CARBON

**XT Carbon** is used throughout the Shimano rod range. The number following the XT (XT100), denotes the quality of carbon fibre used. The higher the number, the stronger the carbon. Where different types of carbon are combined to create the required action both numbers will be shown (XT60/40).

Adding **Biofibre** reinforces the carbon fibres in all directions. This gives outstanding strength, shock resistance, lightness and power.

GeoFibre is a naturally derived component that provides rigidity and high tensile strength when added to rods in the lower to mid-price rod band.

## Rod Components & Features

**Fuji** are one of the leading rod component companies in the world and have a close working relationship with Shimano. Fuji guides are used extensively on Shimano rods. Fuji reel seats are also used on many high quality Shimano rods.

## FOSSIL WOOD

**Fossil Wood** is used on some Shimano reel seats. Created by compressing organic raw materials into a carbon like state using over 1000 degrees of heat, the resultant material is much stronger than wood and each component is both unique and resistant to moisture.

## ALPS™

For high quality salt water rods, Shimano often select **ALPS** guides and reel seats. ALPS roller guides have a reputation for excellence which perfectly matches the expectations of Shimano.

**S.D.R.**  
SHIMANO DYNAMIC RESPONSE

The unique **SDR** construction process eliminates any spine forming during manufacture, meaning the blank action remains uniform, regardless of which way the rod is bent.

# CARDIFF EXLEAD

Designed in Japan the Cardiff EXLead is one of the most sensitive rods available and can also be used for extreme lightweight lure fishing for smaller predators. The ultra slim blank of this remarkable rod has a progressive action and is fitted with the very best lightweight Fuji Titanium guides to maintain the ultimate sensitivity, which is further enhanced by Shimano's Softtube Top creating a faultless bend. In the hands of experienced light lure specialists this superb rod will give unrivalled performance to satisfy the most demanding anglers.

CDIFEXDS60SULFF	1.83m	94cm	73g	7	2	0.6-4g	379.99

# CARDIFF AX

The Cardiff AX is a Japanese designed range for use with small lures for smaller predator species. The progressive action has an almost elastic type feel which absorbs unexpected pressure without compromise. The ultra slim blank is reinforced with Hi-Power X carbon technology to give additional compression rigidity and also features Shimano's exclusive Softtube Top. Although this range offers remarkable sensitivity, it has an inner strength to cope with larger than expected predators.

# DIALUNA XR

Shimano's Dialuna XR range of light spinning rods is designed for anglers who want a high-performance rod that does not break the bank. Combining Shimano's Hi-Power X and Spiral X carbon blank technology, which inspired the XR naming (X Revolution), this unique construction utilises carbon fibre tape, making the Dialuna XR one of the most solid and accurate casting rods in the market, whilst decreasing the overall weight. The fast/progressive action ensures maximum casting performance when fishing from the shore. Although designed for Sea Bass, the Dialuna XR also makes a top fresh water predator rod when using hardbaits.

# EXPRIDE

Shimano Expride rods are designed to a clear and concise brief – 'minimum materials to offer maximum effect'. The incredibly lightweight, yet extremely powerful series features Shimano's Hi-Power X blank technology which also reduces blank twist. This reduced twist means better lure and tip control during casting and retrieving, and maximizes strength. Expride rods feature advanced weight reducing CI4 reel seats. Spinning models are equipped with Shimano's CI4 Perfection Seat and the casting models with Shimano's CI4 Fighting Grip Type R. All rods feature semi-micro Stainless Steel Fuji K-guides with SiC inserts to complement the Expride's performance attributes. Stronger, lighter and more sensitive, the Expride series is made to give you all the power you are looking for.

“ Trout One Special casts remarkably well for such a lightweight rod and is at home on small streams and rivers

## TROUT ONE *Area Special*

For trout and light lure enthusiasts the Trout One Special offers an enviable combination of high carbon technology, utilising Shimano's exclusive Hi-Power X Construction, with an understated traditional custom build look. Ultra responsive, with a slow/progressive action, the Trout One Special casts remarkably well for such a lightweight rod and is at home on small streams and rivers. However, for the ultra light lure angler fishing for smaller predators like perch, the Trout One Special also makes a great lightweight jiggging and spinning rod.

# COMMERCIAL

The new Speedmaster AX Commercial is the latest addition to the Commercial Master Series and the first to use Nanoalloy carbon technology

## SpeedMaster AX COMMERCIAL

The new Speedmaster AX Commercial is the latest addition to the Commercial Master Series and the first to use Nanoalloy carbon technology. Remarkably slim, with a perfect progressive fish-playing action, the Speedmaster is available in 3 Feeder models (8', 10' and 9'/11') and 2 Float models (10' Float, 11' Float/Pellet Waggler). Together these models cover just about all running line fishing to be found on man-made Commercial waters stocked with carp.

