OpenSource: yes

Similar projects on BSC: no

Team: Same team/devs who developed CheeseSwap.app

Keep3rb (KP3RB) Contract Address:

0x1092E4F72a9D7a28418351D029e273906aF24797

History of Keep3rV1 (KP3R):

Andre Cronje released a new cryptocurrency [KP3R](#) on 28 Oct. and immediately added it to the decentralized exchange Uniswap. The first deals with KP3R (Keep3rV1) were executed at \$1.4. The coin went up rapidly **by 5500% to \$79 in two hours.** **\$KP3R** is now trading above \$100 and has a [\\$25M market cap](#), according to Coingecko.

What is Keep3rb Network (\$KP3RB)?

Keep3rb Network (\$KP3RB) is the first successful fork of \$KP3R on Binance Smart Chain. It is a "job matching" incentive marketplace/network for Job posters and "Keepers" who do tasks for them. [Read more info about the project in documents.](#)

What are Keepers?

Keepers are persons or teams with a technical background who can do different technical jobs from the simplest to the most complex tasks.

This can be submitting a signed TX on behalf of a third party, harvesting, calling a transaction and so on.

What are Jobs?

In the Keep3rb Network, anyone can add a Job for someone to do via governance or by submitting a job proposal.

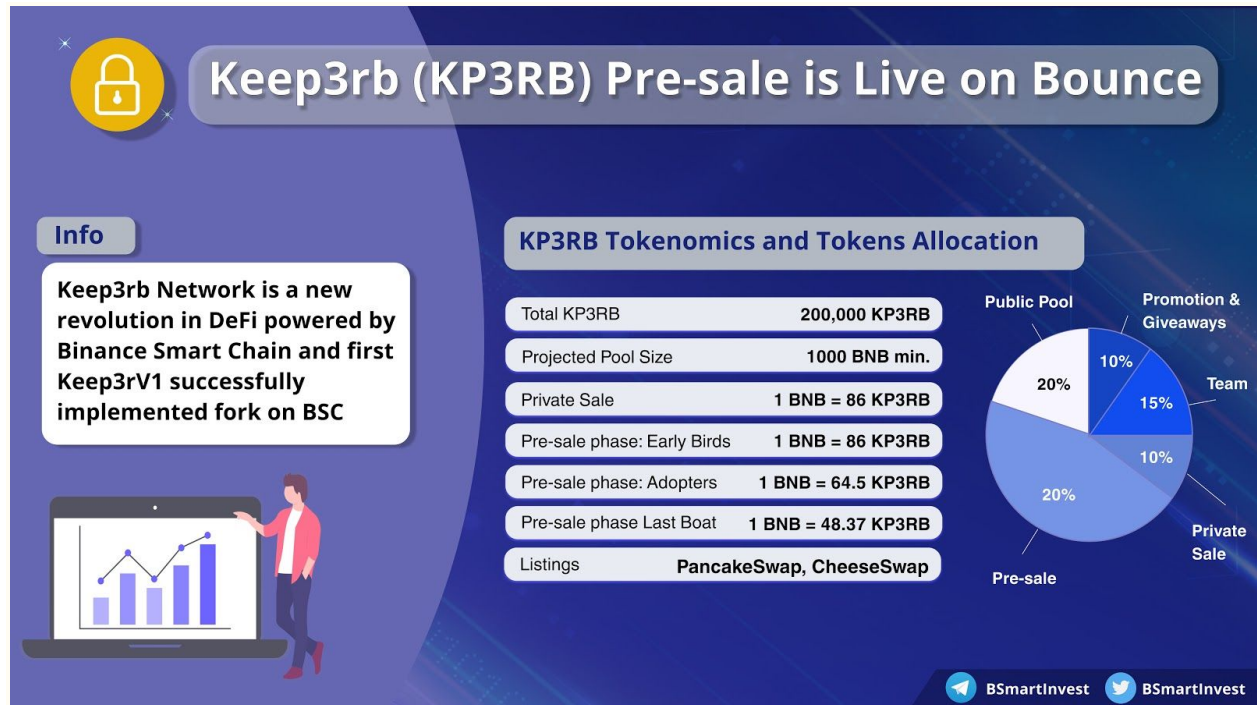

\$KP3RB Token

\$KP3RB is the native token for the Keep3rb Network and having more KP3R represents a higher "reputation" in the Network. Potentially, you want to trust people with a high reputation, who do not act in their selfish interests and have no malicious intentions.

