Google Hashcode 2020
Event Plan

PROPOSED BY | FOSS Community
NSBM

TABLE OF CONTENT

1. WHAT IS HASHCODE?

Hash code is a team programming competition, organized by Google for students and professionals all around the world. You can choose any programming language to solve the engineering problem which is given to your team. This year's contest is with an online qualification round that you can complete this event from a place whatever you like, including from one of our hashcode hubs. Then top teams will be invited to a Google office for the final round.

Google hashcode process goes like this. Once you have registered for the contest you will get access to the judicial system. It is an online platform where you can form your team, practice, join a hub and complete during the rounds. In online qualification round with youtube Livestream, your problem will be introduced. Hash Code was created back in 2014 by a few engineers in the Google France office

Your team will have four hours to solve the relevant problem and you can complete it with your tools and programming languages. Teams can complete it from a local hub or another location of their choice. Finally, top teams will be invited to a Google office for the cash prize and with a new challenge for them. For further reference please visit: https://hascode.withgoogle.com/

 # Hash code at NSBM Green University

With this international event, volunteering teams around the world organized local hashcode events to affect their own communities. We, the foss community is planning to hold a hashcode event at NSBM. Hashcode was done successfully in NSBM with a big industrial attraction and it was appreciated by a huge university crowd. This year we are planning to do a hashcode event in an impressive manner with the advisor collaboration of foss.lk as knowledge of experience

Purpose of Hashcode -NSBM '20

Hash Code, allows you to share your skills and connect with other coders as you work together to solve a problem modeled off a real Google engineering challenge!

"Join us to make our community technology-rich. Join us to strengthen our community to be rich in technology."

2. OUR PAST HASHCODE EVENT

2019 - NSBM Green University - Pitipana

FOSS Community NSBM

3. EVENT DETAILS

Venue   :   NSBM Green University,Pitipana,Homagama

Date   :   February 20,2020

Time   :   6.00 P.M Onwards

Target Audience :   About 100-150 University Students
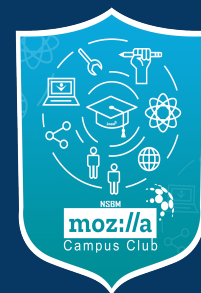

4. EVENT TIMELINE

Date   :   From February 20, 2019, to February 21, 2019
Time   :   From 6.00 P.M to 6.00 A.M
Venue :   NSBM Green University Town, Mahenwatta, Pitipana,
Homagama

5.30 P.M	Registration
6.00 P.M	Event Start & Welcome
6.15 P.M	Keynote
6.00 A.M	Event End

5. OUR PARTNERSHIP

The event hosted by Free and Open Source Community of NSBM

Along with many supported organizations.

THANK YOU
FOR
YOUR CONSIDERATION!