Fitted with Fuji guides, the HPC 100 carbon fibre blank has added Biofibre for strength and is fitted with a Shimano custom reel seat and a split cork/EVA handle. All feeder rods come with three carbon quivertips.

# SALTWATER SPINNING

## OCEA PLUGGER FLEX

Designed for fans of top water lure fishing, the Ocea Plugger Flex combines Shimano's top rated Hi-Power X and Spiral X carbon technology into a rod that makes long accurate casts easier than ever before. Available in three strengths Medium (90g lure), Medium Heavy (110g lure) and Heavy (130g lure) these rods are perfect to use when fishing for surface feeding tuna and tropical species like GT, tarpon and dorado. The long EVA handle gives powerful leverage and the large diameter Fuji K-Type guides allows leader knots to pass through with minimal friction.

## OCEA BB HEAVY GAME

The Ocea BB Heavy Game spinning rod is designed to catch mid size tuna, GT's and other pelagic offshore species using lipless lures like poppers and pencil lures. This extreme series can cast lures up to 180g and is strong enough to land extremely hard fighting fish to over 50kg. The reel seat and front grip position is well balanced and a good compromise between casting performance and fish playing. New for 2016 is a 70H model with a versatile casting range of between 60 and 150g and a fantastic four piece 76H which is perfect for travelling big game anglers.

## OCEA BB BLUEFIN

The Ocea BB Bluefin spinning series is specially designed for targeting Bluefin tuna in the Mediterranean. The tip is softer than the heavy game models, which enables you to cast smaller lures and metal jigs at long distances to feeding fish. The rubber gimbal cap and long front grip produces a comfortable solution for long hard battles with powerful fish. For the travelling big game angler there is one four piece rod.

## COLTSNIPER

Originally designed for use with Shimano Coltsniper jigs when casting long distances to feeding fish from the boat or shore, the Coltsniper BB can also be used for a wide range of other large lures and hardbaits in a saltwater environment. Built using Shimano's Hi-Power X construction and fitted with Fuji SIC K-type guides for trouble free casting, the Coltsniper BB has a medium to fast action that will cast impressive distances. The full EVA handle is long enough to get good leverage when casting and is fitted with a Fuji DPS reel seat.

# SALTWATER JIGGING

## GAME Type

Shimano's Game Type rod range comprises three unique rod actions to suit different modes of jigging - slow, light and regular. Unbelievably slim and sensitive thanks to the inclusion of both Spiral X and Hi-Power X technology in the blank construction, the fast/progressive action is perfect for creating the correct action with jigs and certainly comes into life when playing a fish. Fuji Ti/SiC Stainless K type guides ensure trouble free fishing, even when using thin braided main line.

# SURFCASTING

“ Designed to offer exceptional casting performance, the new Speedmaster CX Tele Surf is built using HPC200 carbon plus Biofibre to produce a fast action

# SpeedMaster

## CX TELE SURF

Designed to offer exceptional casting performance, the new Speedmaster CX Tele Surf is built using HPC200 carbon plus Biofibre to produce a fast action that increases tip speed during the cast, this results in faster lead speed on the release. Fitted with the best Fuji Alconite guides and a Fuji DPS reel seat the Speedmaster CX has quality throughout its design. Available in 6 models, from 4.00m - 80g up to 4.50m - 200g there's a length and casting weight model to suit all anglers looking for a competition quality surf rod.

							
SMCXSFTE408	4.00m	145cm	313g	5	6	80g	159.99

SMCXSFTE4520	4.50m	155cm	434g	5	6	200g	179.99

# SPIN POWER

The Spin Power 425BX has a massive amount of power and is designed for the experienced surf fisherman who knows how to load a rod correctly during the cast. Ideally suited to 'off the ground' casting techniques this stunning rod works best when using leads of 150 to 170g. The inclusion of balance weights in the base of the rod enables customised rod balance to be achieved, this is especially important when using ultra light reels like the Aero Technium XS-B MGS. Featuring Fuji K-guides to reduce tangles, and a proprietary Hi-Power X and Spiral X blank the Spin Power is a remarkable casting machine.

