Regardless of the purpose at hand, be it cutting or bulking, most people will find Tren E to be satisfactorily effective within the 300 mg- 500 mg per week range. It's normally best taken in 2 even I think its all relative to the individual. DDThailand. Member. I am in my fourth week of Test E and Tren E 250 mg twice/week and so far showing pretty good gains in size and huge amount of fat loss (230 lbs to 211 lbs). I work out every second day and run 3-4 miles on the days off. Getting pretty sore in the tits so I started liquindex last week which seems to have fixed that.

Hey guys back for some more advice. Just scored test 300mg/ml 10ml vial (Progressive Lab) and Tren 200mg/ml 10ml vial (Progressive Lab.) First question: Considering both of these are (oil based) can I mix tren and test with one barrell and shoot? Second question: A good buddy of mine gave me this perspective cycle. However, wanted to run it by you bros prior.

John what do you think if I added tren to this cycle Test e 500mg 300-500 iu HCG every 4-5 days Winstrol 50 mg a day Dianabol 20 mg a day. This is a 9 week mass cycle for me. Reply. John Doe.

144. Likes Received: 138. have been up to 650-700mg tren e before. was running 400mg tren e and 250-300 tren a pw recently along with 250mg test e pw. strength gains were great, been off 4 weeks now but strength is the same and overall scale weight loss is 26lbs.
Week 1, 2, 3, etc. - 300 test and 0.25 adex E3.5D or 6.5mg aromasin EOD (while you are waiting on nolva and clomid, as soon as you get them stop Test E) Week next #1 - only take the adex or aromasin.
Week next #2 - only take the adex or aromasin. Week next #3 - start PCT 100 clomid/day 40 nolva/day.
Week next #4 - clomid 100/day nolva 40/day.

I think its all relative to the individual. I'm running 300 Test prop and 350 Tren Suspension per week. Started yesterday. My last cycle (first run with tren), I started at 150mg of Test and 300mg of Tren ace, but bumped my test up to 500mg after the first week. Personally, I like running test at at least 250/300 minimum for any cycle. 500 Test E 300 Tren E | Store Accept Cryptocurrency **CLICK TO VISIT OUR ONLINE SHOP** Regardless of the purpose at hand, be it cutting or bulking, most people will find Tren E to be satisfactorily effective within the 300 mg- 500 mg per week range.
