

It's always an educational experience returning home to celebrate Thanksgiving. This simple trick allows me to take lectures.

This is what's happening in my life lately. Although it is online college I am learning a lot about my ideal career as an influencer on Youtube celebrity or Instagram influencer. You might think I'm crazy, but I've begun my journey with nearly 1800 followers. This isn't a lot but I believe it will grow through positive thinking and exclusive content that is packed with brilliant ideas. It's not a lot of work to get there, like Nas once stated. I've always believed in his comments.

My long, boring trip home for the holidays seemed as dull and monotonous like any other long trip. Because I am a large person, I don't like sitting in a tiny bus seat. I decided this time to combat boredom. youtube mp3 True! Two courses at my school include a great number of lectures. They are hosted on their servers, however they are also on Youtube. Youtube offers several high-quality options. It has been extremely helpful for me teachers and I copied their lectures to Youtube.

I'm getting ready for an 8 hour bus journey. I was able to go through the videos from the following three lectures. They were almost seven hours worth of audio. I would like to save the videos to my tablet therefore I just listed the lecture during the time I was on the bus home from Thanksgiving. YouTube mp3 convert helped me to do exactly this.. Since I'm only able to use a small amount of space on my phone, I only performed audio. Audio lectures are similar to podcasts, but everything is written as if the viewers were between the ages of 2 and 3. This makes it easier to understand even for those who aren't watching. So I took the videos and converted them to MP3 and prepared my headphones. I haven't bought the expensive new AirPods but I am using my old headphones that I have..

I also downloaded videos from Youtube and downloaded them as mp4 files on my iPad. It was very helpful during the first couple of hours. youtube to mp3 It is possible to see what's going on in the classroom, as well as the instructor's activities and activities, which is a wonderful thing. However, mp3s are much smaller than video mp4s, so I could not fit 7 hours of video onto my iPad. I also didn't want to erase Family Guy, which I downloaded through Hulu, just in case my brain had melted from too many lectures.

In the end I was really happy I brought the lectures in both video and audio.. iPad ran out of juice after 2hrs, then my phone kicked in. I didn't actually watch the lecture, I was just listening to the lecture. It was able to get me through all the way to where I wanted to go. When college resumed I found it simple for me to review what I had learned on my trip and

impress my instructor with my knowledge. It's incredible what technology can assist in making it easier to study. Youtube as well as other video storage sites provide infinite knowledge, with tutorials and DIY tutorials. It's something to think about.
