

# Best Current Private Server?

Best current private server?

I'm going to start WoW, but due to monthly sub. I can't play it (My Family income is low)  
What's currently the overall best private server you could recommend?

Take a look at the pinned thread that has a list of private servers sorted by expansion

What are you actually looking for? Vanilla/TBC, Wrath, Cata, Pandas, etc? Private servers are mainly focused on Vanilla and Wrath. TBC servers are still available, but they are not as numerous as Cata. Pandas and other species are not as popular, so don't be too optimistic.

Apollo currently is the best Cata. Sunwell will soon launch its fourth F E S H server for Wrath on the 27th. EXTREME MINING Vanilla is a little hard to nail down though as servers launch and die pretty quick because a fair amount of servers tend to be exposed for corruption - although this was years ago when I played Vanilla, I doubt it's still a problem.

Personally, I am most excited about Cata because I am a Disc Priest. Cata is my favorite time of the year. So Apollo servers get my vote. Apollo II, the current server of focal point by them, is nearing the end Firelands and about to start Dragon Soul.

I don't know the WoW expansions. I think the best is the overall.

It used to have vanilla and wrath. However, classic is mostly tbc/wrath. Vanilla servers are not doing well right now.

But hyjal and tbc will release soon so it will revert to vanilla and tbc dominating the scene

Tauriwow, hands-down, the most honest private server.

If you want to experience the full wow progression, visit a server that is still progressing like cata.apollo 2. Your question will be answered biasedly.

My biased opinion is that it will be tauri mop and cata apollo 2. I bet that if tauri makes a new mop, it will be the best all-around exp

Tbh, if you like wrath wait for the sunwell new server that's coming end of this month... While you wait, you can play on warmane or ascension.

The best server will depend on what you're looking for ofc, in case you're looking for a chill Vanilla server with friendly players and custom content i can recommend Turtle WoW :)

If you're want to feel the game new again, I'd suggest you Vanilla Plus

Your post/comment has been automatically removed because your account is too young. Please read the rules.

for new ppl, Warmane for sure. Icecrown is the most populated, but all lv80s are already. Lordaeron is also pretty good.

apollo 2, if you are new and want to move forward, all pre85 content is friendly af.

Warmane if you don't mind paying to play. Sunwell is launching a new WOTLK Server later in the month.

My sub to classic expires shortly, and when it does I am going back to Warmane Lordaeron. In my personal opinion, that is the least flawed server out there. It is 5 years old, which is the only problem. I'd prefer a fresh server that allowed me to find players to progress through Ulduar with, but I can't get everything I want.

I think they just reset the x1 server to fresh

I'd suggest warmane. It is really long term. My account is from 2010; it is still working.