“ The Power Aero Surf has enormous power, which will satisfy the most experienced distance casters

## POWER AERO XTR-B TUBULAR BIG GUIDES

The Power Aero Surf has enormous power, which will satisfy the most experienced distance casters. The slim HPC300 carbon blank, with added Biofibre, also benefits from the very latest Nano Alloy technology producing a remarkable blank. Fitted with the very best Fuji guides and a Fuji NS reel seat, the Power Aero is one of the best rods on the market. Available with a hollow tip for maximum casting performance, the Power Aero has larger than normal guides for reduced casting friction.

“ On the beach the Speedmaster really comes into its own - for sensitive fishing there is a solid tipped model, whilst for the ultimate in raw power the tubular tip is the perfect choice

# SpeedMaster

## TUBULAR TIP/SOLID TIP

The new Speedmaster Surf has a slim profile HPC200 plus Biofibre blank with a fast action to maximise casting performance. Featuring Fuji Concept O guides (4.25m models have low rider guides) and a Fuji DPS reel seat, this new model also benefits from Shimano's Cast Control Grip for secure handling. On the beach the Speedmaster really comes into its own - for sensitive fishing there is a solid tipped model, whilst for the ultimate in raw power the tubular tip is the perfect choice.

“ Perfect for shallow beaches and river estuaries where the power of a normal surf casting rod is not required

## SpeedMaster TELE BEACH/3 PIECE BEACH

The new Speedmaster Beach is available in two models - a 3 piece version and a telescopic version. Both models have ultra slim blanks made from HPC200 carbon with Biofibre and are fitted with Fuji Alconite guides and a Fuji DPS reel seat, the telescopic version has 2 interchangeable quivertips. With a casting weight of 120g, both models are available in 4.20m and 4.50m options. Perfect for shallow beaches and river estuaries where the power of a normal surf casting rod is not required.

# CLOTHING

THIS YEAR SEES THE INTRODUCTION OF SOME EXCEPTIONAL CLOTHING, FEATURING ADVANCED DESIGNS WHICH MAKE A NOTICEABLE DIFFERENCE WHEN FISHING.

OUTER CLOTHING, CAPS, EYE PROTECTION AND OTHER CLOTHING ACCESSORIES COMPLETE A TRULY IMPRESSIVE RANGE OF ADVANCED, MODERN APPAREL FOR THE ADVANCED ANGLER.

# FABRIC TECHNOLOGY & SIZE GUIDE

## STRV SYSTEM SHIMANO THERMAL RETENTIVE VALUE

Shimano has created its own measuring system, the Shimano Thermal Retentive Value (STRV), to indicate warmth by numeric value.

Anglers can conveniently choose clothing to suit specific weather conditions by using the 'STRV' measuring system. By adding together thermal underwear, mid-layer and outer wear, STRV can correctly match clothes depending on the outside temperature. Each suit has its own value, wearing the suit in a similar outside temperature as the STRV value will give the angler optimum body temperature.

## GORE-TEX® FABRIC

GORE-TEX® is a waterproof, breathable fabric membrane designed to cope with the most extreme situations. Clothing made from GORE-TEX® offers outstanding protection and comfort.

## DRYSHIELD

Both waterproof and breathable, DRYSHIELD effectively discharges perspiration vapour whilst also repelling water. The result is increased comfort, even in the most inclement conditions.

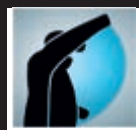

Breathability: 10.000 g/m<sup>2</sup>/day

Hydrostatic Head: 5.000 mm

## 700FP FILLPOWER

A high quality down, 700 Fillpower offers advanced heat retention. Garments containing 700FP are noted for their extreme warmth and insulation, and are perfect for wearing when fishing in the coldest conditions.

## UP SWING PATTERN

Designed specifically for increased motion and mobility, the UP SWING Pattern achieves the highest level of performance for movement, allowing anglers to fish without restriction.

## 2WAY SYSTEM

Back panel detaches to create more ventilation for added comfort.

# LUGGAGE

## MAIN FEATURES

The Organised Compact Design system allows the angler to choose from numerous specialised accessory cases that fit, jigsaw-like into one of the many compatible carryalls. This keeps storage versatile and endlessly customisable to suit all requirements and preferences.

The Aero Quiver system is based around an adjustable strap that components can be clipped on to. This offers countless variations, giving the angler the option to take as little or much tackle as they wish for each session.

The Duralast Zippers can handle the most extreme abuse to ensure the comprehensive Shimano luggage lives up to the expectations of the most demanding anglers. Duralast Zippers have been thoroughly tested for strength and ease of use.

Power Stitching is widely used throughout the Shimano luggage range. This involves double stitched seams which produce increased strength at all the major stress areas ensuring longevity and reducing the chance of failure.

