URGENT BULLETIN - distribute at will

As you are all aware, the enemy has been circulating a plea for random actors to participate in a mass ritual to bind the God Emperor and his associates. This ritual, designated EA-Trashdove, is planned for Feb. 24, and subsequent dates.

LOC-Anchorage has informed us that they became aware of this project in late Jan. and have been monitoring the situation since then. According to a communication that we received this morning but can only divulge to you in part, LOC-Anchorage has completed their preliminary analysis. The threat is now graded as "LOW ENERGY."

We would also like to remind all personnel that the enemy engaged in significant occult activity during the election of 2016. Little needs to be said about the effectiveness of their efforts.

Despite the lack of any real threat, precautions have been initiated. LOC-Houston is in contact with the Japanese team. Japanese team has agreed to power up the accelerator for the 36 hours preceding EA-Trashdove. They will run Processes D, R and T at half hour intervals for a 96-hour period. These three Processes will neutralize whatever energy the enemy might muster, as well as push all of EA-Trashdove's participants into another timeline.

Personnel who wish to protect themselves personally may refer to the attached document for additional instructions.

Supplementary information

The following has been prepared for individual KOI personnel who wish to protect themselves personally from EA-Trashdove. Simply read it aloud while playing Shadilay. You may do this at any time, but the spell is most effective if done during the exact moment that EA-Trashdove is underway.
