

Learn About Search Engine Optimization

The ranking of the site in the search affects over 200 parameters. Since the formula for success is unknown to anyone, the specialist tries to maximize the implementation of the search recommendations in the hope that the overall effect will be higher than that of competitors.

Even small work and minor edits can play a decisive role in search ranking. Optimization can be done independently or ordered from specialists.

When choosing an independent optimization of the site, make sure that you do not make mistakes. Google is negative about attempts to artificially influence the search results, and therefore even 1 wrong step can be disastrous.

Optimization of the site provides a variety of types of content: text, audio, video, pictures, tables, forms, infographics, etc.

Pictures are supplied with unique names, signatures and ALT-descriptions. The ALT tag promotes correct indexing of images and provides traffic from the Google.Images service. Pictures should be unique.

The first results are usually observed after 3 months or even earlier. The works are conducted in 12 stages of 22 days each (in accordance with the calendar plan). Google quickly introduces innovations, and will not have to wait long.