# NEW PRODUCT GUIDE 2016/17

## TRIBAL XTR COMPACT SYSTEM CARRYALL SET

The most complete carryall system in our range is a real 'must have'. With this carryall system you can store all of your tackle in a well organised way.

### Features:

- Huge central compartment plus 4 side pockets
- Extra pocket in the top lid for buzzer bar system
- Special pocket for long style rig box
- Aero Quiver strap with comfortable shoulder protection
- Organised Compact Design – Supplied with 6 individual hard sided Small Accessory Cases and 2 Large Accessory Cases

SHTRXTR106

75cm x 40cm x 42cm

134.99

## TRIBAL XTR COMPACT CARRYALL

Versatile storage compatible with the Tribal Organised Compact Design system.

### Features:

- Huge central compartment plus 4 side pockets
- Extra pocket in the top lid for buzzer bar system
- Special pocket for long style rig box
- Aero Quiver strap with comfortable shoulder protection
- Organised Compact Design – Houses 6 Small Accessory Cases and 2 Large Accessory Cases, (not supplied)

SHTRXTR01

75cm x 40cm x 42cm

79.99

## TRIBAL XTR MINI CARRYALL

Small carryall with a deceptively large storage capacity.

**Features:**

- Main storage compartment with 2 end pockets for Accessory Cases
- Part Thermal lined for alternate use as a Cooler Bag
- Aero Quiver strap with comfortable shoulder protection
- Hard Skin moulded base
- Organised Compact Design – Houses 4 Small Accessory Cases and 2 Large Accessory Cases, (not supplied)

SHTRXTR05

60cm x 29cm x 32cm

49.99

## TRIBAL XTR FOLDING CARRYALL

A great tackle storage solution. Large capacity which can be stored under a bedchair when not in use.

**Features:**

- Two part folding design, both sections can be stored under the bedchair for clever use of space.
- Single sections used on short sessions
- Aero Quiver strap with comfortable shoulder protection
- Organised Compact Design – Houses 2 individual hard sided Small Accessory Cases and 4 Large Accessory Cases, not supplied
- Hard Skin moulded base on both sections

SHTRXTR03

76cm x 36cm x 41cm

79.99

## TRIBAL XTR STALKER & FLOATER BAG

Two bags in one, this is a great option for the roving angler. Works well in combination with the XTR Folding Carryall.

**Features:**

- Folding design for storage under bedchair
- Thermal 10Kg bait storage compartment
- Fast access large tackle box pocket
- Clips for connection to Folding Carryall

SHTRXTR04

36cm x 16cm x 34cm

39.99

## TRIBAL XTR BAIT BUCKET SEAT

Brilliant design for roving anglers. Holds bait, tackle and doubles up as a seat

**Features:**

- 2 elasticated mesh pockets
- Part thermal lining
- Catapult loop
- Hard Skin moulded base
- Organised Compact Design - Houses 2 Small Accessory Cases in pockets, not supplied

SHTRXTR11

54cm x 30cm x 39cm

49.99

## TRIBAL XTR LARGE ACCESSORY CASE

Perfect for storing a wide range of accessories. Fits perfectly into the larger carryalls.

### Features:

- Internal & external mesh pocket
- Fold down separators
- Easy-find name location
- Organised Compact Design – Large case fitting

SHTRXTR15

27cm x 26cm x 13cm

24.99

## TRIBAL XTR SMALL ACCESSORY CASE

Smaller version of the larger Accessory Case. Fits perfectly into the larger carryalls.

### Features:

- External mesh pocket
- Fold down separators
- Easy-find name location
- Organised Compact Design – Small case fitting

SHTRXTR16

13cm x 26cm x 13cm

19.99

## TRIBAL XTR XL GLUG & HOOKBAIT CASE

Ideal for anglers who like to glug their hookbaits or for those who carry lots of hookbait options.

### Features:

- Supplied with 6 large and 6 small glug pots
- Internal plastic & external mesh pocket
- Easy-find name location
- Organised Compact Design – Large case fitting

SHTRXTR12

27cm x 26cm x 13cm

29.99

## TRIBAL XTR COOKING CASE

All you need for comfortable eating on the bank.

### Features:

- Complete with utensils for 2 people
- Internal & external mesh pocket
- Additional storage space for a small stove and gas
- Easy-find name location
- Organised Compact Design – Large case fitting

SHTRXTR18

27cm x 26cm x 13cm

49.99

## TRIBAL XTR SLR CAMERA HOLSTER

The perfect SLR camera case. Extra padding, for secure transportation with areas for accessories.

