

# Husqvarna Chainsaws - The Best Choice For Homeowners

If you're looking for a Husqvarna chainsaw and don't know which one is best suited to your needs, there are some things you should consider first. First, do you need a professional Husqvarna chainsaw? Are you going to use it in the winter or perhaps on a farm? These are just a few questions to ask yourself before you go ahead and purchase the chainsaw of your dreams.

Professional chainsaws have all of the same safety features that professional chainsaws have. Husqvarna has been making durable, heavy-duty chainsaws for decades, so you know they're built to last. Husqvarna chainsaws also have a safety feature called an "X-torq". An "X-torq" is located behind the cutting blade on most Husqvarna chainsaws. This prevents the chain from cutting into your leg or foot if the chain brakes fail, so you can leave the saw in peace while you continue on your work.

Another safety feature that comes with a professional chain saw is a heavy duty chain guard. These chainsaw chains are made out of extra thick steel that's extra strong and will stand up to the toughest jobs. You don't have to worry about your chainsaw cutting a clean sloping path through the woods when you're cutting fall tree limbs. Many professional chainsaws come with loggers use a saw log profiles. Husqvarna chainsaws loggers use a heavier gauge chain to ensure more stiffness and strength, which increases the amount of years these chainsaws can be used safely.

Most Husqvarna gas chainsaws have an automatic oiler as well as a cordless battery starter. These starting systems can be powered either by the electric chainsaws corded accessory, or by the electric engine if you choose to use it. If you choose to use the electric start, then you'll want to be sure your electric chainsaws corded accessory is not damaged. Also, all Husqvarna electric chainsaws come with a one year warranty that covers everything from the chain to the motor to the frame and even the gas tank.

A couple of other useful additions are a tool rack and a case for your chain saws. The tool rack attaches to the saws arm and keeps all your tools in order. It's handy for power drills, screw drivers, wrenches, pliers and almost any other small handy tool you might think to use on a regular basis. Tool racks come in two separate components; the base and the stand. read more The base version is usually more expensive but it is designed to keep your other tools safely away from the main saw unit.

For more heavy duty tasks, you might also want to consider the Husqvarna gas chainsaw mills. Husqvarna manufactures both diamond chainsaws and dual chain saws. The diamond version is more suited for professional use because of its extra serious cutting ability. Dual saws are great for both professional and occasional use. Both Husqvarna chainsaws offer owners lifetime warranties.
