

Cinstaller Method

I use Cinstaller, they offer up to \$2 per US install (Look for Rates after you register). They pay via Bitcoin, Paypal, Litecoin, Bank transfer, Payza and Webmoney

You can register [HERE](#)

After your registration, you must promote Cinstaller links: To create Cinstaller link, just go in "Promotion" and then "Direct exe Download"

Choose the second link and personalise the end of the link

Now you will need to promote your link, I personally use youtube to make my promotion, it's very easy and don't require any skills. You will get paid each time people install the software using your link

You will have to make a video to promote something that people will have to Download, for example, Destiny 2 was released few days ago, so I made few video about "DESTINY 2 CRACK COPY" and I just show some gameplay inside a white window made with visual basic in 30seconds, it makes it more real because there is my desktop in the background

After that you will have to rank your video, if your video is about recent game, it's very easy to rank up, just buy some views and likes

For fake comment I use [YTMonster](#)

I recommend to make video about very recent games/software due to the hype when the game releases.

I don't recommend to reupload video

[Here](#) is an example of what you can earn with this method in just 1 month by uploading few videos

I also bought some aged yt account but it's not necessary

Don't forget to use link shortener to put your link in description

Cinstaller also gives free private domain name to all members to provide Chrome blockage, just send them a message

Thanks for reading and good luck with this :D