### Features:

- Zippered base compartment for accessories with internal mesh pocket for memory cards
- Hard Skin body
- Secure zipper and quick access Velcro closure
- Easy-find name location
- Organised Compact Design – Small case fitting

SHTRXTR17

26cm x 14cm x 12cm

19.99

## TRIBAL XTR 1/6 POUCH

The smallest Accessory Pouch designed to match the organised compact system. 1/6 case matches a large Accessory Case in size. Perfect for transporting packets containing rig component.

**Features:**

- Transparent top lit

- Organised compact design

SHTRXTR101

13m x 7cm x 11cm

10.99

## TRIBAL XTR 1/4 POUCH

A 1/4 Accessory Pouch designed to match the organised compact system. Transparent top for easy tackle identification. Four pouches have a storage size of a large Accessory Case. Perfect for a variety of accessories, such as leads.

**Features:**

- Transparent top lit
- Hard sides
- Organised compact design

SHTRXTR102

13cm x 26cm x 13cm

11.99

## TRIBAL XTR SCALE POUCH

Accommodates most popular scale designs for safe transportation and storage.

**Features:**

- Removable internal scale fitting
- Internal plastic & external mesh pocket
- Easy-find name location
- Organised Compact Design – Large case fitting

SHTRXTR13

27cm x 26cm x 13cm

24.99

## TRIBAL XTR BAITING POUCH

Makes baiting up easier. Perfect for use with a throwing stick.

**Features:**

- Removeable adjustable waist belt
- Freezer friendly thermal lining – 2kg of bait
- Easy-find name location
- Organised Compact Design – Small case fitting

SHTRXTR14

13cm x 26cm x 13cm

16.99

## TRIBAL XTR RIG POUCH

The Rig Pouch is 1/4 the size of the large Accessory Case making it ideal for fitting into your carryall rig system. Perfect for storing all kinds of made-up rigs

**Features:**

- 10 rig bags
- Small rig board with pins for soft rigs
- Inner mesh pocket
- Organised compact design

SHTRXTR103

15cm x 15cm x 5cm

16.99

## TRIBAL XTR PROTECTOR ROD SLEEVES +

Hard shell protector sleeve that protects made-up rods during transportation. All three models can accommodate 12'-13' rods.

### Features:

- Padded separators and hard shell body
- Zipper on the back side to avoid line damage
- Lead pocket
- Aero Quiver system

<b>SHTRXTR06</b>	2 made up 12 or 13ft rods (210cm x 24cm x 20cm)	79.99
<b>SHTRXTR07</b>	3 made up 12 or 13ft rods (210cm x 32cm x 20cm)	84.99
<b>SHTRXTR19</b>	4 made up 12 or 13ft rods (210cm x 40cm x 20cm)	94.99

## TRIBAL XTR PROTECTOR ROD SLEEVE

Unique rod sleeve that protects made-up rods during transportation. Adjustable length top system accommodates 10'-11' (104) and 12'-13' (105) rods

### Features:

- Padded sides

- Supplied with 3 Rod Sleeves (12-13')
- Aero Quiver strap
- Huge internal capacity for bivvy storage
- Accommodates up to 6 rods

<b>SHTRXTR10</b>	Single 12ft rod (30 x 130cm, L=210cm)	124.99
------------------	---------------------------------------	--------

## TRIBAL ROD SLEEVE

Unique rod sleeves with adjustable tops suitable for 10-11' rods or 12-13' rods. Designed to be used individually or with the Tribal Rod Quiver.

**Features:**

- SHTR52 - 10-11ft rods
- SHTR53 - 12-13ft rods
- Zipper on the back side to avoid line damage
- Lead pocket
- Aero Quiver System

SHTR52	10-11ft - 185cm x 26cm	22.99
SHTR53	12-13ft - 215cm x 26cm	23.99

RRP = Recommended Retail Price

## TRIBAL XL TIP PROTECTORS

Handy protection covers ideal to use with un-sleeved rods.

**Features:**

- Fit all type of casting rods. Also in combination with 50mm starter guide
- Neoprene materials for better fit
- Easy to use

SHTR61	41cm x 14cm x 5cm	7.99

## TRIBAL RIG ROLL

The Rig Roll is a sleeve you can hook your rigs in and roll up for compact storage. The flexible solution for rig transportation, especially when stalking.

