

Hgh Fragment 176 191 Aod 9604 | Buy Steroids Online

[VISIT OUR SHOP](#)

AOD9604 is a modified version of fragment 176-191, which is itself a smaller, modified piece of human growth hormone (HGH). AOD9604 was originally developed as an anti-obesity drug due to its lipolytic (fat burning) properties. This peptide is valued for the fact that it has limited effects beyond fat burning. AOD 9604 is a Growth Hormone Releasing peptide fragment 176-191. It works by regulating fat metabolism allowing the body to burn more fat. #medical #medicine #doctor #health #healthcare #covid #hospital #nurse #doctors #cybermonday #medicalstudent #surgery #mbbs #medstudent #medschool #coronavirus #science #pharmacy #medicalschoo #medico #anatomy #surgeon #tablepaper #nursing #bhfyp #medlife #masks #med #wholesale #bhfyp

AOD-9604 (Advanced Obesity Drug) was originally developed by Professor Frank Ng at Monash University in Australia, with the intent of finding an anti-obesity drug that had the fat burning effects of human growth hormone (HGH) without the muscle-building effect. HGH Fragment 176-191, is a modified version of AOD 9604, is a Growth Hormone Releasing Peptide fragment 176-191. This HGH fragment peptide helps regulate fat metabolism, enabling the body to burn more fat. By stimulating lipolysis and the destruction of fat in the body, HGH Fragment 176 191 inhibits lipogenesis - transforming food into body fat.

AOD-9604 - 5 MG. AOD-9604 is a peptide fragment (hGH Fragment 177-191) of the C-terminus of Human Growth Hormone to which a tyrosine is added at the N-terminal end. Studies have suggested that AOD-9604 is more effective than its predecessor AOD-9401 in its ability to stimulate lipolytic (fat burning) and anti-lipogenic activity. #orlando #centralflorida #orlandohealth #orlandodoctors #orlandopediatrician #orlandoprimarycare # botox #orlandobotox #preventativecare #chronicdisease #acuteillness #orlandodoctor #orlandomed #orlandomedical #flmed #floridamedical #fldoctor #painrelief #doctor #doctorsoffice #orlandonurse AOD 9604 is a modified form Growth Hormone which is a 191 amino acid peptide. The last 15 amino acids (176-191) of the Growth Hormone polypeptide have been reproduced as a specific peptide and is called GH Frag 176-191 or AOD 9604. This peptide is used for burning fat and for weight loss, and it has other benefits as well.

Get a "toned tummy" with chocolate

- 1 Chose your favourite chocolate
 - 2 Track portion in MyFitnessPal
 - 3 Hit your daily calories
 - 4 Look sexy AF
