Arsen is a fabric whose manufacturing process is based on microfibers. It may be found in as many as 50 colours. Good resistance to abrasion and being covered with water repellent finish make the product perfect even for the interiors of public buildings. Fabric surface that imitates tanned leather makes it an unrivalled proposal for upholstery.

water repellent

maintetance instructions

Composition		90%PL, 10% CO
Weight		285 gr/m2
Width		138 cm
Colour fastness to light	EN ISO 105-B02	4-5
Abrasion resistance	Martindale cycles	50 000
Colour fastness to rubbing	EN ISO 105 X12	3-4 / 4-5