**Features:**

- Small, compact transportation size
- No need for rig boards or pins

SHTR51	43cm x 27cm	9.99

## TRIBAL AQUA SCOPE BUCKET

The Tribal Aqua Scope combines a collapsible bait bucket with an aqua scope for looking under the water from a boat to identify fishing hotspots in clear water. Featuring a clear base, with protective skin, and collapsible sides it will easily fit into your luggage storage system.

**Features:**

- Multi-purpose use as an aqua scope or a bait bucket
- Protection skin covers the clear lens when being used to store bait
- Large top opening makes it very easy to use for spotting underwater features

SHTR58	29cm x 29cm	24.99

## TRIBAL RECOVERY WEIGH-SLING

The perfect combination of a recovery and weigh sling.

**Features:**

- Foldable and easy to transport
- For safety, bright color markers on the top of the sling and anchor ropes.
- 2 anchor ropes with buoy
- Fixed scale rings for better balance
- Wide mesh bottom
- Heavy duty materials

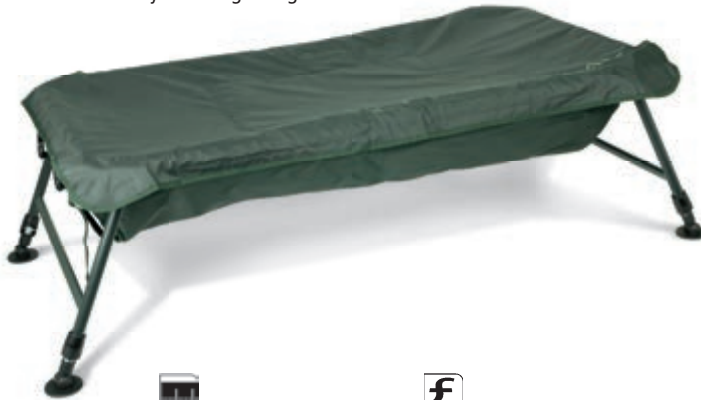

SHTR59      120cm x 31cm x 48cm      59.99

## TRIBAL CRADLE

Keeps fish in a perfect condition when unhooking and at an easier height. Ideal for use in combination with the Tribal Recovery and Weigh Slings.

**Features:**

- Folding design for easy transport
- All hard frame sections protected with padding
- Safety lock legs with swivel feet for secure fish control