So, the more KP3R tokens you have, the higher your reputation, and the more responsible and complex tasks you can select.

Tokenomics and Token Sale Info

Total KP3RB = 200,000 KP3RB

Team : 15% : 30,000 KP3RB

Private sale: 20,000 KP3RB

Pre-sale 45%: 90,000 KP3RB

PHASE: Early Birds : 1 BNB = 86 KP3RB [Ended]

PHASE: Adopters : 1 BNB = 64.5 KP3RB [11.10.2020-11.12.2020]

PHASE: Last Boat : 1 BNB = 48.37 KP3RB [11.13.2020-11.15.2020]

Public Pool : 20% : 40,000 KP3RB

Promotion & Giveaways : 10%: 20,000 KP3RB

[Will conduct next 3 months]

Summary

- Keep3rb Network is a unique and innovative project on Binance Smart Chain
- The project has a real usage, and its native token has high utility. Even our team has a few Jobs ideas to do by Keepers.
- The Keep3r project has been in Coingecko trends for a long time , and Keep3rb can also attract a lot of attention.
- Test contracts work smoothly and [open to verify](#).
- Keep3b is developed by same team/devs who developed CheeseSwap.app, so it's a high chance that KP3RB is not a rug pull.
- Good marketing, banners on bsscan, support of well-known cheeseswap project.
- High risk / high reward. Pretty good presale structure for early entry and low market cap of the project so we decided to invest. The project will also spend some of its funds to support liquidity.

You can compare the capitalization of Keep3rb with other projects on BSC, we did the [analysis of BSC projects by Market Cap](#).

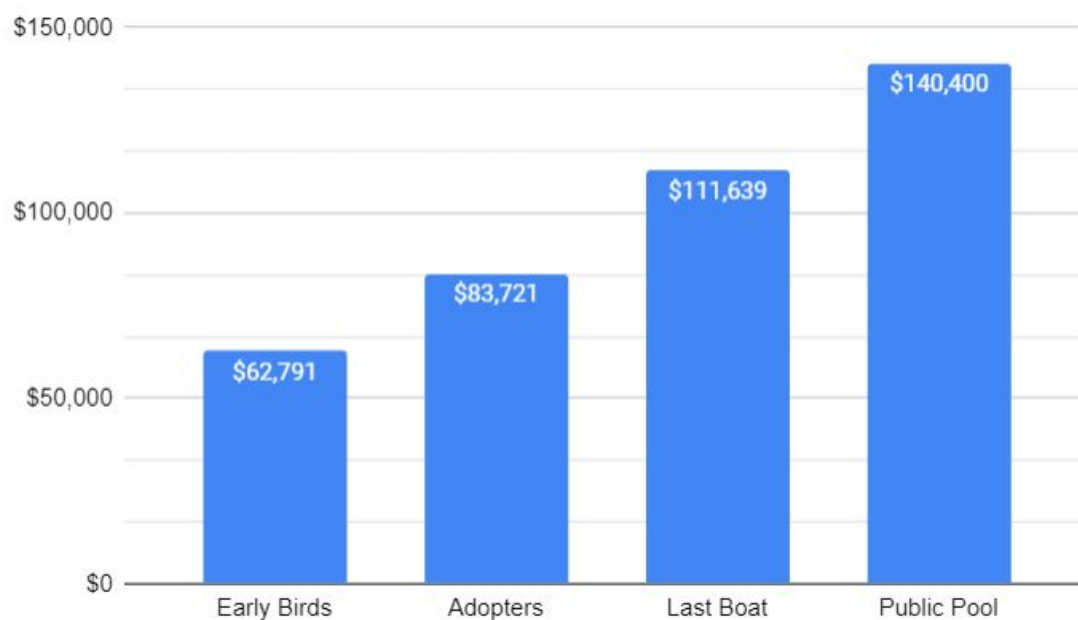

At the price of Public Sale, fully diluted market cap(if all tokens are unlocked and sold) is only \$140K. Current Market Cap of KP3R is \$25M

1 BNB	\$27.00
-------	---------

	1 Token in BNB	1 Token in BUSD	Fully Diluted Market Cap
Early Birds	0.012	0.31	\$62,791
Adopters	0.016	0.42	\$83,721
Last Boat	0.021	0.56	\$111,639
Public Pool	0.026	0.70	\$140,400