SHTR60      115cm x 65cm x 40-52cm      79.99

## TRIBAL POP-UP MAT

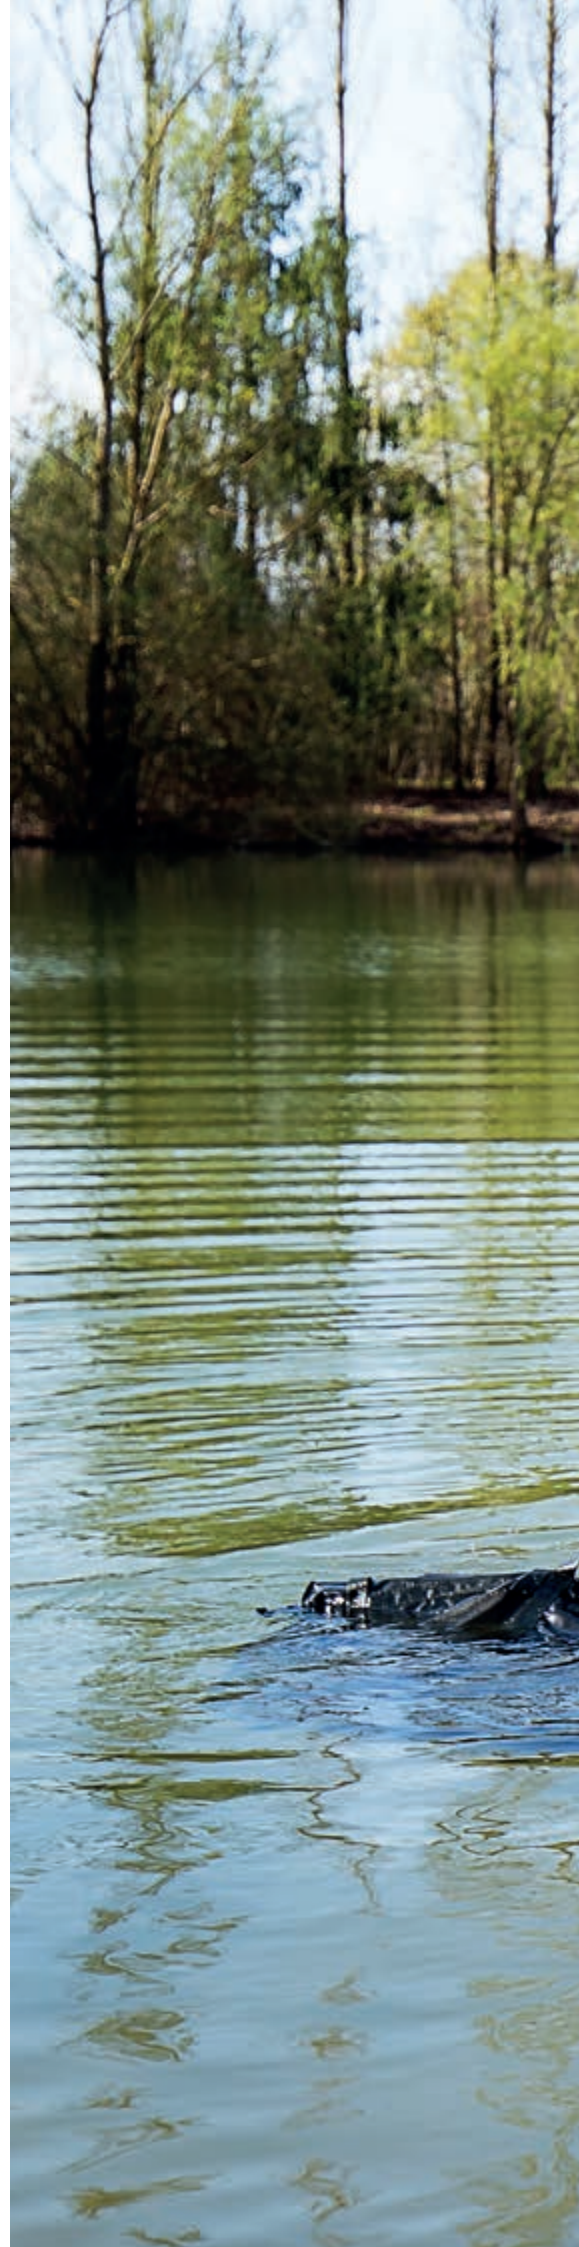

A space saving unhooking mat with maximum protection for the fish. Folds completely flat for transport.

**Features:**

- Large enough for big fish
- Space saving fold-flat design
- Delivered in protection bag
- Pegs to secure the mat on the ground
- Knee protector

SHTR54      113cm x 53cm x 31cm      64.99

## TRIBAL BEANIE MAT

Excellent mat combines good fish protection with easy fold-flat transport solution

### Features:

- Aero Quiver attachment - no strap supplied
- Six pegging points
- Provides additional protection to reels when applied to Aero Quiver system
- Extensive water resistant padding
- Floating design

SHTR55

125cm x 80cm x 8cm

39.99

## TRIBAL FOAM ROLL MAT

Multi functional mat for fish protection and as a temporary seat when stalker fishing. The inner foam tubes provide protection and with little weight.

### Features:

- Versatile design can also be used as a seat
- Low transport weight

SHTR56

125cm x 80cm

39.99

## TRIBAL GIANT MAT

Designed for giant carp. With a length of 140cm this mat will cope with all carp. The large size offers maximum of flexibility in handling and perfect protection.

### Features:

- 140cm size for the largest carp
- Knee protector
- Fold-over cover for extra protection when returning fish
- Extensive water resistant padding
- Floating design
- Transport bag with Aero Quiver Strap

SHTR57

140cm x 70cm X 23cm

109.99

Jan Porter was associated with Shimano for over 20 years. An exceptional angler of many fishing styles, Jan's input to product development was exceptional, as was his communication with anglers at exhibitions, in magazines, on screen and in recent years through social media. He will be missed greatly by all who had the pleasure to know, work or meet with him.

## Jan Porter 1955-2016

The 27th of April 2016 was a sad day for many anglers in the world of angling following the passing of Jan Porter. Not only was Jan a top-flight match angler back in the 1980s, when he was known as 'the man in red' for his colourful fishing attire, but he also chalked up many years as a tackle shop owner, specimen angler and angling consultant, most notably for Shimano.

He first came to prominence as a member and then captain of the legendary Trentman AC team, which became the first team to win the UK Division 1 National and the Angling Times Winter League in the same season - a historic double.

He also represented both England and Norway (his mother is Norwegian) in international match fishing competitions before changing tack in 1992 and targeting specimen fish of all species. Swapping his unique red clothing to green and then ultimately camouflage as he helped Shimano launch its Tribal range of clothing and tackle.

He began fishing with his late father, Terry, who was a keen angler and would often take young Jan to venues like the river Trent at weekends and during holidays. It was the beginning of a lifelong angling adventure.

Having started his work career as an engineer at Rolls Royce for 10 years, he then owned a tackle shop – Jan's Tackle in Hucknall – which, with help from his family and staff, allowed him to develop his match fishing career.

The self-proclaimed 'failed rock star, born-again angler' was a hit thanks to his red clothing, long hair, his penchant for rock music and his undoubted natural angling ability. It wasn't long before fishing magazines were using him as a columnist and contributor. This inevitably led to many TV angling appearances, DVDs, videos and more, all aimed at encouraging newcomers to get involved in fishing, a passion he had throughout his angling career.

Jan was one of the best known characters in angling with a friendly personality that appealed to all fishermen, young and old. Always ready with words of advice, encouragement and a great story teller, Jan had time for everyone and was hugely popular, as witnessed by the thousands of messages of condolence received after his death.

Angling lost a legend of the sport on the 27th of April 2016 and he will be missed greatly by friends, colleagues and family for years to come, but his memory will live on.

In response to the care Jan received at Myton Hospice during his illness, the family is encouraging donations to the charity via [www.justgiving.com/Jan-Porter1955](http://www.justgiving.com/Jan-Porter1955)

## TRIBUTES TO JAN FROM ANGLING AND SHIMANO COLLEAGUES

**Mick Brown** (UK predator angler)

Without doubt, Jan will be remembered as one of the great anglers of his era. I got to know Jan well during our time together through our shared passions of fishing and music, and his knowledge of so many other subjects was both wide and deep. Sincere, honest, enthusiastic, sensitive and caring are just a few of the adjectives that go a small way to describe a man who gave so much. I feel privileged to have known him so well.

**Iain Macmillan** (UK carp angler)

In memory of 'the man in red' or 'Mr Tribal' himself. Jan was an infectious character who left everyone he met feeling so much better for knowing him, we will all miss his mesmerising ways so much at Shimano, and we'll never forget him. "Shine bright you crazy diamond."

**Willem Stolk** (Dutch predator angler)

For almost 20 years Jan and I had a special friendship. We had a connection that seemed to work so easily and a passion for fishing that ran through our bodies. In my boat I still have his cap as a reminder of a great friend. I miss Jan... a true gentleman with a great heart and an angler of formidable ability.

**Gerard Bakkenes** (Sr. Marketing Manager Shimano Europe)

I was fortunate and honoured to meet Jan when I started with Shimano in 2000. At the time he had an outstanding idea to create the first and still one of the biggest Specimen Carp Communities in Europe 'Team Tribal'. Jan's vision, passion and energy supported us in creating one of the biggest successes in Shimano. I remember working together for hours on his famous, hand drawn product sketches, which resulted in fantastic clothing and luggage ranges. As well as being extremely creative and passionate, Jan was one of the warmest, most thoughtful and friendliest people I have ever come across. With Jan's passing Shimano is going to miss a true angling hero.

**Craig Brew** (Former Shimano UK Managing Director)

From Jan's first interview with Shimano, it was clear that he was someone special. Immensely creative and a born marketer, Jan was there at the birth of Tribal and the lynchpin of our trade shows and exhibitions. A man of integrity and soul. I feel privileged and honoured to have known and worked alongside him for so many years and to have been able to call him my friend.

**Steve Ringer** (UK match angler)

I was totally gutted to learn of Jan's passing. We worked together at Shimano for many years and it was Jan who gave me my big break in the industry by taking me under his wing. He was always my first port of call if I ever needed advice work-wise. Certainly one of the greats as far as I'm concerned.

**Alan Scotthorne** (the World's most successful match angler)

Jan Porter served his match angling career with the mighty Trentmen team during the 80's, one of the best river fish teams in history. My team Barnsley Blacks had many a battle with them when the river Trent was at its best. It was a team of angling hero's and Jan was certainly one of them. He was also a master of telling a great story and I spent many a time after matches transfixed on his every word. Jan Porter will live on in my memories for ever, he was a great angler and a lovely man.

**Ali Hamidi** (UK carp angler and TV presenter)

My admiration of him extends back to when I first started fishing and read about his match fishing antics. He was a true gentle giant, a loving guy with an easy come, easy go attitude. He was a credit to angling.

**Richard Griffiths** (Shimano UK Marketing Manager)

The devotion he showed to his angling, family and friends was the measure of the man. A unique way of looking at life sometimes led to those sparks of genius that many of us would spend a lifetime chasing. The Picasso of angling, the man in red, legend.
